Page 5

PROF. LENE: I'm Gene Lene, and I'm the community co-Chair of the RAB.

MR. McCULLOUGH: Pat McCullough with the Air Force.

MR. JACOBI: I'm John Jacobi with the Texas Department of Health.

MR. MIXON: Carl Mixon, the Bexar County Fire Marshal, and the Emergency Medical Coordinator, and also the chairman of the local Emergency Planning Committee.

MR. MURRAH: I'm Sam Murrah, I'm a member of the Clean Air & Water, and I'm a ram ecologist.

MRS. JOHNSON: My name is Yolanda Johnson, and I'm with the Committee for Environmental Justice Action, and I represent the community.

MR. BANNER: Gordon Banner with the TNRCG-in Austin.

GEN. ROBERSON: Paul Roberson with the Greater Kelly Development Corporation.

MS. STANKOSKY: Laura Stankosky with the Environmental Protection Agency.

MR. HAGELTHORN: Allan Hagelthorn, the community.

that you received, the materials package.

Hopefully, each of the RAB members did receive a package. I believe, we probably have some extra ones if there's anyone that does not have a -- a copy.

What I'd like to do is begin going over the action items. And after we discuss the action items, then, go on to vote on the January '99 minutes. So if you would, turn to Tab 3 of your materials package.

As I've done in the past, what I'd like to do is just briefly highlight some of the action items and the status of those, because, in many cases, those items in the action list have been completed and that information is enclosed in the -- in the packet and, hopefully, is self-explanatory. So I'll just pick a few of them and -- and go down the list, and if you have comments or questions, as I go through the items or afterwards, we'll certainly open it up for

The first that I'd like to mention is Item 1. I did, in fact, write a letter to Damian Sandoval, and I appreciate there were a couple of comments on my draft letter that I incorporated,

Page 6

MR. QUINTANILLA: Armando Quintanilla, and I live in an area that's been impacted by toxic spills from Kelly Air Force Base.

MR. WEINSTEIN: I'm Ed Weinstein representing the San Antonio Water System.

MR. SANCHEZ: And I'm Sam Sanchez with the San Antonio Metropolitan Health District.

MR. RICE: George Rice, community member.

MR. SOLIS: Juan Solis, community member.

MRS. ADAMES: Dominga Adames from CEJA and the North Kelly Gardens.

MS. PEACE: Annalisa Peace with the Regional Clean Air & Water Association.

MRS. HUERTA: Tanya Huerta. I'm a community member.

MR. PUFFER: Mark Puffer, a community member.

MR. IGLESIAS: Kent Iglesias, community member.

BGEN. MURDOCK: Okay. Thank y'all very much. I appreciate it.

What I'd like to do now is focus on the packets that you received -- focus on the packets

Page 8 and that went out, and Damian was appreciative of

The executive sum -- Number 3, the Executive Summaries of the Technical Documents are provided at Item 3 as requested.

Item 4 addresses the Web page, and we have -- in fact, have the Web page up and running, and we will provide the executive summaries to documents on our Web page.

Number 6, I think, Armando, you had asked for a list of properties designated for lease back, and that's provided at Item Number 6.

Number 8, the list of the top 5 priorities, as we view it, from an Air Force perspective, or Kelly perspective, I'd like to hold off because we've -- I've elected to make it an agenda item because I think it important enough that we dialogue about that and I present the ideas and then, hopefully, you'll provide some of your thoughts. So I'd like to defer that until the agenda item when it comes up just before the break.

And then finally, Items 9 and 10, we've provided the information as requested on both of those items at the attachments 9 and 10.

Page 10

Does anybody have any questions or comments concerning the actions -- the action items as -- Yes, ma'am?

MRS. HUERTA: I have a question about 5.

BGEN. MURDOCK: I think we're really going to have to speak into the mic or we're going to have problems hearing, unfortunately.

MRS. HUERTA: I have a question about
Number 5, where it talks about the BCT handouts
to the RAB. I got this information today and
I -- the April 13 minutes, on the back of this is
attachments about problems that keep the Kelly
BCT / RAB from performing at its best. What is
this about? Are there problems with the BCT that
we don't know about or --

BGEN MURDOCK: I'll refer that to a member of the BCT and maybe -- I believe, that's a portion of the minutes, but the applicability of it I'll have to defer to a BCT member. Maybe, Gordon or one of the other BCT members can -- can discuss that. William?

MR. RYAN: Hi, my name is William Ryan and I'm the Air Force Representative on the BCT, and along with a representative from the state and

KAnd this AR a tom the busicycle Payet I go of 56 back and revisit and continually try to improve the process that -- that we have at the BCT to -- to achieve our goal and our missions.

MR. QUINTANILLA: General, I have a question on that. Was your --

BGEN MURDOCK: Before you do, Armando. Does that answer your question?

MRS. HUERTA: I'm not sure. I -- I want -- I guess, what I need is an -- a reassurance that problems there are not impacting the decisions that we need to be making.

MR. RYAN: We as the RAB?

MRS. HUERTA: Well, as the Advisory
Board.

MR. RYAN: I -- I don't see that, no.

It's really -- It's sort of an internal -- it's an internal business process where we are, you know, identifying those things that we can work on to make our job and our product better for -- for you.

MRS. HUERTA: More efficient.
BGEN. MURDOCK: Armando?

MR QUINTANILLA: Those problems that you're having, by having a -- a member from --

Page 12

EPA.

As any good business or organization will do, we periodically go through a process of identifying how we can improve what it is we're doing, and we're going through that process at the BCT through a facilitator. And -- And we have several steps that we're going through, and what you're seeing there is the initial step of identifying some problems and -- and -- and trying to bring those issues to resolution.

The -- And what you see is a snapshot of where we are in this process.

The first thing, we -- we -- We have six things that we're going to try to do. We're going to review and define our mission statement; we're going to identify those things that are hurdles or -- or detract, perhaps, from our ability to meet our mission; then we're going to identify those things that we're actually doing well and -- and we want to keep doing to accomplish our mission; and then we're going to establish an action plan that -- that addresses, those issues that we see as hurdles and -- and a plan to continue those things that we're doing well; and then execute that plan, obviously.

from the RAB when they happen will they make them worse? I know that you don't want the members from the RAB in there or from the community at all. If there had been a RAB member there, would the problems have been worse?

MR. RYAN: We -- I can't say. We haven't really thought about that in those terms. I mean, this is -- the process we're doing is an internal thing. We're really looking at ourselves.

MR. QUINTANILLA: Because one of the things that you said in -- in there that -- why you didn't want any member of the community or the RAB in there is because it would interfere with your thoughts and ideas like we couldn't provide any thoughts or ideas that would be helpful to the BCT. In fact, I thought that was discriminating.

MS. POWER: My name's Abbi Power. I work with the TNRCC and the Region 13 office, and I too participate in these BCT meetings.

Ms. Huerta, to address your questions and concerns: The attachment that you see was a list of items that the entire group brainstormed on.

The reason for this brainstorming process was our

Page 13 facilitator felt that some of the communication during the actual BCT meetings was not exactly as productive as it should be, so he asked us to brainstorm. That list that you see is -- is -covers everything from coffee breaks to, you know, how many pages should a report be, and what kind of slides do we show during these meetings.

So again, it was -- it was something our facilitator, rather, requested that we do to assist us as a group of, what, 10, 15 people in communicating with each other.

MRS. HUERTA: Was this an outside facilitator?

MR. RYAN: Yes.

MS. POWER: Yes. It is an outside facilitator.

MRS. HUERTA: Who came in to look at the process and what it's --

MS. POWER: Exactly. It wasn't --Yeah. It wasn't anything that --

MR. BANNER: This is a -- Excuse me. This is a facilitator that's been with the group for a couple of years now. We've had a facilitator for a couple of years and this present facilitator, I think, has been with us

working together that -- that, you know, are challenging for us. They're technical issues and we're trying to understand how to work through these issues.

BGEN. MURDOCK: Any further questions on the BCT?

MR. QUINTANILLA: Yes. I have one more question. And that's on their mission statement. I think, that mission statement that they've got in there they copied from EPA, because that's exactly EPA's mission statement. The purpose of BCT, as outlined in Ms. Goodman's Management Guidance to all of the Department of Defense Agencies, is, that the purpose of BCT is to development and implement the Base Closure Plan.

BGEN. MURDOCK: Well, we'll certainly pass that to the BCT for them to -- to note and to consider it.

MS. STANKOSKY: I'd like to address part of his question. I assume you're -- when you're talking about a mission statement for EPA, you're talking about protecting human health and the environment?

MR. QUINTANILLA: That's correct.

Page 14

for about a year now. So this is not somebody that we brought in all of a sudden to look at the effectiveness of the group. He's looking at us all the time.

MR. RYAN: He works with us at every BCT meeting.

MRS. HUERTA: Thank you. That was my question.

MR. QUINTANILLA: In other words, that was your report card as to how you're operating?

MS. POWER: I think, that's a good way to state it. It is a report card.

MR. QUINTANILLA: And you've got a lot of improvements to be made?

MS. POWER: Yeah. You might say that some of us getting Bs, Cs, and Ds.

MR. QUINTANILLA: A lot of improvements --

MS. POWER: And -- and again, we're --MR. RYAN: But we've made a lot of progress. And we've, I think, done a lot working to -- together, you know, we've gone through a lot of changes in personnel on the BCT, the -the RCRA Compliance Plan Permit just kicked in, and we've got a lot of issues that we're -- we're

Page 16

MS. STANKOSKY: Okay. EPA does not have a mission statement. We are directed through statute law and regulatory law. And part of that law is to protect human health and the environment. Through the Base Closure Process that's -- Part of EPA's directive is incorporated in that Base Closure Process.

MR. QUINTANILLA: That -- That's all that I'm asking is, that you put in there what -is your -- what you're supposed to do, your Base Closure Plan --

MS. STANKOSKY: But that's --

MR. QUINTANILLA: But you don't say nothing about the Base Closure Plan, and that's my problem -- my problem.

BGEN. MURDOCK: Well, we'll certainly note your -- comment, and I'll pass it on to the BCT for them to consider in their mission statement.

MR. QUINTANILLA: Thank you, Mr. Chairman.

BGEN. MURDOCK: George?

MR. RICE: Yeah. Thank you. I'd like to comment on two items, Item 2 and Item 5. I'd just like to thank you for taking the time to

misunderstanding, and I appreciate your answer on that regarding the Edwards Aquifer.

Now, on Item 5 regarding the BCT. We've already heard a little bit of history on this, and because we aren't allowed to attend the meetings at our last RAB meeting we asked if we could have all the materials that were handed out at the BCT or that were used as slides. And the response here is unclear. It refers to the RAB Charter. I looked -- I looked up the language in the RAB Charter and it talks about restoration documents and so forth, but not handouts. So I would just like to ask for a simple clear answer. Will you provide the RAB with all materials that are handed out at the BCT or that are used as overheads, slides, and that sort of

BGEN. MURDOCK: Okay. We'll certainly pass it on to the BCT and ask them for a response.

thing? That's my question.

MR. RICE: Do you -- Do you think that since --

MS. KELLY: Well, I can answer that right now. General, if you don't mind, I -- I

Page 19 restoration document 33that means and other of 56

document or handout, if you want to call it that, 2

that is prepared in connection with the 3

restoration process -- will be provided to the 4 community co-Chair at the same time such document 5

is provided to the regulators. Additional copies 6

may be requested and will be provided if 7

sufficient interest is demonstrated -- And the 8

Air Force has done that on several occasions. 9 10

Co-Chairs shall make the document copies provided accessible to the Board community members.

So that was the reason that the reference was made in that response to the Charter provision.

MR. RICE: But I'm still not clear what the answer to Item 5 is. Will we get all materials that are handed out at BCT meetings and are used in presentations?

MS. KELLY: George, if they're draft final documents, yes.

MR. RICE: Then, I guess, your answer is, no; there are some materials that are being handed out or used as specifications that we will not be seeing?

MS. KELLY: That's right. There are

Page 20

can answer you, George. The reference to the Charter was included because at the time of the Charter review there was -- there was pretty deep consideration of what kinds of materials should be made available on a regular basis to RAB members.

Those same types of materials are the type that are now being sought through the BCT. In other words, there -- they're materials that, in some cases, are -- are draft final or final documents, and other cases are preliminary drafts of documents. And, believe me, George, the same principles apply with regard to, what you call, handouts or materials that are reviewed by BCT members as applied to all other documents that are considered in the restoration process. Therefore, the language in the Charter frankly was pretty enlightening for you and the other members who worked hard on developing the Charter, and I -- I'll read that, again, to you. Oops, there's a whole paragraph, and I'll just read the relevant part of the paragraph.

The first part has to do with reports that

are submitted to regulators. The second part

says, one copy of each other draft final

some that are there for the purpose of discussion among the members, that are working documents, predecisional, that are there to spur discussion among the members of the BCT. Those handouts are not of the type that would be characterized as draft final and, therefore, will not be made available. MR. RICE: I - I think that's too bad. First, we ask to attend the meetings, then

the answer that we were given why we wouldn't be allowed is because we would interfere with the thought process of members, and now, we said. well, if we just ask for the materials that are handed out there's really no way that we could be interfering with the thought process of the members, but now you are not distributing the -the materials that are handed out as we requested. We are being cut out of a very important process. I think, that's too bad. BGEN MURDOCK. Yes, ma'am?

MRS. HUERTA: Can I make a comment? Under Tab 3, Item 7, when it was asked about other BCT meetings across the nation and -- and if they allowed community co-Chairs -- And, apparently, some do and some don't.

Is there a possibility our community co-Chair, maybe, could come -- that he could be invited to observe those meetings? Could you ask the BCT if that would be possible?

MR. BANNER: What this says is not that some do and some don't. Is says that, what they found was that at two bases there were invitations to the co-Chair to attend. At one base, the co-Chair turned down, and at the other base, I guess, the co-Chair attends.

So out of all of the BRAC bases across the country, they found one case where there's a co-Chair -- a community co-Chair attending BCT.

MS. POWER: Dr. Lene, General Murdock, Ms. Huerta: This exact same question was posed at a previous RAB meeting. And the information was reviewed by the BCT, and on the January 19, 1999 meeting, the BCT, as a whole, gave our answer, in that — your question, "May a member of the RAB attend a BCT meeting?" As a whole, we decided that it would not be a productive thing for the BCT.

MRS. HUERTA: I guess, my problem with that is, it gives the perception that there's secrecy going on. I -- mean, that's -- that's

Page 22 the problem.

MR. RICE: Your perception is correct.

