1	(CALL TO ORDER AT 5:01 p.m.)
2	MR. SUELTENFUSS: Let's go ahead and
3	begin the presentation. Great. Well, good. Good
4	evening, everybody. My name is Tim Sueltenfuss, I'd
5	like to welcome you to the Wurtsmith Restoration
6	Advisory Board. I'm from Galen Driscol, and I'll
7	serve as facilitator for tonight's meeting. Let's
8	first turn to our co-chairs for any remarks.
9	DR. VARLEY: Thank everybody for being
10	here today and for all of your participation.
11	MR. HENRY: I will echo that. Thank
12	you for joining us.
13	MR. SUELTENFUSS: Thank you very much.
14	That second slide so we have this hybrid format
15	for our meetings. A lot of work from a lot of
16	people, so I appreciate all of the effort to make
17	this happen, to have an in-person meeting that's
18	going on now and also the current virtual meeting.
19	We have a court reporter who is online
20	and capturing a verbatim transcript of tonight's
21	meeting, and this online meeting is also being
22	recorded.
23	So, RAB members who are here in
24	person, if you have any questions, then you can pose
25	that question the old-fashioned way by raising your
	ORS Court Reporting, LLC

QRS Court Reporting, LLC 800.308.0068

hand.

1

23

24

25

2 Let me just see if we have any RAB 3 members who are joining by computer. And do you see 4 anyone who has joined in? If you do, please raise 5 your hand electronically and then we'll call on you. Do we have any RAB members who are joining by 6 7 telephone, if you can raise your hand by pressing 8 star nine and lower it by pressing star nine; 9 un-mute yourself by pressing star six, and mute yourself that way. This will be a bit of a process 10 to show up on our display as a telephone number, so 11 12 when I call -- I'll call the last four digits of the 13 phone number. Then, you'll get a prompt automated voice recording saying to un-mute yourself or star 14 15 six, press star six, and then that voice recording 16 comes on yet again, just perhaps a confirmation to 17 say you are un-muted. So, I'll call on you and then 18 I'll wait ten seconds or so for that process. Let's 19 So, thank you for your patience. Next slide, see. 20 please. 21 Let's look at the RAB rules. We also 22 have a copy of this presentation, a hard copy for

those who are here, but let me just read off the RAB ground rules real quick. Respect one another and maintain an atmosphere of open dialogue and exchange

QRS Court Reporting, LLC 800.308.0068

1 of ideas. Two, to use our time together 2 efficiently, wisely and respectfully. Three, speak 3 clearly and succinctly, one person at a time. Avoid 4 interrupting others. Number four, listen and remain 5 open to different points of view. Number five, 6 maintain a propensity for progress; prepare, 7 discuss, document and move forward. Number six, 8 share information early, openly and honestly. And 9 seven, accurately and objectively relay to others 10 the discussions that occur at these board meetings. 11 So, RAB members, do those ground rules 12 work still? Any discussion? 13 MR. HENRY: That's correct. 14 MR. SUELTENFUSS: Great. All right. 15 Also -- let's see. Let's move to the next slide, 16 and we'll look at the agenda for this evening. Long 17 night tonight. Update stakeholder and RAB members 18 as we typically do, and then we'll review RAB 19 business items. So, that will be RAB operating procedures and action items. After that, we'll move 20 21 into the remedial investigation, interim remedial 22 action, and soil removal action update. Quite a bit 23 of time reserved towards the end of the meeting to 24 address RAB members' questions. All of those 25 portions to that point on the agenda, RAB members

