Excerpts from the Leon Creek Monitoring Program Final Report

"Based upon extensive data collected and evaluated in this study, there is no major or imminent environmental or human health risk associated with releases into Leon Creek from Kelly AFB....

"Although it is classified for contact recreation and as a potential drinking water source by the Texas Natural Resource Conservation Commission, Leon Creek is not in a natural, wilderness setting. It is an urban, channelized stream receiving stormwater runoff and drainage from residential and business areas....

"Occasional consumption of fish from Leon Creek is unlikely to pose an unacceptable human health risk."

**The Leon Creek Monitoring Program Final Report,
and all other Installation Restoration Program draft
and final documents, are available to the public at the:**

*San Antonio Central Library
Government Documents Section