MRS. HUERTA: And -- And a lot of what
we do is about public perception. And, maybe,
that person doesn't have to participate but,
maybe, just observe and the secrecy, maybe,
wouldn't be there. I --

BGEN MURDOCK: Well, I guess, I -- I go back to, not trying to defend one way or the other, what Mr. Roberson said back in the January meeting that, I think, all -- many corporations and many bodies have to have an executive board or some entity in which they feel comfortable in meeting in closed-door sessions to discuss various issues.

My perception, and correct me if I'm wrong, is that that's the case with the BCT folks, and as long as the RAB is presented materials that they present to the regulators, they feel that you are getting all the material that the regulators are receiving and, therefore, obviously, in the decision loop for any regulatory decision that may be made.

MRS. HUERTA: My difficulty with that is, all the members are really pretty much public

entities, you know, taxpayer funded. I mean, that's just my problem with the perception and it's --

MS. PEACE: I -- I agree. I have to agree with that.

MR. HAGELTHORN: I'd like to add something. After sitting in on at least a half dozen different BCTs at 7 different bases across the nation, you ought to be real happy you're not sitting in on one of these meetings. They are by far the most, long, drawn, boring meetings of every information that the average human being wouldn't understand and doesn't want to understand. So be grateful that you're not in it.

MR. QUINTANILLA: General, concerning corporations: Those are private, and this is public, and we should have open-door meetings here.

Now, also, concerning Ms. Huerta's question about if we could provide answers: I think, you only went to McClelland and one other Air Force Base. If you check with the Center for Public Environmental Oversight in San Francisco in the archicology (sic) they have representatives in --

Page 24

in the -- in the Navy and the Army bases in there from the RAB. And I think that Mr. McCullough should check with the -- with the Center for Public Environmental Oversight and the people -- these people that are attending the Navy BCTs, and the Army BCTs, as well as the Air Force BCTs.

BGEN MURDOCK: What's the applicability? I mean, we're talking about an Air Force base here.

MR. QUINTANILLA: Well, you're talking about DOD.

BGEN. MURDOCK: No. I'm not talking DOD.

MR. QUINTANILLA: Your regulation, your guidance talks about DOD from Ms. Goodman. It says, "government employees only."

MRS. HUERTA: I think, they're talking about DOD. I -- I think, that they -- and I -- I'm talking about TNRCC, I'm talking about perceptions, public perceptions.

Can we ask that it be revisited from the point of public perception; maybe, not as a participant but an observer; and even if that person chose not to come, at least you're not saying you shouldn't be there?

Ore Ecology

MRS. HUERTA: Well, I mean, just from the perspective of the public perceptions.

BGEN MURDOCK: Sure.

MR. QUINTANILLA: One more point, General, --

MR. BANNER: Excuse me. The BCT has taken an awful lot of time considering that. We addressed it at the last RAB. We gave our response. The issue was closed. And this RAB seems to be very inefficient in that it keeps wanting to -- to reopen several issues and, quite frankly, beat them to death, and -- and waste a lot of time. And as -- as inefficient as the BCT is, as you can see from -- from our list of problems there, it seems this RAB is -- is not quite as efficient as -- as we are at the BCT.

MR. RICE: So -- So I guess if we can take this we can take the BCT; is that what you're saying?

MRS. HUERTA: Well, you know, the problem with that is --

MR. BANNER: No. I don't think that's

Page 26

what I was saying.

MRS. HUERTA: -- you have community -you have community members that are expressing a
concern. And the concern is, that we do
represent the community, and we do represent the
public, and I -- Gordon, I -- I do understand
what you're saying. However, I think, that's the
purpose of why we're here is to give some
community perspective.

MR. BANNER: Right. That's the purpose of the RAB exactly.

MRS. HUERTA: And it needs to be validated.

MR. BANNER: And this is -- And this is the forum for -- for hearing those concerns. That's why the RABs are formed.

MR. QUINTANILLA: Just one more point, General. In your BCT there are no minority members. There's one, a Mr. Carrillo, and I don't think he has attended the last two BCT meetings. I think this is discriminatory.

BGEN. MURDOCK: Well, I will take the concerns of the RAB, especially based on the perception that you all have articulated, to the BCT, and ask them to address it and come back

WHELLY and the #answer 5 to the RABAGE 10 of 56 MR. QUINTANILLA: Thank you very much.

MR. QUINTANILLA: Thank you very much BGEN. MURDOCK: George?

MR. RICE: General, I'd like to propose another action item. And that is, that I -- you explain what type of handouts that you will not be providing the RAB. Let -- Let us know what types of materials they are and the reasons why you do not provide them. I'd like to propose that as an action item for our next RAB meeting.

BGEN MURDOCK: Okay. Any other questions or comments on the action items? So we'll make an action item that I will relate the perceptions of the RAB to the BCT and ask them to readdress that -- a community observer, and then also ask about the documentation issue.

MS. KELLY: General Murdock, if you don't mind, I'd like to risk -- I think, I can give a short snappy answer to George's question, because this already -- this subject, as you know, has been carefully reviewed in our legal office and in a -- and we've contacted other DOD agencies and representatives, and I -- here's a short answer to your question. The documents that will be provided are those that you could

Page 28

obtain under FOIA.

MR. RICE: Thank you. But that -- that doesn't satisfy me. I'd still like a written response. In particular, I'd like to know what types of materials are being withheld, and why they're being withheld, what is the basis for their being withheld. Thank you.

BGEN. MURDOCK: Okay. We -- Yes, Annalisa?

MS. PEACE: I -- I just have a question. Since these are public entities and -- Mary, why -- why is it not subject to the Open Meetings Act in the first place?

MS. KELLY: Because you are not a political subdivision of the state of Texas. That's why.

MS. PEACE: Okay.

MS. KELLY: And the -- the Texas Open Meetings Act applies to political subdivisions: --

MS. PEACE: Right.

MS. KELLY: City, counties, and their subsets. For example, the GKDC Board of Directors must meet in open session because it is a subsidiary of the City. This RAB, however, is

Now, that you raised the issue: The Texas Public Information Act, as well as FOIA, the Federal Freedom of Information Act, the kinds of documentation that all of you are very, very interested in and are inquiring -- And I -- I know the inquiry is -- is honest, and it comes from a desire to learn more and have more information. But let me say, that if the entity that meets as a BCT were a state agency, it could conduct those meetings, those kinds of discussions, without public participation,

not

MR. QUINTANILLA: Just one more question. How does Title 6 apply to this? Since the BCT is making decisions that affect the community outside of Kelly Air Force Base, I think it applies. Check it out.

without being open to the public. That is not

the kind of meeting that would be subject to --

to an Open Meetings requirement.

MS. KELLY: I -- I certainly will. I currently do not think it does, but we will look.

MR. RICE: Okay. May I just add one comment? And the reason I and others, I suppose, are so interested in the BCT meetings is because,

trying to get rid of me, but four months -- four months and I'm done

PROF. LENE: Do I hear any further corrections?

MR. JACOBI: I move we accept the minutes as corrected.

MR. QUINTANILLA: Second.

PROF. LENE: There's been a move to second it. I guess, a hand vote will do. All in favor of accepting the minutes as -- as corrected raise your hand, please.

(Show of Hands.)

PROF. LENE: Any opposed? Sam, you oppose? For or --

MRS. JOHNSON: No. For.

MR. MURRAH: For.

MR. JACOBI: Let the record show the vote was unanimous.

PROF. LENE: At this time, we will open the floor for community statements. If any member of the community would like to make a statement, would you please step up to any microphone and make your statement. And please hold your comments to four minutes, if you can, please, so we can get as many people as

Page 30

I believe, that this is where the real decisions are made. You know, this is -- this is where the action is, and we're not permitted to participate in those decisions. That's -- That's the problem, as I see it.

BGEN. MURDOCK: Okay. Noted. We'll move on. Okay.

PROF. LENE: In Section 2, you have a copy of the minutes. I hope you've had time to -- I'm used to talking to a classroom without

In Section 2, you have a copy of the minutes, and I hope you've had time to go through those. And do we -- are any moves -- motions to amend the minutes?

MR. JACOBI: I - I believe,

Mr. Hagelthorn was here at the last meeting and I don't see his name listed as being in attendance.

MR. QUINTANILLA: Also.

Mr. Hagelthorn's, a good friend of mine, name is not on there.

BGEN. MURDOCK: That's what he just said.

> MR. QUINTANILLA: And he was here. MR. HAGELTHORN: I know you guys are

possible.

Okay. It looks like that no one is ready to make a statement, at this time, so we'll move on to the next item.

BGEN. MURDOCK: Originally, Mr. Walters was going to make a presentation concerning our Public Involvement Program and an update of it. Unfortunately, he was ill today and could not join us. I believe, you all have received the handouts, but I'd like to ask Major Tom Devenoge to briefly be able to answer any comments or questions that you have might have on the handouts, and Tom wanted to emphasize a few items, but I'll let him do that.

MJR. DEVENOGE: Thank you, sir. I'll -- I'm winging this up here, but I'll just go ahead and walk you through Dick's presentation he was planning on talking to you about tonight. And just looking through, it seems largely what he was trying to stress here is, I think, some of the success stories that we have that may or may not have gotten all the press deserved.

The first one, if you'll look at the first page see the horizontal well demonstration, I think, we've talked about in the past. I know

dissolving into the groundwater and moving off

the site. So that -- that's basically what we're

trying to do with the slurry wall. And, also,

we've talked about the TRS --

MRS. HUERTA: Well, where is that --MR. DEVENOGE: No. No. It's not in your book. I think, it's a separate handout; is it not? Right. Everybody's got a copy?

The horizontal well demonstration. This is the construction project going on over at east Kelly right now and it's the perimeter containment system, we talked about a little bit about at TRS, and had the news media out, K-SAT's been out, KTSA. And the incentive here was to try to get something in place a bit quicker with a lot less money for, essentially, the same fact questions. Yes, sir?

MR. QUINTANILLA: I want to congratulate with y'all on this. It's also -it's less (inaudible) moving onto our neighborhoods and that sort of thing.

MJR. DEVENOGE: That's correct. That's a good point, I think. The -- The horizontal well technology is a lot less intrusive than are some of the conventional vertical wells. And I'm not sure how many of you are familiar with the horizontal wells. Basically, very long, not too elaborate but it's a long, think of a snake,

again, we've had the news media come out and try to cover this one, and we've gotten some press releases out on this one too. This is a success story. As you may recall, we really found this, I think, within the -- no more than two years ago. We came across this -- this big -- this boom down there. So that -- that in itself is a success story. These types of contaminants are often difficult to find in the pure phase -easier to find the dissolve phase problem, see the groundwater flows everywhere, but it's difficult to find the source of it sometimes. So that would be a success story for it. Yes, sir? MR. QUINTANILLA: How much has the

MJR. DEVENOGE: Well, as you know, we've talked about, you know, in the past, as we mentioned in the mail outs to, I think, the 80,000 homes. If you look at the plume map and the plume map I used at Congressman Rodriguez's

community been contaminated by this -- by

Site MP?

serpentine going down into the gravel channels down on top of the Navarro. And the idea is to try to capture the contaminated groundwater prior to it being able to move off base and into the groundwater. Really, our --MR. MURRAH: Is it performing okay?

MJR. DEVENOGE: Sir? MR. MURRAH: Is it performing okay?

MJR. DEVENOGE: It's not up and running yet, Sam. We're getting there.

MR. MURRAH: Oh, okay.

MJR. DEVENOGE: We're still testing

it. We can do a pilot test right now.

The next one has gotten a fair amount of press recently and last year. This was the Site MP (MP stands for Metal Plating Shop). This is the site on the east side in Zone 3. East side of the installation. We have a very large D-apple source here, the density non (inaudible) liquid or the simple word PCE, Perchloroethylene, the degreaser, that was used at the site and seeped down into the shallow groundwater. The idea with the slurry wall project is to go in and basically box off the contamination and try to prevent the groundwater that's moving through the meeting you can see how much -- how far the contamination has gone. It's a very large (inaudible) aqueous phase in the -- in the water plume. It's a very large area, and it's going to be a tough nut to crack.

MR. QUINTANILLA: And when would you plan to clean up this contamination in the community?

MJR. DEVENOGE: The -- If you look at the east side plumes -- there's -- there's two distinct plumes that are coming off there, at least two distinct plumes that we see coming off there. The plume coming off Site S-4 which is south of the MP Site plume, we talked about that coming out this summer. That was going to be the CMS, or Corrective Measures Study, the addendum to that, that's -- that's shaping up, and it looks like we're on schedule. The plans for that are going to be out this summer.

The Zone 4 is going to be further on down the road. And I don't recall exactly -- I'm wanting to say, probably, 2001, 2002 time frame.

Let me step back and talk about the interim system here. The interim system that we're putting in there, those horizontal wells, it's

Page 36

interim, it's not the final. The intention is that it's going to eventually be the final, but rather than waiting around until we study all the alternatives to that, in some cases, and going through the remedial design process, we think we know enough at this point in the program that we can reach out and touch this technology and bring it the bear at the site. And so that's kind of the whole incentive behind the interim remedial action and -- and the EPA's presumptive response strategy. So does that answer your question?

)

MR. QUINTANILLA: One more. Site S-8. MJR. DEVENOGE: Yes.

MR. QUINTANILLA: When do you plan to have a plan for that?

MJR. DEVENOGE: I think the soils closure plan is --

AUDIENCE MEMBER: (Inaudible.)

MJR. DEVENOGE: Yeah. I think that one went to the TRS, the -- the plan for that, if not this month, then -- I can't remember the doctrinal date on that, when we brought that one, but --

> AUDIENCE MEMBER: No. no. AUDIENCE MEMBER: No. The groundwater

Page 38 one went out a long time ago in December (inaudible) the comment period 60-day comment period.

MRS. HUERTA: Sir, I have a question. It may be the wrong time.

MJR. DEVENOGE: Yes, ma'am.

MRS. HUERTA: On the slurry walls, the Kelly Facts sheet that's in the back of the book.

MJR. DEVENOGE: Yes.

MRS. HUERTA: In the -- the third paragraph, the first statement, it sounds really funny.

MJR. DEVENOGE: Okay. Can you read it to me. I can't remember that one.

MRS. HUERTA: You know the one I'm talking about? I probably can't even read it right. It says underground slurry walls are barriers that stop contaminated groundwater from passing through by so-many four decides one percent to so many decibels one percent. That decibels doesn't look much -- like much. Does it keep everything from going through except for that, or is that just a minimal amount that makes it --

MJR. DEVENOGE: That's right. There's -- There's virtually nothing that will go through there. That's the intention. MRS. HUERTA: Okay. I -- I don't think that's what that statement says to lay people.