QRS Court Reporting, LLC 800.308.0068

themselves. After that, the members of the public 1 2 can provide comments to the RAB in three minutes. 3 Let's see. 4 During the technical presentation, we 5 will take questions. 6 And let's now just go through and 7 confirm that we have a quorum. And so I'll just go 8 through the list, and if you can just indicate your 9 presence. Do we have Mr. Bill Gaines? 10 11 MR. GAINES: Present. 12 MR. SUELTENFUSS: Thank you, sir. 13 Mark Henry? 14 MR. HENRY: Here. 15 MR. SUELTENFUSS: Arnie Leriche? 16 MR. LERICHE: Present. MR. SUELTENFUSS: Joe Maxwell? 17 MR. MAXWELL: Here. 18 MR. SUELTENFUSS: Let's see. 19 How 20 about Daniel Stock? 21 MR. STOCK: Here, present. 22 MR. SUELTENFUSS: Thank you, sir. 23 David Winn? MR. WINN: Present. 24 MR. SUELTENFUSS: Cathy Wusterbarth? 25 QRS Court Reporting, LLC

800.308.0068

1	MS. WUSTERBARTH: Here.
2	MR. SUELTENFUSS: Thank you. So,
3	those are all of the community members. And then we
4	get to the government RAB members. We have Dr.
5	Catharine Varley.
6	DR. VARLEY: Here.
7	MR. SUELTENFUSS: And let's see. Do
8	we have anyone representing Au Sable Township? Eric
9	Strayer?
10	How about District Health Department
11	2? Or Michigan Department of Health and Human
12	Services?
13	And let's see. I see we have Beth
14	Place from the Michigan Department of Environment
15	Great Lakes and Energy.
16	MS. PLACE: Here.
17	MR. SUELTENFUSS: Welcome.
18	(Indecipherable.)
19	MR. UNKNOWN SPEAKER: Here.
20	MR. SUELTENFUSS: Thank you, sir. And
21	Oscoda Wurtsmith Airport Authority?
22	MR. MUNSON: Here.
23	MR. SUELTENFUSS: Thank you, sir.
24	Sorry to sequester you over in the corner there.
25	MR. MUNSON: That's fine. Story of my
I	ORS Court Reporting, LLC

I

7

life. 1 2 MR. SUELTENFUSS: And let's see, do we 3 have Jessie Stuntebeck here, or other representatives of the Forest Service? 4 5 Well, good. We do have a Okay. 6 quorum per the operating procedures. So, let's now 7 move to the next slide, if we could. Okay. And so 8 just a reminder here -- yes? 9 MS. UNKNOWN SPEAKER: I'm sorry, we're going to check our offline (inaudible). 10 11 MR. SUELTENFUSS: Yes. Yeah. That 12 was the intent there, so let me just check one more time to see if some of those who are not here in 13 14 person are with us online. 15 Do we have Ryan Mertz? And if you see 16 Ryan Mertz listed, please let me know. 17 And how about Eric Strayer or anyone from Au Sable Township? 18 And if so, if you're 19 online, please just raise your hand electronically. 20 MR. UNKNOWN SPEAKER: Do you have any? 21 MR. SUELTENFUSS: Jessie Stuntebeck 22 is? Okay. So, Jessie Stuntebeck with the USDA 23 Forest Service is on with us. Let's see. Do we 24 have Denise Bryan with District Health Department 2? 25 Yes? Okay. Great. Thank you.

1 And do we have Puneet Vij with 2 Michigan Department of Health and Human Services? Yes? Great. Okay. 3 4 So, just one more check then. Do we 5 have anyone from Au Sable Township, Eric Stayer or 6 others? 7 Well, great. I think we have Okay. 8 everyone but Eric Strayer and Ryan Mertz on that. 9 MR. LERICHE: If we could recognize a 10 couple other community RAB members in the audience 11 and maybe online. 12 MR. SUELTENFUSS: Sure. And, Mark, 13 would you like to do that? MR. HENRY: Great to see Greg. 14 15 MR. SUELTENFUSS: And we have Mr. Greq 16 Schulz, welcome. And let's see. I don't see anyone 17 else. Do we have Scott Lingo online perhaps? Or 18 Rex Vaughn? Rex is with us? Okay. Great. MR. LERICHE: And have we had 19 20 communication tested by the people running the online with those four or five that are on there? 21 22 DR. VARLEY: Yes, sir. We did a test 23 overall, so we should be able to hear everybody. 24 MR. SUELTENFUSS: Yeah, and let's just -- we can just verify that right now. So, let me 25

