

**INVITATION TO EDWARDS AIR FORCE BASE  
ENHANCED USE LEASE OPPORTUNITY INDUSTRY FORUM**

**INVITATION TO INDUSTRY FORUM**

The Air Force Civil Engineer Center (AFCEC) and Edwards Air Force Base (EAFB) invite interested parties to attend an Industry Forum in connection with the concrete recycling Enhanced Use Lease (EUL) opportunity at EAFB. The Edwards Concrete Recycling EUL opportunity Industry Forum is scheduled for 26 June 2013 at Edwards AFB Conference Center. An EUL is a real estate transaction authorized under 10 USC 2667. At the Industry Forum, the Air Force will provide an overview of the EAFB Concrete opportunity, the Air Force EUL program and timelines, and conduct a tour of the available Concrete EUL site. Industry is also provided an opportunity to ask questions and provide feedback to the DRAFT RFQ previously issued in FedBizOpps.gov under solicitation number AFCEC-13-R-0012.

**OVERVIEW OF OPPORTUNITY**

The AFCEC and EAFB have stored and are currently processing 400-500 thousand tons of concrete from runway replacement projects. The Air Force project team believes the potential exists to establish a recycling lease to a developer and avoid disposal cost keeping funds on target for the Air Force mission.

**Because the Industry is hosted on a secure military installation, each attendee must pre-register for the event and provide certain information in order to gain access to the Base. Registration must be completed by June 24, 2013.**

**INDUSTRY DAY REGISTRATION**

Persons interested can register to attend by emailing their first and last name, driver's license number and the state that issued it, birth date and name of company to [AirForceEUL@afeul.com](mailto:AirForceEUL@afeul.com). You will receive a confirmation email with additional details on the Industry Forum.