I -- If you can read -- is it that maybe.

MJR. DEVENOGE: Sure. How about if we strike "by the percent"?

AUDIENCE MEMBER: As much as that percent.

MRS. HUERTA: Or -- Or just say it stops everything except for, maybe, this percentage gets through. I mean, it just mathematically looked really funny.

MJR. DEVENOGE: Uh-huh. Yeah. The idea we're trying to convey there, though, is there's not a whole lot that makes it through the slurry wall if everything goes into the ground as planned.

MRS. HUERTA: Exactly. And I don't think that statement helps that at all.

MJR. DEVENOGE: Okay.

MRS. HUERTA: Because it doesn't look like much of a percentage difference. If that's all you're stopping, that's a real expensive way to do it.

MJR. DEVENOGE: Oh, no, no, no. It's a

Page 40

percentage.

MRS. HUERTA: Yeah.

3 MJR. DEVENOGE: It's a range.

MRS. HUERTA: It doesn't say that,

MJR. DEVENOGE: That's a range that

we're trying to convey.

MRS. HUERTA: Okay.

MR. HAGELTHORN: Tom, if you use the

opposite, use 99.999 percent, --

MJR. DEVENOGE: Right. Yeah.

MR. HAGELTHORN: -- then --

MRS. HUERTA: Yeah.

MR. HAGELTHORN: - you know, it says

you stop -- This is saying you only catch one --

MJR. DEVENOGE: Yeah. Right.

MRS. HUERTA: That's exactly what I --Let me look at who said that. That's exactly right. That's exactly what I wanted to say.

MJR. DEVENOGE: Okay. I know exactly what you mean.

MRS. HUERTA: Is it correctable? I mean, changeable in -- in --

MR. HAGELTHORN: Yeah. They'll just get a pen out and they go through to change them all.

MRS. HUERTA: No, no. I mean, for the public's perception.

MJR. DEVENOGE: Right. I don't know how -- how far along you've been in some of this, of course, everything is all editable.

MRS. HUERTA: Thank you.

MJR. DEVENOGE: So let me go ahcad and move on from Site MP slurry wall. Let's talk about the environmental web site. I don't know how many of you have had a chance to actually look at the site yet. I tried to get the word out in, I think, the TRS minutes and, I think, I advertised the Web site. We did have some feedback. And if you haven't not had an opportunity, I would encourage you to go out there and look at it. It was, of course an initiative that really came around through the TRS. We had some community interest in -through the TRS that was expressed in developing a site type of thing. And so it's been a long arduous process, of course. A lot of -- A lot of time and effort has gone into it. There's a lot of time and effort that will go into trying to maintain it. So please take the opportunity to go and look at it and spread the word.

Page 42

MR. HAGELTHORN: What's the U-R-L, Tom?

MJR. DEVENOGE: I don't know off the top of my head. But I do know that George has a link to it at his Web site. I think, what we can do is we can put it in the minutes. We'll advertise it in the minutes, again. And if you want the E-Mail address, again.

AUDIENCE MEMBER: (Inaudible.)

MJR. DEVENOGE: No. That's not it.

MR. RICE: Tom?

MJR. DEVENOGE: Yes, sir.

MR. RICE: I want to compliment you on the site. It's very well done. But I don't think it's complete yet.

MJR. DEVENOGE: No, it's not.

MR. RICE: Do you have a date when you think it might be finished?

MJR. DEVENOGE: We should have the next -- next one up at -- I think by the end of May. It's going to look virtually the same, but there's a lot of the problems in there that ... didn't get corrected the first time, and there's some editing that has to be done. And we're trying to get some presentations loaded right

now. So anymore questions? Okay. So again if you haven't had a chance to look at the Web site, please -- please take the opportunity.

Also, of course, we produced the IRP videotape which is, I think, around 11 minutes -11 minutes. It's sitting back on the table back here. If you have an opportunity at the break take a look at that. It's, basically, a short run down of the clean-up program. We're going to be mailing that out to about 200 people. It's going to elected officials.

BGEN. MURDOCK: Tom, there's a question.

MJR. DEVENOGE: Yes, sir.

MS. PEACE: I was just wondering what channel it's been running on.

MJR. DEVENOGE: Yeah. I -- I don't -- AUDIENCE MEMBER: Public access.

23 MJR. DEVENOGE: Public assess channel.

Would that be cable?

AUDIENCE MEMBER: Paragon.

Page 44

MJR. DEVENOGE: Paragon. I don't have cable.

BGEN. MURDOCK: We'll -- We'll find out what it is and we'll get it.

MIR. DEVENOGE: I don't get it on my rabbit ears. Okay. The next one is the Site S-1. Those of you that may not be familiar with it, the Site S-1 is the site on the northern part of the base adjacent to the (inaudible) tank. And, of course, we're going to be doing some removal action here next month, excavating some of the contaminated material there, hopefully all of the contaminated material.

We are going to be having a neighborhood meeting or a public meeting. And this is a voluntary one that we're doing. We want to take the opportunity to go out and explain to people what it is exactly that the contractors are going to be doing in terms of them trying to clean up the site.

That's going to be on the 11th of May, and we will have newspaper and other various ways of getting the word out to the public. It's going to be the same day as the BCT and the same day as the TRS. So what I'm trying to do -- We didn't

Page 45 initially plan it that way, that's just how it happened. So what we're going to do is start the S-1 public meeting at around 4:00 p.m., let it run to 7:00 so all TRS members have a chance to go. It's going to be at Winston Elementary. And then starting at 7:00 we're going to go ahead and do the TRS.

.3

ŀ

;

MR. QUINTANILLA: Will you be able to answer where the dirt that's excavated from this one will be moved to and that sort of thing?

MJR. DEVENOGE: Yes, sir. The contractor will be there, that's going to do the work. Right now we're just trying to get some precharacterization out at the site, you know, and talk to all of those issues.

MR. QUINTANILLA: One more thing.

During the excavation will the people be wearing contamination clothing and -- and masks?

MIR. DEVENOGE: I think the answer is yes, it's a hazardous waste site. I think it's required by federal law that they have to wear that --

MR. QUINTANILLA: If that's the case, how do you plan to inform the community?

MJR. DEVENOGE: About? The community?

Page 46 MR. QUINTANILLA: Because we're right

across the street from that,

MJR. DEVENOGE: At the -- At the public meeting on 11 May. That's why we're doing a public meeting.

MRS. HUERTA: Sir, if I could offer a suggestion.

MJR. DEVENOGE: Yes.

MRS. HUERTA: I think, what was explained to me is that the people that work those sites are exposed quite closely, and often, and frequently throughout their career, and that's why they have to wear the protective gear. However, a one-time exposure — you know, I just think some of that needs to be said.

MJR. DEVENOGE: Right. There is -that's a good point. There's -- There's a lot of mystique that surrounds those sites.

MRS. HUERTA: Right.

MJR. DEVENOGE: And so the -- The chemicals we find at these sites are the same chemicals that were in the shops that the workers were using for years and years and years. And it's just that when you put them in at a site, they're underground and buried they take on this

mystique, and -- and so we need to try to de-mystify that as much as we can. And -- And I hope we can do that. We have an opportunity to do that in the 11 May meeting.

MRS HUERTA: Can we do a fact sheet about why people wear that gear, the workers that are close up and handle that through their career?

BGEN MURDOCK: I think, maybe, a better way of doing that is as opposed to addressing why they have to wear it, we'll articulate what the potential, if there is any potential, for harm to the public.

MS. PEACE: I think, Tanya's point is better.

MR. HAGELTHORN: I think, the other way is better.

MRS. HUERTA: It explains why people have to wear that over the length of a career.

BGEN. MURDOCK: Sure. Okay.

MJR. DEVENOGE: I - I think, we could ask the contractor to go into some of that at the -- at the meeting.

BGEN. MURDOCK: I just thought they'd be more interested in the public health and

Page 48

the --

MRS. HUERTA: Well, we are. We are. And we haven't got there yet.

MR. HAGELTHORN: It eliminates the fear of not saying. If you eliminate the fear you don't have the negatives.

MRS. HUERTA: And maybe, that can go on the Web site, too, you know, because people are concerned about that. I'm sorry. Go ahead.

MJR. DEVENOGE: Okay. And the last one I'll pick out of here was the RAB site tours, and that is going to be on the 6th and 8th of May. And if you haven't had an opportunity to sign up, please do so in the back of the room tonight, there's a sign-up sheet. Hopefully, one of those two days will accommodate your schedule.

So there's a lot of activity going on right now and this would be a good time to go and see some of it. No more questions?

BGEN MURDOCK: If I can, I'd just like to re-emphasize, a lot of folks have gone to a lot of time and effort and planning in order to provide you all the opportunity to visit those sites. So, hopefully, either the Thursday or Saturday agenda will fit your schedule, and I

ì

just encourage you to the maximum extent that your calendars permit to come on out and we'd be glad to show you exactly what it is that we've been doing out at Kelly.

MR. HAGELTHORN: Is it true, you're buying lunch Larry.

MR. BAILEY: Dinner.

BGEN MURDOCK: I'd like to move now to the fourth item. As most of you know, we were asked at the last meeting to add the clean-up program priorities as a topic for today's agenda.

As we look at this topic, I'd like to say that the timetable for the closure and the realignment means all of our sites need priority attention. And we've been very successful in getting the funds that we need to move forward in all those various Zones that -- that need the work. We've got lot of sites and we're trying to move steadily towards remediating those.

We've developed a -- a list of the Air Force's priorities. And the foremost, quite frankly, is the protection of human health. We've got a handout that I'd like to handout that lists these priorities. Unfortunately, I'm not

Page 50

sure who has the handout to pass out. And I'm getting a lot of blank stares, actually. Well, apparently, the handout is not available right at the moment. We will try and get copies. But Tom can you show the -- the bottom of the -- the handout to -- Do you have that where it shows supplemental factors and suggestions?

MJR. DEVENOGE: Oh, no, sir.

BGEN. MURDOCK: Let me explain the -What I'd like to do is have Major Devenoge
discuss the list as -- as it is, and possibly

provide an example or two.

And then you'll see that there may be various items that are not on here that you, a RAB member, think are important. And so after Tom goes through this list of priorities I'd like to go around the table and ask you for your inputs. And we'll also get a copy of this list, at the bottom of which has an area for supplemental information that you can write in your suggestions, if, in fact, you do have suggestions that you would like to place in writing.

So Tom, if you'd just go through and give us a for instance of each of those, and then I'd

like to begin with Dr. Lene and go around the fact table and solicit your inputs if you have any inputs to this list.

MJR. DEVENOGE: Yes, sir. And again I apologize we didn't get the handout. As you know, we had Ten come down sick today, so I think we have a slight miscommunication, but let me go ahead and press on.

The task for us was to identify to you, the RAB, what are the Kelly Air Force Base top environmental restoration priorities. So we put our heads together and tried to do that. And basically, these are the five. They're not listed in any particular order. None is anymore important than the other. They're all equally important. And what I'd like to do, as General Murdock said, is go through and elaborate on some of them for you and provide specific examples of each one, more than anything else.

So the first one "Protection." What we're talking about is protection of human health and environment on and off base. And how we've historically done that, and how we're going to continue to do that is by the use of interim remedial actions to prevent contamination from

Page 52

moving off the installation. And also targeting of the source areas. And I think I hit on quite a bit of this already in -- in going over the community outreach and public involvement activities, but let me talk about it a bit more.

The Interim Action: As you know, to date we have 12 that have been put in place. These are -- Where you'll find these, if you'll look at your Zone maps, where you'll find these interim remedial actions that -- and they're really all the same types of technology, for the most part, they're groundwater pump and treat systems, you'll find them on the perimeter of the installation. And the intention -- the intention of putting those systems in was to try to cut off the contaminated groundwater, the shallow contaminated groundwater, from moving any further off -- off base. So most of those systems were put in in the early 1990s. And, again, they're interim remedial actions, they're not final. The intention is -- and I'll -- I think I'm getting to Part 2 here is that -- The intention is that these things will ultimately be part of the final clean-up action. Ideally, that would be what you want given the time and effort and the money and

Page 54

l

Page 53

the cost that's gone into putting those systems. So the other part of that in the source areas -- we talked about the MP slurry wall, that's a source area, Site S-1, that's a source area. In fact, those are probably two of our biggest priority sites on the installation right now.

Let me move on to Number 2, Clean Up: Again, the -- the idea here was that the interim actions are going to become part of the final clean-up decision when the time comes for that.

And, of course, we're always looking at -we're trying stay on the horizon and always try
to identify new and more promising technologies,
but that's, to be quite honest with you, the
picture is not as rosy as I think you would like
or hope. There are not a lot of wonder
technologies that come screaming at our door.

Facilitate Redevelopment: Basically, what we're talking about here is, if I could give you an example, try to give you a couple of examples, is -- as you know over on east Kelly now we have a business that just moved in called Rental Car America, and that's a real success story. We had -- To make way for them we had to expedite the clean up in one of the sites, Site S-7. And

we worked with the regulatory agency to make that happen, to make that a reality. And so that's one of the success stories.

Also, I want to talk a little bit about the hot transfer of the schmooze. And by hot transfer means, the Air Force is using a solid waste management unit in a shop one day and theoretically the next -- after the weekend, the contractor comes in, and the contractor -- one's PBA Lockheed-Martin -- could be using the very same solid waste management units. There's a lot of time and effort that goes into making things like that happen, to increase that process, if you will, and meet all the very rigorous regulatory requirements. So a lot of coordination has to take place both between ourselves, the regulatory agents, GKDC, and the -- the Lockheed-Martin Tinker team.

And the third thing I want to hit on there is this issue of water reuse. We've had a lot of community interest in trying to really get plans to try to reuse ground -- the shallow groundwater as much as possible after we've taken it out of the ground and cleaned it up. And I just want to pass on that we've talked about this before, but

we -- we've had those conversations with GKDC, and really that's -- that's a carrot that's out there for these statutory organizations that come in. They have this resource that is available to them. At the TRS we have SAWS come in and talk about their water reuse plans. So that -- that's something that's very much an incentive for us and, I think, again, is another example of things that we're trying to do to facilitate the

redevelopment of the property.

The last two I'll --I'll talk about are

Community Involvement and -- and Outreach: And
just to speak to some examples. You have before
you tonight a TRS mission statement. That was an
initiative that we put together through the TRS
to try to focus on our efforts and where we're
going. Dr. Lene's been doing an absolutely
fantastic job, in my opinion, on the TRS in
trying to focus that group and really getting
some good sound advice, I think, back to the Air
Force on the conduct of the clean-up program.