ask Denise Bryan with District Health Department 2, 1 2 could you just say a word or two just to make sure 3 that we are hearing you well? 4 MS. BRYAN: Good evening. This is 5 Denise Bryan with District 2. 6 MR. SUELTENFUSS: Okay. And for our 7 AV techs, if that audio can be enhanced a bit. And, Denise, I'm sorry, if you could say that one more 8 9 time. Good evening. 10 MS. BRYAN: This is 11 Denise Bryan, health officer with District Health 12 Department Number 2. 13 MR. SUELTENFUSS: Okay. All right. 14 Thank you, Denise, I appreciate it. And while we're 15 at it, let me just confirm that we have Puneet Vij as well. 16 So, maybe a bit of delay. 17 Do we have Puneet Vij with Michigan Department of Health and 18 Human Services? 19 20 MR. VIJ: Yes, I'm here. Sorry, I was 21 not able to un-mute myself. 22 MR. SUELTENFUSS: No problem at all. 23 Okay. So, it seems like we do have audio, we're 24 able to hear folks online and they're able to hear us as well. Before moving forward, let me also just 25

confirm that we have Quentina Snowden on the line, 1 2 Court Reporter? 3 THE COURT REPORTER: Yes, I'm here. 4 MR. SUELTENFUSS: Okay. Great. And, 5 Quentina, any time that you need to us stop and 6 clarify, please just jump in. 7 THE COURT REPORTER: Okay. Thank you. 8 MR. SUELTENFUSS: Okay. So, let's go 9 ahead and move to the next slide then, if we could, the stakeholder updates portion. 10 Okay. And the next slide as well. 11 12 So, we're now entering the stakeholder 13 update portion of the agenda. This topic is for RAB 14 members to provide brief updates. Let's begin with 15 the Air Force update and Dr. Varley. 16 DR. VARLEY: All right. So, I'd like 17 to introduce everybody to Steve Bolus, who is here 18 with us tonight. Steve, raise your hand. 19 All right. So, Steve is going to be 20 taking over a lot of the O and M, the operations and 21 maintenance, for our daily activities just to keep 22 everything up and running as far as equipment goes. 23 And that -- MMRP projects that I don't have time to 24 devote to. So, he's coming on board to help with 25 workload, and help balance out our programs and keep

QRS Court Reporting, LLC 800.308.0068

going like we have been, right? Trying to get work 1 2 done and trying to move this project and this 3 program forward. So, Steve is new to the team. 4 I also brought with me Janine Vaughn 5 So, Janine is a toxicologist for the Air (ph). 6 Her specialty is eco risk, and she is Force. 7 helping out with our project, she's been helping out 8 since the get-go, but I haven't had a chance to 9 introduce her to the team, but she's here with me 10 today. 11 I've also got Janet Anderson with us, 12 and she is our GSI toxicologist for risk assessment 13 and for the remedial investigation assessment. And 14 Janet and Janine were here earlier today. We did a 15 training on toxicology risk assessment and what that means to all of us. So, that's one of the pictures 16 17 that you see up there. 18 And then yesterday, we actually did a 19 site visit. So, for those of you who were able to 20 join us, you guys got to go out and see some 21 progress. So, we started the IRA. And I think 22 you'll see some more pictures of the dig and haul 23 for the concrete that was started, and we're getting 24 ready to backhoe. Any questions? 25 MR. SUELTENFUSS: All right. Thank QRS Court Reporting, LLC

800.308.0068

Let's see. Let's move to the next slide then 1 you. 2 if we could, and we'll kind of go down the list. 3 We'll start with community RAB members, and Mark, if 4 you don't mind starting us off. 5 MR. HENRY: Sure. The RAB has been 6 working on the operating procedures that we're going 7 to be discussing this evening. We did offer a few 8 suggestions about revising those to include all of 9 the RAB members, not primary and backup members. 10 Anyway, we've gone back and forth on 11 I've had a couple of technical discussions that. 12 with Catharine. Beyond that, we haven't done much. 13 We have had a few internal meetings and discussed a 14 few things, and that's about it. 15 MR. SUELTENFUSS: Thank you for the 16 update. Let's turn to Bill Gaines then. Any update? 17 MR. GAINES: 18 No. All right. 19 MR. SUELTENFUSS: Thank 20 Arnie, anything you'd like to share? you. 21 MR. LERICHE: Just one quick thing. 22 At the last RAB meeting at the break and afterwards, 23 I had a conversation with one of the Air Force 24 contractors regarding the information repository, 25 which is kept at the library, and that's where all