We also have the RAB Charter that was produced through the RAB. As Mary talked about earlier, there was a lot of effort that went into that. We have the TAPP. I think, Kelly was the

Page 56

very first DOD installation, if I'm not mistaken, to be awarded the TAPP grant. In fact, last night I believe some of y'all were at St. Mary's to talk the contractor, who is Clear Water Revival, they're going to be doing a review of what used to be called the base wide remedial assessment. So that's a big success story, also.

Through the TRS we -- we actually have had, I think, some -- some comments that have come to us. And namely George Rice has been doing a great job getting us comments. And the one that comes to mind is the Site S-1 comments. George had some comments that he put together after reviewing the Site S-1. So we've taken those comments and we're giving them to the contractor, and contractors will implement those into their plan. So -- And that -- that's really type of advice that we're looking for, really, ultimately, I think, from both the TRS and the RAB. And, again, the water reuse issue. That whole water reuse issue was first raised at the TRS.

In terms of outreach we're trying to do some different things. Maybe, work some things a bit <sup>\*</sup> Page 57

differently. Most recently, the one that comes 1 to mind, is, of course, there's a Web page, but 2 3 there's also -- General Murdock and myself went down and we met with Tino Duran, who's the publisher of La Prensa South Side paper, and we really had a great meeting with him and, 6 basically, committed to him that we're going to 7 try to get something to him on a monthly basis to 8 get to perhaps the entire population that we 9 wouldn't have an opportunity to speak to 10 otherwise. Of course, we're doing the RAB tours. 11 We're going to have the S-1 public meeting. If 12 you notice in the back of the room, we have the 13 posters, we're doing poster sessions now, before 14 all the RABs. This is an opportunity for us to 15

try to explain to some of the RAB members what some of the technologies are that we're using out at the installation. And then, of course, we are doing -- we are making available the BCT minutes

22

19 and the BCT handouts. That was a request that 20 did come through the RAB and the TRS, and we are 21 making those available. And, of course, we have 22 23 the Fact sheets that Tanya asked about earlier.

So that is just the real -- real quick and dirty on those, and I don't -- if you have any

Page 58

questions I'd be glad to try and answer them.

BGEN, MURDOCK: Before we entertain some questions, what I -- I'd like to do is, as I said, go around the table and -- so that each of you can comment on this list, if you so desire, or -- or make suggestions.

And then I think after we've made suggestions or comments, I'd like to ask Dr. Lene, the community co-Chair, to collect your inputs. And then maybe over the next couple of weeks he can prepare them, so that your comments and these priorities can then, presumably, be the communities' list of priorities. I think, that's the role of -- one of the roles, at least, of the RAB. And by doing that, I think we essentially fulfill the intent of the RAB Charter. And I guarantee you that, then, we will take those -that community list to our staff at Kelly Air Force Base to the regulators for the appropriate consideration when it comes to dealing with these issues. I realize that this is hitting some of you cold and if you would prefer to defer any oral comment tonight, what I will do is make sure that each of you get a copy of -- that we will

KELLY AR # 3335 10 Page 18 of priorities to each of you with a Page 18 self-addressed envelope to Dr. Lene, and you can write your comments on those, if you desire not to -- to mention or comment here this evening, so that, at least, you would have an opportunity to provide written comment so that we can include them in the community comments.

With that, let me just go around the table and see if folks have comments.

MR. OUINTANILLA: Can we have the lights, sir?

PROF. LENE: Okay. At this time I don't have any comment, so I'll go on and pass it to Pat.

MR. McCULLOUGH: I don't have any comments either.

MR. JACOBI: Well, I -- I'm from the Health Department and I like to see Human Health right at the top of list. I do think it's a well-considered list. It's very logical, it makes a lot of sense. I would suggest that the only mention of economics there is -- is economic redevelopment through GKDC's aspects, and I'm certain that there are others at the table that would probably mention potential economic impact

Page 60

on the surrounding properties. And that -- that may be something that might bear mentioning somewhere in the list of priorities.

MR. MIXON: I think under the "Outreach," one of the things that we might want to consider is -- is working to make the ease -the -- the language a little bit more common-sense type language and try to stay away from some of the technical terms and kind of help people grasp. I know I have a hard time following some of these terms that are used routinely.

MR. MURRAH: I believe I'll wait to -to get it in writing.

BGEN. MURDOCK: Sure.

MR. MURRAH: So I can think about it. MRS. JOHNSON: Well, I'm happy that you have the last paragraph there. Because I would like to be able to ask either the contractor or the Air Force every question that I saw fit to ask. Because the last time when they were erecting that fuel tank, and we had paint sprayed on our houses, we would come to the Air Force and they would say go to the contractor, and I wish you'd clear this up this time if they're going be

mail out tomorrow morning a copy of these

working out on that site.

2:2

!3

!4

:5

)

ı

?

MR. BANNER: They seem fairly comprehensive. I think, they're fine.

GEN. ROBERSON: I think that's a good -- a really good first start. Those -- Those broad five areas, I think, thoroughly are the -- probably the right five priorities. I think it's a good idea that we'll take -- to take the RAB inputs and then to bring it back to the RAB as a -- as a document that we can adopt as our priorities, which would be, I think, good.

I would make one specific recommendation in the clean-up area. I think, maybe, it ought to be expanded a little bit to clarify that we are, in fact, talking about not only on base but off base contamination that can be directly traced to Kelly. Because I think that's an issue for a lot of people in the community and to, you know, maybe -- Well, I -- you know, I think that would do it. I think some language to that effect would be -- would be very helpful. But I think it's a good -- it's a good start.

BGEN. MURDOCK: Laura?

list.

MS. STANKOSKY: EPA concurs with the

priority list.

Page 61

that -- that -- of what the plan says.

For instance, regarding the RAB, it says, on Page 23, "to provide advice and priorities among sites." This is what we're supposed to do. Also concerning sites, on Page 13, it says, "The purpose of the relative risk site evaluation is to provide the basis for prioritizing when coupled with other factors." In other words, we should prioritize the sites. And that's what I had in mind because I was going by this book.

And I'll have all of these comments to you in -- in writing, and -- and I'll provide them to you tonight.

BGEN. MURDOCK: Okay. Good. Thank you.

MR. QUINTANILLA: And the -- the prioritization should be by high risk, medium risk, or low risk. And I think all of our sites are low risk because they involve petroleum -- petroleum products. I don't think we have a high risk site in the whole thing, because if you did you would -- you would have wiped out or be wiping out a habitat for animals, and you're not doing that.

BGEN. MURDOCK: Okay.

Page 62

BGEN. MURDOCK: Allan?

MR. HAGELTHORN: I have to concur with General Roberson's comments in the beginning. It's a very good first stab at it. I think it's a long way from being something that we would want to put our names to. I think that the Community Relations Program has probably been the weakest link in the entire clean-up process. That's been my point since the entire time I've been on this Board. I don't see -- I see some improvements in it. I still haven't yet -- I haven't seen a community relations plan, so I really don't know what direction we're supposed to be going yet. So that would be one of the first things that I would like to see. It -- It's got a long way to go.

I've got a list of notes and I'd be more than happy to provide my input in writing, but it's a long way off.

MR. QUINTANILLA: General, I agree that this is a very good start. But this is not what I had in mind. What I had in mind was prior --priorities by sites as outlined in the Guidance Plan by Ms. Goodman that was released in 1998. And I can read to you some of the things that I

Page 64

MR. HAGELTHORN: Could I address something on Armando's comments? I agree with Armando that we need to expand that quite a bit. But one thing I'd like to add to his comments is that I -- I believe, as a Board and -- and as the government's direction we should follow and should develop that, but this should be the subset of that which gives us our guidance to implement that.

GEN. ROBERSON: In fact, I was going to say the same thing. I think Armando's got a good point. But I don't think that's the case in what we have up here. I think that what we've got up here is kind of a broad program goals — But Armando's got a good point. There probably ought to be some priorities too within specific sites there.

BGEN. MURDOCK: Okay. Good. Thank you, Armando. And I -- And I would appreciate your comments.

MR. WEINSTEIN: The only thing I would add is, maybe, somewhere some phrase that talks about education and about how you're educating the RAB members.

BGEN. MURDOCK: Okay. Sam?

MR. SANCHEZ: I think it's a -- it's a good list of priorities. But, again, to -- to piggyback and what has already been said, it's a -- it can be used as a guidance. It certainly does not -- it's not so minute that you can look at, you know, specific projects, but you can easily identify -- just from that site and those lists already identify sites that would immediately go to the top in terms of priorities. An example of this would be some sites where contamination has moved off base, you know, where there's a -- people actually living near those sites or on top of those sites. So because of -- Because protection of the human health and the environment is at the very top, I'm particularly pleased with that. Thank you.

MR. RICE: Yeah. I have a few comments. First regarding interim actions. I really like the fact that you all have been doing interim actions over the years, and I hope you continue to do them, because I think the quicker you can get the clean up, the better off we are. The only reservation I have about them is, where they are. They're all on base, and I would like to see them out in the neighborhoods as well.

Page 66

And that leads me to my second point.

From -- From my personal point of view, I think that the highest priority should be cleaning up the -- the affected neighborhoods. You know, the folks that are coming here on base, the -- the Boeings, and the Rental Car Americas, and all that, they can pretty much take care of themselves. But the people out in the neighborhoods are -- are at your mercy almost, you know.

Then I'd like to learn a little bit more about the policy dispute between the Air Force and GKDC that's made the news lately. If we could have a — If someone could explain to the community what the dispute is, that's going on, that might help us all understand this process better.

And then, finally, with regard to "Outreach," I understand that your -- your policy regarding environmental documents that haven't been put in the library has changed, and that you will now allow RAB members to go on base to view those documents and we won't be required to file a Freedom of Information request in order to see those. And, I guess, I'd like to take

KELLY AR # 3335.10 Page 20 of 56 this opportunity to ask you if that's correct?

BGEN. MURDOCK: I'll have to get back with you on that, George, and -- and talk to the environmental folks and to our legal folks on -- I'll get you an answer on that.

MR. RICE: Okay. Thank you.

MR. SOLIS: On Item 2 regarding "Clean Up." At what point can we start talking target dates for completion Zone by Zone?

MJR. DEVENOGE: Could I speak to that one real quick, sir?

BGEN. MURDOCK: Sure.

MIR. DEVENOGE: Actually, we have that, sir. We have actually clean-up sites scheduled for all the sites on a site-by-site basis.

You're obviously not going to see it in here.

But we've brought some of the schedules to the TRS, something we've developed this year, it's basically a Gant chart -- you're familiar with those, you look at the -- you look at each one of the individual sites and see all of the associated activities that have to occur to get that site from, basically, the investigation phase all the way to site close out which is where the site has been cleaned up.

Page 68

MR. SOLIS: Have those been distributed? Have the RAB members received copies of that?

MJR. DEVENOGE: No. We're still pretty much drafting those up. But those are the sort of things that we could get to the RAB.

BGEN MURDOCK: I think that's a valid point, and that's one of the areas that we certainly need to include in that.

MJR. DEVENOGE: We're pretty much on the second draft right now. We've had the first crack at it, there's lots of rework that had to be done, we're going through and massaging it some more. When we get to the point where we think they're pretty solid we can -- we'll probably bring them to the TRS.

MRS. ADAMES: My concern here when you say "Protection." "Protect human health." I'm a human. Where can I start? If you had told us as soon as you knew about the plumes -- not made a big thing about it, but would have let me decide whether I want to stay there, take on the responsibility of living there, putting my health at risk by being there -- Maybe, I speak for some of my community members also. Because you see

Page 69 them out there? Do you see my community out there? No. They all feel the Air Force is a very, very big corporation, whatever you want to call it. Nobody can fight the Air Force. The Air Force has a lot of people interested in the Air Force. Look at you. Who is looking out for the community? I'm at a loss right now. I'm at a loss right now. You talk about protection, protect human health, and yet you deny us the right to know what was going on, deny us the right to protect ourselves right now by coming out and saying, yes, there are plumes under your house, yes, you are at health risk, yes, your health may be affected. And you want to protect my health. Give me more information. Give me something that I can take to my doctor. Not something that, oh, well, nature will take care of itself. I know nature will take care of me. That's to each one of us six feet under. Thank you.

MS. PEACE: I know a -- under Community Involvement a lot of improvement, frankly, during the time that I've been on the RAB has been made in this area. But I'd like to see added -- okay, it says, "Ensure community concerns are

Page 70 considered in the decision-making process," which is good. I'd like to see, "Make a commitment to

address community concerns with appropriate actions" added to that.

And I really do applaud your efforts in getting a regular section, or whatever, or regular feature in La Prensa. But I would also encourage you to work with the two Spanish language local stations to get whatever you want to get out and announced in that venue. Because I think it's a lot -- frankly, going to be a lot more effective than, like, any kind of postcards or anything that are being sent out.

MRS. HUERTA: I have a -- a couple of suggestions regarding Outreach and Community Involvement. I would like to see a chart like an organizational chart of -- of these committees and -- not necessarily the members, but what -what governing regulations they have and how they work with each other. Because the BCT Committee's one, we're one, the TRC Committee is one, the TNRCC, all of us that are representing organizations, I think, sometimes the public does not know who we represent and -- not necessarily who the members are, but just a chart, a one-page

chart, that shows how we all fit together for the benefit of all of us.

I think when Gordon presented at the -- the town meeting with the Congressman he gave some very simple chemistry, including some of the dotted chemicals that come from each one. I would like to see that continued in very simplistic chemistry ideas, including half lives. When I ask a question about what the half life is of a chemical, I'm often told, well, it depends on how much oxygen is there in your surrounding environment. But, yet, when we teach chemistry we're not -- we say this half life given under normal circumstances. I would like to see some of that just general information for the community.

I would also like a way that the EPA could provide for us drinking water standards for each chemical. It's like when I get reports and I --I find a chemical there, I have to go look for what the EPA drinking water standards are and what that risk assessment thing is for human health. If we could just get that in one page for the -- and it doesn't have to pertain to Kelly necessarily, but if the EPA could provide

Page 72

that for us.

I'm also -- The ease of language is important. And I think sometimes when phone calls come into the -- the number on the back of our -- your brochures, I was also told, when I asked for a specific document, that under the Freedom of Information Act I would have to pay so much a page. And that -- that concerns me. When I called and said how do I find this document and -- in the library, I was told I had to file a Freedom of Information request like a year and a half ago. So I -- You know, I -- I sometimes think when people answer the phone they need to be consistent, because I was really looking, how do I locate this in the library. Okay. Thank you.