of the access help to the public will be there to 1 2 allow the public to understand and to see more 3 detail about the documents, actions, everything 4 that's going on. And it was a very great 5 conversation with Paula and Andrea. And with 6 changes in contractors, sometimes procedures are not 7 maintained. I want to thank them for stepping up and making a significant effort into upgrading that 8 9 information repository, which had kind of gone down in adequacy for the last 18 months, almost two 10 11 So, I want to thank them for that. vears. 12 I hope that in the near future, we can 13 close the loop between what they've put together and 14 what the expectations of the community RAB and the community in general might be if there's some other 15 things that would help the community understand, 16 agree and double check after a meeting like this, go 17 to the library, check out the documents that are 18 being discussed here. 19

20 So, if there's any input to us, I 21 would hope that they would contact any of the 22 community RAB or Mark, and we would try to work 23 with -- we would work with the Air Force to make 24 those improvements. So, I want to thank you guys 25 for that effort.

1 MR. SUELTENFUSS: Thank you, Arnie. 2 And let's turn to Mr. Joe Maxwell. Any updates? 3 MR. MAXWELL: Well, I just got one 4 thing, and that is yesterday, the EPA finally asked 5 the science division to come up with a health 6 advisory (inaudible) as of yesterday. 7 MR. SUELTENFUSS: Great. All right. 8 Thank you for that update. And let me just check 9 one last time to see if Ryan Mertz is with us on the 10 computer or on audio. 11 Okay. Mr. Stock, any updates? 12 MR. STOCK: Nothing. 13 MR. SUELTENFUSS: Okay. Thank you. 14 And David Winn? 15 MR. WINN: Not at this time. 16 MR. SUELTENFUSS: Cathy Wusterbarth? MS. WUSTERBARTH: 17 Yes. We -- a group 18 of community members met with the Governor earlier in the month and -- just to talk about the cleanup 19 20 and its challenges, of course. There's some images 21 in the back in the foyer there that we presented to 22 the Governor also just to kind of get her up to 23 speed on what's going on here. 24 We also -- some members of the 25 community launched a Great Lakes PFAS Action QRS Court Reporting, LLC

800.308.0068

1 Network, which will attempt to assist other 2 communities in Michigan and the Great Lakes region 3 in terms of PFAS contamination, and we're hoping 4 that this outreach will touch some military sites in 5 the region, so that's an effort that this community 6 has (inaudible). That's what I have. Thank you. 7 MR. SUELTENFUSS: All right. Thank 8 So, let's move to our remaining you. Okay. 9 government RAB members for updates as well. Let's turn to Jessie Stuntebeck with USDA Forest Service. 10 11 Jessie, any update that you have? 12 MS. STUNTEBECK: Hi, are you guys able 13 to hear me? 14 MR. SUELTENFUSS: Yes. 15 MS. STUNTEBECK: Okay. Great. So, on 16 behalf of the Forest Service, I just want to say we appreciate all the communication from the Air Force 17 18 on what's been going on and what they've all been 19 working on. We're still in the process of reviewing 20 the draft that we got a couple months ago. I've 21 participated in the earlier conversation this 22 morning regarding toxicology and the risk 23 assessment, appreciated that a lot. I look forward 24 to participating in that as needed from the Forest 25 Service. So, that's all I have from us.