MR. PUFFER: No comments at this time, sir.

MR. IGLESIAS: No comments at this time, sir.

BGEN. MURDOCK: Well, what I'd like to do then, as I mentioned, is gather up all the inputs that you have articulated around the table, and then also provide you the opportunity to -- to forward us some -- the -- forward the

comments to Dr. Lene, that you may have, that you may want to put in writing at -- at a later time as you think about these priorities. And then come up with, hopefully, he can come up with a consolidated listing that would represent the RAB and community concerns. Sam?

MR. MURRAH: Do you have a fax that these could be fax'd to?

PROF. LENE: It would be better just mail it to me, Sam. I have a fax. I'll give it to you, but what happens is it goes to our mail room, and I probably would get it faster by U.S. Mail.

MR. MURRAH: Okay.

l

BGEN. MURDOCK: What we will do -- you have a copy -- a copy of these and a place for comment, we'll mail another one out to you tomorrow with a self-addressed envelope to Dr. Lene, so you can just stick it in there and he can get it.

MR. HAGELTHORN: Gene, do you have an E-Mail number?

PROF. LENE: Yes, I do. It's glene@alvin.stmarytx -- all one word.

MR. HAGELTHORN: St. Mary what?

Page 74

PROF. LENE: St. Mary Texas, all one word, and dot edu.

BGEN. MURDOCK: Okay. What I'd like to do now if there are no further comments or questions is to break. We're about five minutes ahead of schedule, and I'd like to hold the break to just ten minutes so we can come back at 8:00 o'clock. Because I think there may be some more significant time that we could use with the ATSDR folks and the information that they might provide.

(Short Break Taken.)

BGEN. MURDOCK: Okay. If I could have your attention, please. What I'd like to do now is introduce Dr. Fowler from the ATSDR. And he'll provide an update on the report and hopefully be able to answer questions or comment -- or address comments that the RAB members may have. So with that, Dr. Fowler, if I could ask you to step up, please?

DR. FOWLER: I didn't agree to answer any questions. I just agreed to do an update. I know you're all frustrated about the delay in the health assessment, and I don't blame you. I am too. What I want to do tonight is just give you

an update on where we are right now, a fittle of on what's happened -- I can't tell you very much about that -- then talk about what happens from here on.

We've been meeting with the community in the last couple of weeks and, I think, we've got a good idea of how to proceed from here.

What happened this time with the delay is I changed jobs. And in that interim, from when I left federal facilities, the health assessment kind of sat there while the federal bureaucracy did it's good thing and nothing was accomplished for several months. And they decided the best way to proceed with this would be for the health assessment to come to me in my new job and we would tackle it from a new -- a different position.

Actually, that's probably going to facilitate the movement of the public health through channels. As a matter of fact, the new management has agreed that it would be a good thing to involve the community in the process. They've always been able to review documents, but now they're going to be able to participate in the process of the development of certain

Page 76

things.

Where we are right now is, most of the Public Health Assessment is finished. It still has to be reviewed, and there's some editorial kinds of things, except for past air emissions, and we're having to take a relook at past air emissions because of our air model. And this is what will involve the community with in that process of looking at these past air emissions.

So what we propose to do is -- and I think this is -- that the community is in agreement with this, is that we will go ahead and -- and do the public presentation of the Public Health Assessment, except for the past air emissions, which will be done as soon thereafter as we can, and that would be done as an addendum to the Public Health Assessment.

There are also a couple of other things that are not in the original petition that would be done later: East Kelly, that environmental evaluation of it, and then an on-base drinking water consult. But those would always have been done after the health assessment and added on or done as a consult.

As far as the timing on this, we want to do

Page 77 the public presentation as soon as possible after the health education workshops. And Cheryl Ranger will address that in a minute. We want people to have the health education workshops before we give the public presentation, because we think it will facilitate their understanding of some of the things we're talking about, and they'll be able to orient to our presentation a lot better.

ı

?

I also want to introduce some -- someone to you that's just joined our -- our team as a full-time community involvement specialist, and she hails from the San Antonio area, and that's Maria Karen McGyver. Maria is a full-time community involvement specialist that we decided we need.

The timing of the Public Health Assessment, I keep putting that off, but after the environment -- the health education workshops, which looks like they'll be starting in May, we hope that we can present the Public Health Assessment in late June. It might be in July. We don't know about the timing on all of the health education workshops. There have been planning meetings on that. I hope that sticks.

Page 78 But that's our plan as -- for right now. I -- I really do think with -- under the new management we can facilitate this slow process.

Some of the other things that will occur is the recommendations for follow-up activities in this phase of the health assessment, if you will, will also be ongoing while we're doing an evaluation on the past air emissions, east Kelly and the drinking water consult. We're not just going to stop at that point. We have recommendations to make the follow-up activities that will be ongoing. We really think that the health education workshops are -- are going to be important, because there's a lot of confusion about terminology in environmental health. For instance, today in a meeting with the community I noticed there's confusion about "causation" and "association," and what you can actually do with the data that you find, and there's -- there's some confusion on that. We need those workshops to be able to clear up a lot of that so that people know what we're talking about, and they don't react one way or another.

Having said that, I'd like to introduce Cheryl Ranger, who is head of our health

education workshops. She's heading the health 2

education program at Kelly. And Cheryl has

developed a program that many of you have seen. 3

And this program I really think a lot of, because

it's attempting to give the community -- and by 5 "community," I mean the physicians, the nurses, 6

and community members, the same types of 7

information in different ways, of course, but 8

getting everybody on the same footing. It's also 9

going to make them less dependant on anybody 10 else, whether it's us or anybody else, giving 11

them the information about environmental health. 12

They're going to know other places that they can 13 go to. And I'll let Cheryl talk about our 14

involvement now and how some other entities enter 15 16 into that.

MRS. HUERTA: Sir, can I ask a question? For the sake of our audience, who do you represent?

DR. FOWLER: ATSDR.

MRS. HUERTA: Which is?

DR. FOWLER: The Agency for Toxic Substances and Disease Registry which is --

MRS. HUERTA: Federal? DR. FOWLER: Yes.

Page 80

MRS. HUERTA: The federal registry? DR. FOWLER: It's a part of CDC.

MRS. HUERTA: Okay. And you -- you're a local person?

DR. FOWLER: No. We -- We're all from Atlanta.

MRS. HUERTA: Okay. Are we still talking about this -- this study where they gathered data over a year ago?

DR. FOWLER: We don't gather data. We evaluate data. The other people gather.

MRS. HUERTA: Okay. So help? Is this the study that we were waiting to be released when we talked about the hearing?

BGEN. MURDOCK: That's correct.

MRS. HUERTA: And so there's no new data, but we're still not releasing the results because we feel like the public is not educated well enough to understand?

DR. FOWLER: No. What -- What we're talking about is all of it is not finished.

MRS. HUERTA: Okay.

DR. FOWLER: Part of it is. We're going to release the part that is finished, and continue to work on the part that is not

ì

finished. What we want to happen as far as the health education workshops is to get everybody, the providers, the physicians, the nurses, the community members, on the same page as far as environmental health. What -- What do we mean when we talk about a lot of these things, so that they will be better able to understand what it is we're talking about.

MRS. HUERTA: But the parts of the study that are ready to be released haven't been released?

DR. FOWLER: No. They have not.

MRS. HUERTA: They still haven't been released?

DR. FOWLER: That's correct.

MR. MURRAH: Dr. Fowler, what -- what did you -- were you talking about there when you said past air emissions?

DR. FOWLER: Yes. What we have tried to do is -- This is the first time this has ever been attempted, is, to try to -- at a military base to try to reconstruct what may have happened in the past. We obviously can't go sample, you know, out of the past.

MR. MURRAH: Yeah. That's what I --

Page 82

DR. FOWLER: So we've used a model of present emissions to estimate the concentrations that you would get from emissions now, and then we extrapolate that to past emissions. It's an estimate, you know, that we're trying to arrive at to -- to give us a ballpark that the emissions may have been in the past.

MR. MURRAH: I - I just wondered, the refinement of the fuels and things like that wouldn't affect that?

DR. FOWLER: I beg your pardon?
MR. MURRAH: The refinement of the fuels and that kind of thing --

DR. FOWLER: Yes. Yes. But, actually, that's some of the basis of how we do it. For instance, in '94 in the base change from JP-4 to JP-8 contained a lot less benzene. But having the emissions now and knowing the concentration of benzene in those emissions, that are modeled not sampled, because sampling can contain benzene from other sources, but this is just a model with the meteorological data, the weather patterns and so forth, we can estimate that concentrations that we find now might have been higher in the past due to the increase benzene concentration

KELLY AR # 3335.10 Page 24 of that was in JP-4 versus JP-8.

MR. MURRAH: So you'd have to pick just the certain chemicals like benzene, and you can't -- you can't know what other contaminates would have been there at that time?

DR. FOWLER: We're very limited in being able to do that. Where we do have some data about past emissions we can do that pretty easily. But now then the basis of having to dig in the past records to try to get us some information about other chemicals that may have been used at the time.

MR. MURRAH: Did you have forest fires and stuff like that or rain would that affect it?

DR FOWLER: No. We're really -- We're just targeting the emissions that may have come from Kelly. We're not looking at anything -- anything else. That's all the model will predict for us.

MR. MURRAH: Okay.

DR. FOWLER: It's a computer model, you know, so it's an estimate. And its output depends on how good its input is. The rest of it is just cranking through it.

Page 84

MR. MURRAH: Yeah. I can see that. I couldn't follow, you know, exactly where you, Doctor -- Okay. Thank you.

DR. FOWLER: You're welcome. Cheryl?

MR. QUINTANILLA: Before you leave, how could we, the community, participate in this particular thing? Can you expand on that?

DR. FOWLER: The main thing about this is the -- the model that will be run. The model, however, is -- has been validated, and we don't have any problem with the model. It's what kind of things go into the model that end up giving you your result. So the assumptions that have to be made up front, what gets included, what's a reasonable value, is everything included, all of those kinds of things are decisions that have to be made up front to go into the model.

MR. QUINTANILLA: When you say "community," does it have to be someone who is knowledgeable of -- of those kinds of things?

DR. FOWLER: Yes. I think so. Anyone with a science background can understand what we're talking about and what we're doing about doing. It facilitates things, though, if you have someone that is familiar with the inputs of

Page 88

modeling, so that they'll know what kinds of
things might influence what you put in which will
influence what comes out in the end. Some
things You know, you you could spend a
lifetime doing this, but somebody has to make
decisions about, well, this kind of thing is not
important. It's insignificant compared to the
rest of it. So it helps if somebody knows the
magnitude of those kinds of things.

MR. QUINTANILLA: How long will this community project take?

DR. FOWLER: That's hard to say. And I certainly hesitate to give, you know, a time frame to be done in, but we expect to have it by the end of this year.

MR. QUINTANILLA: November / December or December / January or --

DR. FOWLER: Uh-huh.

MRS. HUERTA: How are you doing the outreach to physicians and nurses? Are you going to offer CEUs for the workshops? How are you going to get them to come?

DR. FOWLER: I'll let Cheryl address that, because that's really a health education planning, and they're in the planning stage of -- looked at was see if there are any acute,

short-term high level exposures that could cause

health defects. And we didn't see those. So

beyond that, we look at long-term, chronic type

of exposures that could result from health effects.

MRS. HUERTA: So the data that you're going to present is going to say that there is no short-term acute health effects?

DR. FOWLER: We've already said that.

11. MRS. HUERTA: Okay.

12 DR. FOWLER: You received a document a couple of years ago.

> MRS. HUERTA: See, that's my concern. People that are in the picture now, like in the last two years, have never seen that. I mean, we've never seen it.

> > DR. FOWLER: Uh-huh.

MRS. HUERTA: So that's part of our information line.

DR. FOWLER: Well, it should be available in the repositories, if you know it's there.

> MRS. HUERTA: Right. I'll go looking. MR. HAGELTHORN: And it's part of the

Page 86

of that.

J

1

2

3

MRS. HUERTA: Was the study designed to be a health education? What's the purpose of this study?

> DR. FOWLER: No. It's not a study. MRS. HUERTA: Okay.

DR. FOWLER: It's a Public Health Assessment. And you assess environmental data, health data, and you see if there's any possible association between those.

MRS. HUERTA: Well, I -- my concern remains that if we do find an association and we're taking so long to educate people when you could be, maybe, making a difference with the public health. I mean, that's -- that's my concern. Because this -- this has been promised a long time, and the deadline's been set back, and nobody -- Well, I don't know what that data says, because it hasn't been released. And if there is a way to impact public health in a positive way, we may be losing time when brains are developing in babies and children in this area. And that's my -- my concern.

DR. FOWLER: Well, that was our concern when we came, too. One of the first things we

Community Relations Program. 1

> MRS. HUERTA: Well, I'll looked for documents. Maybe, I'll take someone to help me find them.

> > DR. FOWLER: We can send you copy.

MRS. HUERTA: Thank you, sir.

MRS. ADAMES: Excuse me. I have a question. When the Air Force got the data and they didn't do anything about it, how long before they gave it to you or before anybody noticed that there was something that they needed to look at which was that data?

DR. FOWLER: I don't understand, ma'am.

MRS. ADAMES: Okay. When the Air Force was given the data that they asked for, the health study assessment thing, when you got hold of it.

DR. FOWLER: You're talking about the health assessment that we did, right?

MRS. ADAMES: Yes. Remember when we were supposed to get and -- and it seems the Air Force got it and we haven't gotten it.

DR. FOWLER: Yeah. As -- Do you remember about a few months ago we came here for Congressman Rodriguez's forum, and we explained

Page 89 at the time the way our policy set up is, when we receive data from someone that is a significant portion of the health assessment, we send the document to them for data validation to see that the data is correct. That doesn't go to the public because the data has not been validated yet. We don't know that it's correct or not.

MRS. ADAMES: Okay. And then about -- DR. FOWLER: That's what we explained during that process.

MRS. ADAMES: So what was the time lapse when they got it and to when they started looking at it? I mean, did y'all get it, became interested and said, hey, this is something we need to get to right away, or did they just let it sit somewhere else until the pressure was put on?

DR. FOWLER: No. They had, maybe, two or three weeks that they had the document before they had to have their comments into us. I think, that's right. Do you recall?

AUDIENCE MEMBER: Yeah.

DR. FOWLER: Yeah. Three weeks.