1 MR. SUELTENFUSS: Jessie, we 2 And let's turn to Beth Place with appreciate that. 3 Michigan EGLE. 4 MS. PLACE: Thank you. EGLE has been 5 getting our facts checked on Air Force PFAS 6 (inaudible) comments to Air Force back at the end of 7 May, early June, and that Air Force responded to our 8 comments. And we plan to conduct our fact check 9 with responses by the end of November. That's our 10 plan. We held a town hall meeting on November 3rd 11 and provided several updates. November 14th 12 (inaudible) posted on the website, web page at 13 Michigan.gov/Wurtsmith shortly, if it's not there 14 already. And we also will be updating that website 15 in the near future with photos that we've been taking while we've been performing oversight for the 16 17 PFAS ROI, so the majority of the time, we have a 18 representative, either our -- one of our contractors 19 or us on site. Our contractors will be slowly 20 providing that information online so folks can have 21 access to that. And I'll shoot out an e-mail to the 22 Wurtsmith subscriber list when we do that. The other things that we have been 23 24 doing in addition to oversight, we've been 25 collecting quality assurance samples while we're

QRS Court Reporting, LLC 800.308.0068

performing oversight. And so as we're obtaining those results, we'll be sharing those with Air Force, and potentially we're still working on the processes there, so we'll be posting those for public as well.

6 And in addition to that, we had --7 EGLE had submitted a request to Air Force, and this was something that was discussed at November 3rd 8 9 town hall meeting for MPART, and we had submitted a request for an additional interim remedial action to 10 11 the Air Force, and we have not yet received a 12 response on that. And that request was made back in March 23rd of 2021. And so our division director 13 14 will be following up with Dr. (Indecipherable) in 15 the near future on that issue and likely submitting 16 another request in writing as well. Thank you. 17 MR. SUELTENFUSS: Okay. Thank you, Okay. 18 Beth. Mr. Mike Munson, let's go to Wurtsmith

19 Airport Authority.

1

2

3

4

5

20 MR. MUNSON: I got five bullet points 21 I'd like to go over. Our airport manager has 22 informed the board that he wants to retire, so we've 23 been working with HR looking for a replacement. The 24 space for licensing activities is ongoing, it's very 25 complicated, but we're making progress. The new

1 hangar construction is progressing. We are -- the 2 board is looking to revise the airport layout plan 3 due to some upcoming proposed project. 4 And last, but not least, the fence, 5 the perimeter fence, is a security measure. We've 6 had some trees causing some issues there, so we've 7 hired a lumbering company to trim those back so it 8 doesn't damage the fence. Thank you. 9 MR. SUELTENFUSS: You are a man who knows how to give a briefing. 10 That could fit on a 11 two-inch by three-inch card. 12 MR. MUNSON: Yes. Yes. Well, I 13 mentioned that I (inaudible). 14 MR. SUELTENFUSS: (Inaudible). 15 MR. MUNSON: Yes. MR. SUELTENFUSS: All right. 16 Thank 17 you. MR. MUNSON: Uh-huh. 18 19 MR. SUELTENFUSS: Okay. Just checking 20 in, do we have anyone from Au Sable Township that 21 has joined since we started? 22 Okay. Let's turn to Puneet Vij with 23 the Michigan Department of Health and Human 24 Services. Any update, Puneet? 25 MR. VIJ: Yes. So, for the

residential well resampling update in this current 1 2 round two --3 MR. SUELTENFUSS: And actually, if you could hold one second, let me ask our AV techs to 4 5 try to boost the volume there if we can. 6 MR. VIJ: Sure. 7 MR. SUELTENFUSS: Stand by just one 8 second and we'll get back at you. 9 MR. VIJ: No problem. MR. SUELTENFUSS: I'll wait for the 10 11 thumbs up from them. All right. We've got the 12 thumbs up. So, Puneet, back over to you. 13 MR. VIJ: Okay. So far, residential 14 well resampling in the current round two; we 15 collected samples from 280 wells, and out of these, we had is 147 non-detection and 133 detection. 16 And out of these 133 detections, there are 19 detections 17 that exceeded the (inaudible) competitive value. 18 And then related to deer and fish sign 19 20 replacement, the revised sign replacement will be completed soon. 21 22 MR. SUELTENFUSS: All right. Okay. 23 Thank you. 24 MR. VIJ: Okay. I was just asking, I 25 hope I was loud enough.