MRS. ADAMES: About three weeks.

Okay.

Page 90

MR. QUINTANILLA: Who in the Air Force will be providing some of this data for the public to be involved in, or will there be someone from the Air Force?

DR. FOWLER: The data about past emissions has to come in the Air Force documents.

MR. OUINTANILLA: Okay.

DR. FOWLER: And so the environmental management division is, at least, setting that up as far as retrieving the information. They may be contracting out. I -- I don't know. But they're -- that's who we've asked for it.

MR. QUINTANILLA: Let me go out on a limb a little bit more. I understand there's a Mr. Charles Weir that has been selected by DOD Air Force to assist us in this -- to assist, the community, in this; is that correct? Not specifically to assist the community. He is our liaison. He is assisting us in getting information. He's -- He's not targeted for, you know, the community. But in assisting us in getting data that's -- or he's doing the same thing.

MR. QUINTANILLA: You mentioned that you're going to release the report possibly

KELLY AR # 33335 10 Page 26 of 56 whole report or is it going to be in segments?

DR. FOWLER: It's going to be in segments. Now, as we put it to the community, we can wait for, at least, the whole thing. But I think the preference is to release what we have of it now, because, you know, most of it is finished.

MRS. HUERTA: Is this pretty standard operating procedures for the agency?

DR. FOWLER: No. No, it's not.

MRS. HUERTA: The same type of -- Okay. DR. FOWLER: As a matter of fact,

there's several different things about this one that the agency has -- the agency has not done before. One of the things is the air modeling. So that's taking a lot of time and a lot of review, and eventually will be a peer review set to external reviewers for their comments after everything is said and done.

Another thing is, we're looking also at not just the community, but there's an on-base population of workers that are not in the occupational setting where some of the contaminants are generated. In that occupational

Page 92

setting they're covered by OSHA, and NIOSH (phonetic) and, you know, agencies like that.

3 But if they're -- they stay outside of that and

the contaminates are exhausted -- emitted then they become environmental contaminants then. So

a guy cutting the grass may not be protected by the same OSHA that's doing the chrome plating.

8 And so we're looking at that too, and that's a

whole new thing for us to do. It's just that we recognize that they're not being covered by

anyone.

MRS. HUERTA: And you've done other studies like this for the Department of Defense facilities, or is this, like, the first one?

DR. FOWLER: No. We were mandated by Congress to do primarily the NPL sites, the National Priorities List, that the EPA (inaudible) sent out (inaudible) sites. But we also do petition sites. If someone petitions us, we look at it and decide, you know, whether we think it's valid or whatever. But we can do a health assessment on a petition site. It's just more narrow in scope than an NPL on a Public Health Assessment.

MRS. HUERTA: Thank you.

)

?

DR. FOWLER: Are y'all through with me? Cheryl has good news to tell you.

MS. RANGER: Can everybody hear me?
Okay. Is that better? My is name Cheryl Ranger.
I'm a nurse health educator with the ATSDR. And
my first question is, I would like to just see a
little hands raised, would it help the RAB if we
provided some of the information that David
Fowler just talked about, about who ATSDR is,
what the petition process is, that type of
information?

(Show of hands.)

MS. RANGER: Okay. We -- what -- I'll just send that to Brigadier General, and he can distribute it to the members. Okay. We have that out of the way.

I am responsible for health education at ATSDR. And one of the things that just -- And I'm going to try to get through this really, really quickly, maybe, four minutes. One of the things that we know is that physicians and nurses specifically do not get environmental health education in their -- in their background, when they're going through their training. And it's one of the things that I concentrate on as part

Page 94

of my job is, trying to bring physicians and nurses up to snuff on environmental health. Because community members are concerned, they have questions, is the environment harming my health? So that's one of my priorities, and it's also one of the priorities that Congress has mandated our agency to do.

When we started getting involved here, as that petition process, Dr. Fowler has been very supportive in making sure that community involvement and health education are part of whatever he does. And after we talked to the community, we talked to the physicians, and a couple of the nurses — a lot of the nurses actually, and a few of the physicians, we developed an education plan. It's has an extremely high participation involvement level in the community. Without their feedback, without their support, this probably never would have

The very front page of the handout that you've received is kind of the basic principles that we're -- that we're tying to integrate on all three different target groups. And those target groups are community members, physicians,

Page 95 and nurses. And we are holding three separate workshops.

The community is going to be an integral component of those, so that they can not only have participation but they're actively involved in the communication process and the education process. There were sample education plans that we're working through with the target groups and community representatives from -- from nurses, physicians, and other folks in the San Antonio Metropolitan Health, the Kelly Air Force Base has been very helpful when we started getting this off the ground.

When the education workshops are put on, everybody can attend any one of those education workshops. Certainly, the RAB members are invited to whatever -- It would help if I knew how many people were coming, so that I can provide appropriate materials for you. And also make sure that we have the appropriate site.

Our biggest goal out of all of this is not just simply education. It's not simply making sure that the -- the community knows what benzene is at this point in time, that they know what TCE and PCE are, that they know what GIS information

Page 96

systems are, those pretty maps that we all include in our education stuff or in David's Public Health Assessment.

The goal, at least from my point, as a nurse, is to make sure that something is left behind. Because ATSDR will walk away. I will go away. ATSDR will go away. At some point, even the Kelly situation, will go away. It will be cleaned up and, hopefully, health conditions will be addressed. But what -- what happens next? Is it an oil refinery, is it an -- some type of power plant? So our biggest goal is a sustainable, environmental health action left behind on the local level. And all the presenters and all the actions here is we're trying to promote local activism, local information, local network, so that people can know who to go to. Now, the San Antonio Metropolitan Health has been exceptionally supportive and action-oriented in making sure that happens. Though, with that, I'll leave it with Sam Sanchez unless anybody has any questions for me.

even happened.

24

25

facilitating the -- the discussions, in terms of

the -- the health education seminars for the

6 community. And I want to tell everybody here,

that the Health District entered into this

8 process with the community and with the ATSDR as

the public health authority for the City of San

10 Antonio and as the -- for the -- and also for

11 Bexar County, but also all of us here around this

12 table -- I feel also that it's -- that as a

13 member of the RAB Board, the RAB Board is also

14 helping to facilitate the kind of a seminar

that's going to take place. It is specifically

aimed at three target audiences. It is aimed at

17 nurses, at physicians, and at the community

members. We have been -- We have met now a total

of, what, four different times in the evenings.

20 We've used the offices of the Southwest -- the

University Health System Southwest branch here on

22 36 and 90. We've met in the evenings for

23 extensive periods of time. Many of the community

members present here have attended. They've --

25 The role of the Health District is really to

Page 98

facilitate the discussion in terms identifying the key things that we need to hit in there for the nurses. The same kind of process is, probably, be -- will be used for the physicians and also for the community piece as well.

To talk about -- specifically about health, and health issues, health protocols, health resources, how to interpret information for oneself, what to -- what to say when you go to a doctor, what information you can give them, where you can find health for these kinds of problems,

There's several goals that have been right up right from the very beginning identified. And the very first one is to identify — to increase awareness among the health care provider community. That is a very specific goal that — that we're striving to attain.

And the second one is that -- what Cheryl alluded to at the close of her remarks is that at the end of this process, you know, certainly the Metropolitan Health District does not see this as an end all or the -- the end. We -- we -- We see this as a -- kind of a series of steps to try to bring -- continue to bring information on health

RELLY AR # 3335.10 Page 28 of 56 and specifically environmental health into the areas around Kelly Air Force Base, to bring a growing awareness of what -- what the hazards are in and around Kelly Air Force Base, not just Air Force Base, by the way.

Last week I attended a meeting of the South San Independent School District Board of Trustees where I asked them to support these efforts by encouraging and -- and helping as many of the school nurses to attend the seminar. And I can tell you that the response from the -- the Board of Trustees from the South San Independent School District was very, very supportive. They will help us with this. And this is the kind of outreach effort that is required for this kind of effort.

Tentatively, we have identified a site for the nursing component. It's going to be more than like -- it -- it may very well be at the Southwest General Hospital which is just right behind this school. The -- the hot -- It is located here in the Kelly area. The hospital administration has been supportive. And they may bring the physician piece down into this area as well.

Page 100

So those things are moving. There's a lot of logistics involved with assembling health care practitioners. They're very, very busy people. We have to work -- look at a lot of different schedules. Attending -- Identifying speakers that are germane to the subject that we wish to have discussed, working with those kinds of schedules, and their schedules to see if -- you know, when we can bring all of it together and -at one particular date for nurses, for physicians, and for the community are logistics issues. But it's not something that is being solely driven by the Health District or by the ATSDR, because we do have community members that have been with us all along, and we -- we intend for this process to be community driven, and we intend for the input to be part of this process. Thank you.

BGEN. MURDOCK: Any comments or questions?

MRS. HUERTA: All right. Are the CEUs being offered to physicians and nurses?

MR. SANCHEZ: Yes. Yes. Yes. Nurses

will be getting CEUs as well as physicians.

MRS. HUERTA: Thank you. You

Page 101

į

approached the South San School Board?

MR. SANCHEZ: Yes.

MRS. HUERTA: Have you approached Edgewood School Board, because I think part of their children are affected too?

MR. SANCHEZ: They -- They will be approached. And we're already working with the Director of Nursing for the Edgewood Independent School District, South San Independent School District, Harlandale, all of those school districts.

MRS. HUERTA: Another -- You've mentioned, briefly, other -- other sites of contamination. So you were talking, I think --

MR. SANCHEZ: Part of the -- of the -- of this process is to identify a health hazard -- environmental health hazards in general, you know. For instance, we're looking at big issues, you know. I think it's important for the community to look at -- this is just an example of an environmental health issue that has a specific medical outcome. It's a very -- it's very -- It's very much an issue of housing in San Antonio. It -- It is also very much an issue of medical access.

Page 102

MS. PEACE: So your department will keep pursuing these issues in this area?

MR. SANCHEZ: Yes. Yes.

BGEN. MURDOCK: Any further comments or questions for the folks from the ATSDR? Okay. With that, I'd like to turn to Dr. Lene for a committee report on the TRS.

PROF. LENE: Okay. What I like to do is just give you a rather short report on the activities of the TRS. What Tom has put on the overhead up there is sort of a list of some of the things we've been doing. It's not everything, but it's a partial list.

We've done some document reviews. We've reviewed the Zone 4 Decision Document; the Site S-1 Focus Feasibility Study; the ICM Building 258 Work Plan; and also we have had some reports to the TRS from various departments in the Air Force and other -- and contractors who have given us some reports on the Site S-1 Attenuation Study Report. That was a very interesting report. I -- I really liked that idea. And it's something that we need to know a lot about is natural attenuation. Whether or not this will be used or not, we need to know about this.

Page 103

Also, we were given an update on the MP slurry wall that they're putting in. And --Excuse me. And in the Zone 5 Remedial Investigation Report was a good one, and then the waste water -- the industrial waste water collection system closure strategy report, and so -- I know this all sounds kind of boring, and you wonder what the heck this is, well, you'll have to come to the TRS to find out. Okay. And you'll see what we're -- We're getting a lot of good information, and we're learning a lot, and so this is something that I'd like to encourage people to -- to attend that.

We're also working on a Mission Statement for the TRS now. We've had some complaints in the past that, maybe, we get unfocused sometimes, we go off on little rabbit trails that, maybe, leads nowhere sometime, and so -- and it is true. And so in order to help focus on what we really should be doing as the TRS, then, we've tried to put together a little Mission Statement. And it looks like a little Mission Statement. You have a copy in front of you. It doesn't look exactly like the one up on the screen, but I guarantee you the wording is

Page 104

exactly the same. And we can run through that very quickly.

The Technical Review Subcommittee is established by the Restoration Advisory Board for several purposes that serves a mission for the TRS. Okay. The first bullet: To provide the RAB, and therefore Kelly Air Force Base, with advice on technical matters regarding the Environmental Restoration Program. And we really like to concentrate in the TRS on technical matters.

Review and provide advice to the Kelly Air Force Base on technical documents generated as part of the clean-up program. We really like to examine these documents, and then possibly comment on the documents themselves.

Express community member's perspectives and form advice for improved conduct of the clean-up program. And this is why we need people in attendance to tell us their side of the view. Especially, community members.

Focus discussions on installation restoration program sites, and clean-up activities for those perspective sites, for the purpose of providing specific advice on the

l

clean-up activities. See, the -- this recurring theme is advice on clean-up activities, after examining the documents, and so --

Serve as a conduit of information. This is important, of course, this is also at the Registry, to local community members and stakeholders for the purpose of understanding the clean-up activities and, therefore, the generation of advice to the Kelly Air Force Base.

To allow for the free exchange of thoughts and ideas -- and we do encourage that; we don't want to stifle anybody, and -- regarding the clean-up matters at Kelly Air Force Base.

To facilitate the efficient functioning of the RAB by minimizing the amount of detailed technical discussion that might take place at the RAB. And we'd like to do that in the TRS, and that avoids taking up valuable RAB time doing the same thing. Okay.

What we'd like to do -- This is not set in stone. What we'd like to do is hear any comments we could on this Mission Statement. If you think of some improvements, we'd sure like to hear them, okay? Any suggestions you have, if you'll

Page 106

get those to me then we can talk about making some changes. Right. Good.

The other thing is the TAPP Project. We met last night over at St. Mary's University, about 7 of us, and there's a list of people on the Board who was there, and we met with Mr. Patrick Lynch. Patrick is with us tonight. He's sitting right there in the corner. (Indicating.) Okay. And I would like to say, you might like to meet Mr. Lynch, but hold your questions. He's not

ready to answer questions yet. He's just getting

started. And he will make a presentation on May 13 11th, to the -- No, I'm sorry -- June 8th to the

TRS, and then there will be another presentation

TRS, and then there will be another presentation to the RAB in July, okay? So that's when you

have your questions. Okay. And we would --

certainly will encourage questions at that time.

18 We've asked him to look at a plain language

summary of the Base Wide Remedial Assessment.

His idea is -- His job is to do an analysis of

the Base Wide Remedial Assessment. So we've

asked him for a plain language summary, and that

will be part of his presentation, I'm sure, and also look at any possible data gaps that maybe

have been overlooked in the assessment, and also

KELLY AR #. 3335.10 Page 30 of look at the interim actions remedial actions that are in place and see if, maybe, we're missing something and, maybe, look at the -- evaluate those.

We have adopted some of the schedule that you can follow there. May 17th is when he will give us a draft report, and that will submitted to the TRS.

On June 8th he will make an oral presentation to the TRS. And this is where the questions will begin. We'll begin the questions as soon as we get the report, also at the TRS meeting we'll have questions for Mr. Lynch, and then also questions after the meeting. Now, we will formulate these questions and pass them on to him. So he -- this will be sent to him, and then we on June 20 he will incorporate those questions into the final report. And that will be presented to the RAB on June 20 when we meet. Then the RAB will have the opportunity to ask him questions. Now, the final report will be in at that time. So those questions that are generated from the RAB at that time and shortly thereafter, and I mean very shortly thereafter, then, those questions will also be submitted to Mr. Lynch,

Page 108

and then he will answer those questions as an addendum to the report. And that's as far as his responsibility goes.

I have no further on the TRS. That's what we're doing now. I would like to remind you that on May 11th, we do have a TRS meeting. And it's important that we have attendance there because this is where we're going to start looking at our next TAPP application for next year. And that has to be done this summer. So we need to get started on that in May, so we'll considering what we want to do on the next round of TAPP. Okay. I think that's all, Tom.

Okay. Our next -- on the list, on the Agenda, is our Community Comments. Do we have anyone in the audience who would like to make a comment to the -- to the Board?

BGEN. MURDOCK: Laura, I really don't know -- I was originally told that you might have some comments there also after we -- we check with the community, but just to reaffirm that.

PROF. LENE: All right. If there are no comments from the community, then we will ask Laura Stankosky from the EPA to make a short presentation on a grant that may be a

possibility.

MR. RICE: Excuse me, Gene, if I may, after Laura's presentation, I have -- I would like to make a couple of comments if that's okay?

BGEN. MURDOCK: Sure.

MS. STANKOSKY: Do you want me to stand at that microphone or where?

MR. QUINTANILLA: Over there.

MS. STANKOSKY: Can y'all hear me? Okay. I'll try and make this pretty quick so that we can -- we can get out of this ice box.

Okay. EPA Region 6 -- I need notes -- has placed a request for funding to our headquarters for use at Kelly. Okay. What will it be used for? To provide Kelly -- the Kelly RAB an opportunity to participate in groundwater sampling events on a limited number of Kelly wells...This type of sampling has been or is being conducted at Sandia National Laboratories and Los Alamos National Laboratories in New Mexico. Those facilities are not closing, but they do have a similar type of body to the Restoration Advisory Board, they have a Citizen's Advisory Board.

Page 110

Okay. How is the funding used? The Community Restoration Advisory Board would work with the EPA to select a limited number of wells to be sampled by an EPA contractor.

Okay. First, I want to get a consensus. Is this something which the RAB would be interested in?

MR. QUINTANILLA: Does this mean that the whole RAB would participate and go to Sandia or what?

MS. STANKOSKY: No, no, no. The sampling would be conducted here at Kelly. But what the RAB would do would be to work with EPA, and perhaps TNRCC, and also Kelly in selecting a number of wells here at Kelly for an EPA contractor to sample.

MR. QUINTANILLA: I'm for that.

MS. PEACE: Yeah.

MR. MURRAH: Would that be on Kelly or in the area of Kelly?

MR. HAGELTHORN: Any of the existing wells.

MS. STANKOSKY: Okay. Let me go into a -- a little bit more detail, and then I'll ask another question. Okay. Like I said, it's a

limited number of wells. And by "limited," this 1 2

would be approximately 20 to 30 wells. And what

the RAB would do -- And I don't know if this 3 4

would be through the RAB itself or through RAB

participation at the TRS. That would be one of 5

the questions that I would want to ask. Those 20 6

to 30 wells we would select around the Kelly 7

area. They can be Kelly on-site. They can be 8

Kelly off-site. They can be a mixture of the 9

10 two. We could focus in one area. We could focus across the entire area. One of the questions 11

would be, would this be through the whole RAB or 12

would it be through the TRS? The TRS meets 13

14 monthly, so it might be a little bit more logical

to kind of do updates at the TRS meetings. 15 16

Okav.

17

81

19

13

14

15

16

17

18

19

20

21

22

23

24

25

When is this going to happen? That's a good question. Just -- Let's see, I think it was -it was just yesterday that we got sort of -- I would be more comfortable if we got a "yes, you are getting the money." But that's not what I got. What we did get -- we have -- We have just recently put in for this money, and headquarters was -- It's sort of an ethereal pot of money.

For the past few years EPA's funding has been 25

Page 112

fairly tight, but this pot of money became available, and since this project was very

helpful, it was a very positive input at Sandia 3

and Los Alamos, we decided to, you know, throw a

lasso and see if we would get some of the money. 5

And what we were told Monday was, "well, it looks 6 pretty good." So it's not a yes, but -- but it's 7

a -- it's definitely not a no. So it looks like

9 we're going to get the money.

> When will it be here? I don't know. It has to trickle down from headquarters. It goes into a pot at the Region, and we have certain people who administer these contracts. I would be working with the contractors, but we have people that it's their job to do this at EPA, work with all the different types of -- of contracts and funning that we do. Questions?

MR. RICE: Yeah, Laura. This sounds like a nice idea. Is this the only thing that the money can be used for? Are there any other projects that, maybe, we could pick, you know, to --

MS. STANKOSKY: There is only a limited number of projects that -- that we can select from. Groundwater and soil sampling were done at MS. STANKOSKY: No. These would be EPA contractors going out and doing the work under, I guess, EPA oversights. But what -- we have to

Page 114

work with Kelly, because these would be Kelly wells that we would be sampling. And Kelly knows about this, and they're more than willing to participate and make the wells available.

MR. QUINTANILLA: Let's go with it.

MS. STANKOSKY: One of the things that we also -- this was done at Los Alamos and Sandia, but they're -- those facilities' funding was a little bit different. One of the things with do offer is to do split sampling, where EPA collects sort of enough of the, whatever median, soil, groundwater for the facility to do, what's called, a split sample. I don't know if the funding -- if Kelly can rearrange their funding to do analysis on their split sample, but it is something that this type of funding offers.

MR. QUINTANILLA: Right now, as I see it, Kelly is very short on funding.

MS. STANKOSKY: So that -- that might be -- we would just -- maybe, in that case, maybe, we would just do, you know, the analysis, the sampling analysis.

MR. QUINTANILLA: I think the overall DOD is about five billion dollars short for all of BRAC closure bases in total.

KELLY AR # 3335, 10 Page 32 of 56
MR. MIXON: Could I ask a question?

MS. STANKOSKY: Yes, sir.

MR. MIXON: Hasn't sampling already
been done?

MS. STANKOSKY: Kelly does rounds of

MS. STANKOSKY: Kelly does rounds of sampling, yes.

MR. MIXON: And doesn't that get turned in to EPA and TNRCC?

9 MS. STANKOSKY: I'm sorry. What.
10 MR. MIXON: Doesn't those samples get

turned in to EPA and TNRCC.

MS. STANKOSKY: Yes, they do. But what this project is, it's sort of a positive community outreach type of project.

MR. MIXON: How much money are we talking about spending.

MS. STANKOSKY: I do not know the exact figure. And --

19 MR. MIXON: \$10,000? \$100,000? 20 \$200.000?

MS. STANKOSKY: We're in that range.

22 MR. MIXON: Gee whiz.

MR. HAGELTHORN: Can you just give the money to me and --

MR. MIXON: There's a lot of things, I

Page 116

think, that you can do with that money.

MS. PEACE: Frankly, I really appreciate your -- the EPA's request for funds on our behalf. As I recall, there were some issues on soil sampling that were never resolved, and -- and so these funds might be able to do that, so I -- I would like to really thank you for that. And this could be a very worthwhile project.

MR. RICE: Yeah. I'd just like to follow up on what Annalisa said, and address some of Carl's questions. There are some areas that the Air Force has not gone into sampling. We've asked them to sample, they've refused to sample. So, maybe, we could do some of that sampling with some of these funds.

MR. QUINTANILLA: It's good community outreach program.

MS. STANKOSKY: Okay. So hopefully by the next TRS meeting, maybe, we can -- can squeeze in a little bit of time after the TAPP / BRAC discussions. And, hopefully, I'll know a little bit more, at that time, and we can -- we can maybe start flushing this project out a little bit more.

MR. QUINTANILLA: We don't want to wait

)

?

MS. STANKOSKY: We would be sampling for -- it's sort of a standard protocol -volatile organic compounds, semi-volatile organic compounds, and metals. Those are -- That's kind of the standard analysis when you, sort of, don't know what's out there. And we do know what's out there, but that would be the type of analysis that we would run.

MR. MURRAH: There's a list of 30 minerals and whatever, or 40, or some figure of --

MS. STANKOSKY: I -- I don't know the exact\_number of -- of analytes, but there's quite a number of -- are you -- there's a --

MR. MURRAH: - contaminants.

MS. STANKOSKY: They're sort of called the priority pollutants. And that's -- that's a list that -- that EPA comes up with, and TNRCC develops criteria for. And that's what we would

MR. JACOBI: 1 -- I appreciate that. But it costs money to go out and collect the

samples. And if the Air Force is already 3 collecting samples, is there a possibility we 4 could go avoid the separate investment for that 5 and split samples with the Air Force so the Air 6 7 Force collects twice the samples and then gives

8 it to the community? Just a suggestion. I'm 9 just trying to get as much benefit as possible 10

with the money. And I see some head shaking down there so -- I'm not a community member. It's up

to them.

MS. STANKOSKY: That, I don't know, but I can -- I can certainly look into that. There might be some time line problems. I know that Kelly's going out currently and conducting their 1999 base wide sampling event and, like I said. we don't have the money in place yet. So we would have to time it during their base wide sampling event to be able to get those split samples. That's why we've requested money for our contractors to go out and actually collect the samples so that that time line, where Kelly's actually out sampling, --

MR. JACOBI: I -- I move that we grant

Page 118

be sampling. There's a suite of chemicals, a suite of organic compound -- volatile organic compounds, a suite of semi-volatile organic compounds, and then a standard list of metals.

MR. JACOBI: I think George's suggestion of areas that Air Force hasn't covered to the community's satisfaction might -- might be a good place to invest this money. And I would also suggest that if there's a possibility we could -- the community would be satisfied with split sampling some of the Air Force samplings to leverage the money to make it go farther, we might want to invest in splitting those samples and getting the analysis done independently by EPA, and that way the money could go farther and get more information through that. That's just as possibility.

MS. STANKOSKY: Okay. EPA's money would be doing the analysis. What I was saying about split sampling is the EPA contractor goes out and collects, like, double the amount of groundwater or soil that he would need for his analysis. And then half of that would be offered to, in this case, Kelly or, you know, the facility.

the Technical Review Subcommittee the authority to commit to the use of these funds if they

choose to exercise that authority.

MS. PEACE: I second that motion.

BGEN. MURDOCK: All in favor -- Or any comments or questions about the motion? All in favor, please signify by raising your hands?

(Show of hands.)

BGEN. MURDOCK: So unanimously done.

MS. STANKOSKY: Thank you.

BGEN. MURDOCK: Thank you, Laura.

MR. MURRAH: One question I'd like to ask is, are these existing wells that we're sampling? Are we're going to use wells that we've already got?

MR. JACOBI: Yes.

DR. LENE: Existing wells only. No new wells.

MR. MURRAH: They're already sampling out of these wells, that doesn't --

BGEN. MURDOCK: George, you had some comments or questions?

MR. RICE: Yeah. During the break I spoke to Pat McCullough and briefly to General Roberson, and asked them if they would take just

GEN ROBERSON: I'd be more than happy to, George. Can y'all hear me okay? Let me start by saying some -- something nice about Pat McCullough so that he'll be nice to me when I --

We do have a -- The Greater Kelly Development Corporation does have a disagreement with the Air Force and, specifically, the agency that we're dealing with is the Air Force Base Conversion Agency and, I think, most of you know Pat McCullough is the senior representative here on Kelly. And the nice thing I want to say is that we could not, and I don't think the community, could ask for a finer person to deal with, someone who really does try to bend over backwards to recognize the needs and the concerns of the community, and try to deal with them in a very straightforward and fair way. So, Pat, I --I know that you're doing everything that you can to help us work through this problem.

The issue has not gotten to a point as yet that I -- that we really have a formal policy decision from the Air Force. We're still in

Page 122

dialogue, and I'm waiting for a formal policy decision from Washington D.C.

If I could characterize it, and I'm going to do this in layman's terms, so the lawyers and the -- and the technical experts here will probably cringe when I say this, but I'm going to try to do these very technical terms in very layman's terms with -- with an example.

We are doing a major upgrade project out on the ramp area right now. We are actually tearing up a large part of the ramp and replacing it. We're doing this, quite frankly, because the ramp was in very poor condition and needed to be repaired badly. And in the process of doing that, we are excavating some soil and concrete.

Because this is considered by the regulators to be an industrial site we have to sample all of that material and the -- and the -- and the dirt that we're taking out of the ground to see if there's any contamination in it. And in some cases we have found some hazardous material. In some cases, Class 1 or 2 was -- was categorized as Class 1 or 2. And I'm -- in a very small number of places as hazardous material. They --We are then required to dispose of that material

KELLY AR # 3335 10 page 34 of 56 based on its categorization in a permanent landfill.

The position that we've taken in the redevelopment authority is, that because that contamination was initially there as a result of actions by the Air Force, that any costs associated with that project above and beyond the normal cost of doing the project, in other words, any costs associated with the sampling or disposal of the soil should be borne by the Air Force, because they are the ones that put the contamination there.

Actually, in our dialogue we have actually made a significant amount of progress and formally have an agreement that the Air Force will pay for the sampling cost, and will pay for some of the removal of the material base on the categorization of the material but not all of it, and our position is, that we believe they ought to pay for all of it that we're required to dispose of.

We've now taken this up through the -- the Air staff -- to the appropriate office up there. We've actually taken it to our Congressional Delegation, our two Senators and Congressman, who

Page 124

have taken it directly to the Secretary of the Air Force. That's where the issue is right now being debated at the Secretary of the Air Force, general counsel of the Air Force level.

And, Pat, you might want to -- if you've got a different perspective or a different viewpoint, it might be worthwhile to hear that.

MR. McCULLOUGH: First of all, thank you for your kind words. You all ought to know that I spend more time with Mr. Roberson than I do with my family a lot of weeks. And we have an understanding that it's okay for us to disagree; we're supposed to be on the opposite side of issues, some issues, and we understand and respect that from each other. And I respect his position. I don't disagree with what he just said. I might characterize it differently from an Air Force perspective. But I -- I think I -a simple statement of the issue is, that what we're talking about here is -- is not who's contamination it is. It is ours. It is the Air Force's contamination. That is not being debated contrary to what you have might read. We're not denying that.

Page 125

are committed to clean up any contamination we cause to the levels required by the regulators and law. The problem that we run into is when we run into contamination that doesn't, is less than those levels. And that's -- really that's what we're talking about here. The Air Force -- The issue is, if you left the contamination alone there would be no cost, because it -- the -- the levels are so low that it wouldn't trigger a clean-up effort. Once you dig the contamination up, once you remove it from the ground, then there is a cost because it -- it becomes waste at that point. And so that's the debate is, how to handle it when you -- when you remove it and change it into waste from what it was before just sitting in the ground. And that's why it -- it's difficult to deal with.

MR. QUINTANILLA: Can the land be reused while it's contaminated?

GEN. ROBERSON: Well, maybe, I can make a comment on that from the redevelopment's perspective. That ramp area is probably a good example. If we had not torn up the ramp and excavated the soil, it would have certainly been reusable as it was. It was basically capped with

we 1 Mr. Roberson made, there is such a thing as

2 hazardous waste. There are also three other

3 classifications of industrial waste. They only

4 apply to industrial facilities. Those are

5 Class 1, Class 2, and Class 3 nonhazardous

6 industrial waste. The materials in question

7 mainly at -- at -- that the Kelly Air Force Base,

8 the GKDC, and U.S. Air Force are dealing with are

9 these nonhazardous industrial wastes. The

situation at the ramp repair project is that

there are some constituents -- by "constituents,"

12 I mean chemicals -- that have, for some reason,

entered the shallow soil underneath this ramp.

14 They are low levels. But again, they're not

15 naturally occurring. I mean, they -- they didn't

16 just come there by themselves. So anyway,

17 they -- they're nonnatural. They have caused a

18 situation with the natural environmental media of

19 the soil. Now, we have the soil with these

20 constituents in it. Analysis is done -- Samples

are collected, analysis is done, and we have

22 determined that there are levels of constituents

23 there. The entity in question, now, must tell us

24 the constituents are at Level 1, Level 2, or

25 Level 3, or in some cases they may be at

Page 126

1

17

MS. POWER: I - If I could, I'd like to make some clarification.

GEN. ROBERSON: I knew that the regulators would not let me do --

MR. McCULLOUGH: And that's probably good.

MS. POWER: If I could, I'd like to make some clarifications. I as a regulator, am speaking not to GKDC and not to the U.S. Air Force at this time. I'm speaking in broad general terms as to what is waste, and how do you create waste, and where does waste go once you have something called waste.

In an example such as the repair of this—this ramp area there is some constituents in the soil, and because you're dealing with an industrial facility, be it the U.S. Air Force or Bob's Auto Shop on the corner, or a plating shop on the other corner, because this is basically considered an industrial facility, we as the State have established certain types of rules that apply to what you do with waste from these facilities.

In clarification to one of the comments

Page 128 hazardous levels, which would make it a hazardous

2 waste. Anyway, so I wanted to clarify that.

What we're talking about is stuff got in there

4 that wasn't there naturally so now we've got a

waste. Well, okay, it's not a waste. We have

6 contaminated media. Again, as Mr. Roberson

pointed out, here you have this ramp -- Yeah. It
 probably needed some repair and this, that, and

9 the other, you know, I'm not going to question

that, and y'all talk that out amongst

11 yourselves. But it was there, it is covered by a

12 cement cap or a -- a cement covering, but for

some reason or another, it is needed to be

14 removed, excavated out. Well, the minute it came

up out of the ground it is now a waste because, you know, you -- we're not going to allow you to

put it back in the ground. We're not going to

let you put it in somebody's backyard. We're not going to let you take it to the day care and use it in a sand box. So it's got to go somewhere.

MR. QUINTANILLA: It happened in my neighborhood.

MR. HAGELTHORN: I understand what you're saying. And, I think, everybody else understands what you're saying, your position and

whatnot.

Ì

MS. POWER: Right.

MR. HAGELTHORN: But coming from the community relations side, and knowing the community, and knowing how the Air Force has really made a mess of this to begin with, it seems incredible that the Air Force, and that the TNRCC, and the EPA is in on this too, that they would even think about saying that the waste is underground, it's capped, therefore it's not a threat, therefore if the development corporation wants to build on this, they're responsible for it. No, I don't think so.

MS. POWER: Well, --

MR. HAGELTHORN: You know what, I -- I don't -- Very seldom do I side with him, (indicating) but there is no question in my mind that I will fight this 100 percent on the back behind these guys, and I'll make you guys look like idiots if you say that they have to pay for this.

MS. POWER: Okay. Okay. Again, I'm not talking about who should pay for what.

GEN. ROBERSON: Abbi, if I could just make a comment here. And I -- And I want to make

Page 130

some complimentary comments to Abbi. She -- As a matter of fact, what Abbi just said is exactly right. She is describing the situation. I don't think she was attempting to make a judgment call --

MS. POWER: -- call on either of these entities.

GEN ROBERSON: -- on here. And really what she says is right. That soil has got to be disposed of according to a protocol that the regulators lay out for us. And nobody disagrees with that. In fact, we probably all -- All of the entities agree on more than we disagree on. We agree that it is the Air Force's contamination; we agree that a certain protocol has to be followed once that soil is disturbed; and we all agree on that. The only issue is, who's going pay or it.

MR. HAGELTHORN: That's right. And they put it there, they pay for it.

MS. POWER: And that's not an issue for the TNRCC to get involved in. I also want to make that statement very clear.

GEN. ROBERSON: Right. Exactly. And if the GKDC has to pay for it -- I mean, remember

who the SKDE is, we are septesenting the Gifty off 56 San Antonio, so it's the community of San Antonio that's paying for it.

But, again, let me emphasize that -- that we are narrowing the issue here as we continue our discussion. The Air Force has agreed that they will pay for the sampling. And it turns out, that's a significant issue, because the sampling -- this sampling of soils is an extremely expensive process. In fact, it's more expensive to do the sampling than it is to do the disposal.

MS. POWER: Right.

GEN ROBERSON: And they -- The Air Force has agreed that there's certain categories of soil that they will pay for. And now, it's the rest of it that is still the issue of debate. And again, it's not -- We're not asking the Air Force to pay for everything. We're asking just to pay for the difference in cost because of the -- the contamination that's found, the -- the industrial waste that's found. So that's the issue that we've now escalated to the -- our Congressional Delegation, to the Secretary of the Air Force. And as I understand

Page 132

it, Pat, even as we speak tonight, the Secretary of the Air Force and the general counsel are focused on this issue; they have left the Kosovo -- or Kosovo off -- it's off their radar screen, and they're working on this?

MR. McCULLOUGH: That's right.

GEN. ROBERSON: But, Allan, thank you for your support.

MR. RICE: Yeah. I'd like to -- to thank you for those explanations. That's very helpful to me. But I -- I have a question for Pat. You know, if you had exactly the same circumstances, but this happened to be just off base where some private business dug stuff up, you know, not GKDC, but somebody who had some little operation there, and they dug up soil, and it was just like the soil that GKDC dug up, would you then expect that private business to pay for the disposal of -- of that material?

MR. McCULLOUGH: The -- The true answer is, I don't know. Because I'm -- I'm not an expert in -- in answering that question. I think there's a lot more to that question than -- than really I'm trained to answer. But what I can tell you is, if they -- if they sampled that soil

Page 133

and the contamination would -- requires clean up, if the contamination requires clean up, it's our contamination, we'll clean it up. I can tell you that.

MR. QUINTANILLA: Didn't in my neighborhood.

]

8.

:0

:1

ì

MR. McCULLOUGH: And there is -- there is no debate on that with -- with GKDC either. If they -- If they're digging in the ramp out there and they hit contamination that -- that triggers clean-up levels, well, we'll still clean it up, even several years from now.

MRS. ADAMES: May I make a comment on that?

MR. McCULLOUGH: Sure.

MRS. ADAMES: If contamination is found outside the area -- there's this mechanic we've been doing business with, he just recently had to take out two fuel tanks that were there when he bought that place. He wasn't selling fuel. He's mostly a mechanic. But the TNRCC, or whoever, went over there and told him there was tanks there leaking. He had to pay to take them out, and it was, I think, he said 2 -- \$22,000 for it -- just whatever. If not, it was going to be

Page 134

\$2000 or \$10000, something like that a day. So the private sector does have to clean up.

MR. McCULLOUGH: We -- We comply with those very same rules.

MS. POWER: Yeah.

MR. McCULLOUGH: But, remember, we've got a couple hundred tanks.

MS. POWER: The rules you're speaking about, the storage tank rules, apply all the gas stations, your mechanic, or anybody else that has the underground storage tanks --

MRS. ADAMES: He said, I would excuse them if he used them, you know, but he said, no, he said, they say that he is responsible for it.

MS. POWER: He owns the property. He is responsible. When he bought the property, depending upon how long ago he bought it, some kind of site assessment may have been done, and he may have been informed, you're buying the building, this property, and the property comes with two tanks, you get the whole package. He should have had them removed before he bought the property, but, you know, hindsight's 20/20.

MRS. ADAMES: So I -- I -- I do know for a fact now that the private sector, it's

Page 135 there, even if you didn't cause it, you have to clean it up and take it out.

MS. PEACE: Personally, I -- I think, you know, the Air Force's position on this, especially, in the fact that the City of San Antonio and GKDC negotiated this deal, they have their budget figured out, and -- I don't think because the Air Force has consistently said, we will clean up, we will take responsibility for whatever is ours -- This is merely a matter of taking responsibility, and to put that cost back on the City is -- is, to me, unconscionable being that, you know, that was part of the whole negotiation phase.

MR. McCULLOUGH: If -- If you know what the Air Force's position is, let me know, because it's not developed yet.

MS. PEACE: Well, they have consistently told us that they will take responsibility for the cleaning up and that they will --

MR. McCULLOUGH: Well, you shouldn't believe everything you hear or read, because it's not true. The Air Force doesn't have a position on this yet.

Page 124

Page 136

MRS. ADAMES: But, to me, it seems like, in my area, on my lot, it's contaminated don't dig into it, leave it alone. Whatever is on there, leave it alone. You cannot afford to clean it up. The Air Force told me, you dig up, you mess up, you clean up, and you pay for it. So just leave it alone, in other words. The plume is right under my house. Leave it alone. I know it's there. We know it's there.

MR. McCULLOUGH: I don't think we're saying that.

MS. ADAMES: We know the plume is under my house, so I don't clean it up.

MR. QUINTANILLA: The original DOD policy was to clean up the land to the highest possible standards, then that -- that was in 1993. From that time on, it's been downhill. You know, right now you're so short of money you just can't clean up.

MR. MCCULLOUGH: That's your opinion.
MR. QUINTANILLA: Well, that's fact.
That's fact.

MR. McCULLOUGH: Okay. I -- I can say that we haven't been refused anything that we've asked for in terms of budget for Kelly.

Page 140

4.

MR. McCULLOUGH: As soon as we get the Air Force's position on it we will ask for the funding to support the Air Force's position on it. And I -- I suspect we'll get the funding. We haven't been refused yet.

MR. QUINTANILLA: Well, my part, you know, I'm with Paul Roberson, and I will contact whatever friends I have in Washington to do this.

MR. McCULLOUGH: That'd be fine.

BGEN. MURDOCK: Any other comments or items on this issue?

Okay. What I'd like to do now is come the closure with the meeting. Based on our discussions this evening, I would like to suggest, for agenda items at the next RAB meeting, that we probably want to dedicate some time to the ATSDR report which, hopefully, will have been placed for public comment, and spend some time, hopefully, discussing that report.

I'd also like to think that we'd like to spend some time, maybe, on the environmental four years I haven't seen it yet. I've been asking for four years to see it. So I would just really like to see if it really exists before I leave.

MR. QUINTANILLA: General, it does exist. I went through an FOIA and got one. I have an item, perhaps, for the next meeting, and maybe it's an action item. There's been a lot of talk in the BCT meetings about the San Antonio River and working with the San Antonio River Authority, and -- and other groups. Is the San Antonio River contaminated? Is that the reason we're making this study with the San Antonio River?

BGEN. MURDOCK: I'd have to turn to BCT members and ask.

MR. QUINTANILLA: Well, I would like to hear something about that. What is going on in that area?

BGEN, MURDOCK: Okay. So you're asking about --

MR. QUINTANILLA: The San Antonio River, yes, sir.

BGEN. MURDOCK: Okay. I -- I -- We can

Page 138

priorities, gathering your inputs, seeing what sort of product, maybe, Gene can come up with, and spend some time to talk about how best to articulate those priorities.

We owe you, as we mentioned tonight, a status of the clean-up systems. And we'll do that in -- in the July time frame.

And then as was mentioned, we'll look forward to the TAPP presentation in the July meeting, also. So that's a relatively full Agenda as is, but I'm certainly open for any comments or suggestions for additional agenda items.

GEN. ROBERSON: Maybe we -- Maybe, we could include -- Maybe, I could give a -- just a real short update on redevelopment as it relates to any environmental issues.

BGEN. MURDOCK: Okay. Good. I think we'd appreciate that.

MR. HAGELTHORN: Well, since the next meeting would be my last meeting -- And, no, I don't expect a party or anything. But what I-really would like to see, before I leave, I'd like to see a Community Relations Plan. I know or, at least, I -- I -- I think one exists now,

certainly address that.

MR. QUINTANILLA: Thank you.

MR RICE: Something I mentioned earlier --

BGEN MURDOCK: I'm sorry, George. If we can provide an answer, say, in a documentation written documentation or do you want that as an agenda item?

MR. QUINTANILLA: Either way. Whatever is easier for you.

MR. RICE: Something that I mentioned earlier, but I'd just like to make sure it gets on the agenda is, you know, you have about 200 environmental documents that haven't been placed in the light, but you have them on base. And what is Kelly's policy regarding the public's access to those documents?

BGEN. MURDOCK: Okay. Any other ideas or comments for agenda items or action items, at this point?

MR. JACOBI: I'm assuming that Dr. Lene will include a report on the potential EPA funds since that would be --

BGEN. MURDOCK: Sure. We'll just include that, I think, John in the TRS

Page 143

Page 142

everyone the opportunity to review them before the meeting.

If there are no further comments or questions, I'd like to ask for a motion for adjourn.

> MR. JACOBI: So moved. GEN. ROBERSON: Second. BGEN. MURDOCK: Show of hands? (Show of hands.) BGEN. MURDOCK: So be it. (End of proceedings.)