1 MR. SUELTENFUSS: Yeah. And Puneet, 2 we had a little bit of difficulty. I wonder --3 let's see. Let me ask if any of our support staff 4 can shoot Puneet an e-mail, and -- or Puneet, if you 5 could just shoot an e-mail to me, I think you have 6 my address, if there's anything you'd like to us 7 include in the -- the transcript of the -- of the 8 meeting. Okay. Thank you, Puneet. 9 And let's turn to Mr. Cummings with 10 Oscoda Township. 11 MR. CUMMINGS: Thank you. And I just 12 wanted to mention a reminder to some folks who've 13 been in this RAB the longest and are muted, that 14 some years ago, we had engaged the Air Force 15 (inaudible) service sewer or water and (inaudible) 16 services get rid of that water (inaudible) by the And it's been a topic of concern for some time 17 qap. 18 We're only in negotiations at this point after now. 19 there was an agreement to actually be paid to the 20 Township for that storm sewer usage -- I'm sorry, 21 storm drain usage. And so I wanted to just find out 22 from Dr. Varley and anyone else at the Air Force, 23 what is the status on this negotiation? But it's 24 certainly a protracted state, and we'd like to know 25 when this is going to come to a close.

QRS Court Reporting, LLC 800.308.0068

1 DR. VARLEY: So, we are currently 2 working with the Township, as you know. Tammy, 3 myself and Dan have all met several times. We 4 talked about how we can partner together to make 5 everything work better. We do not expect to be 6 using the storm water for forever, but we do want to 7 help fix the solution. So, we are working with our 8 leadership to figure out what we can do and how to 9 move forward. The Township did provide us a letter, 10 and that is something that is undergoing review 11 right now so that we can figure out the best path 12 forward. So, we are making progress. We're not 13 stopping. 14 MR. CUMMINGS: Good. And thank you 15 I don't really like the constant change for that. 16 after that agreement occurred, but I appreciate 17 knowing that something is in progress. And so we 18 don't need to (inaudible) that here, that's not the purpose of this meeting, but I -- I appreciate your 19 20 answer on the spot. 21 DR. VARLEY: Thank you. 22 MR. SUELTENFUSS: All right. Thank 23 you, sir. And let's see. Over to Denise Bryan with 24 Department of Health District 2. 25 MS. BRYAN: Local public health does

1	not have any updates this evening, but thank you.
2	MR. SUELTENFUSS: Okay. All right.
3	Well, thank you very much. And I see you're one
4	step ahead of me. Let's go ahead and move to that
5	next slide, RAB business update. So, we're now in
6	the RAB business portion of the agenda, and I think
7	there's one more slide in this section, if I
8	remember correctly. Yeah. So, we'll talk operating
9	procedures and action items as well.
10	As Mr. Henry mentioned, the RAB
11	members have been looking into possible changes to
12	the operating procedures. The operating procedures,
13	again, kind of serve as the constitution for the
14	group, they tell us our procedures and our policies,
15	and how we run meetings and so on. And I think we
16	are ready to vote to adopt those new operating
17	procedures.
18	So, we would need concurrence from
19	both the co-chairs and a majority of the RAB
20	members. We have let's see that would be over
21	51 percent of RAB members present, so that would be
22	eight of us. Let me just first turn to the co-chair
23	to see if there's anything else you'd like to say
24	before we have that vote by show of hands. Anyone?
25	Yes?

I

QRS Court Reporting, LLC 800.308.0068

1 MR. HENRY: We've been going back and 2 forth on this. The last revisions were made today. 3 But looking over those revisions, I have no harping 4 with it, I think we can move forward. 5 MR. SUELTENFUSS: Okay. 6 Yeah, I'm impressed by, DR. VARLEY: 7 you know, the amount of work that went into these, 8 and Mark's due diligence, making sure that 9 everything that we are doing now is actually 10 incorporated into these procedures. So, this is how 11 we have been operating in many respects. 12 MR. SUELTENFUSS: And, Dr. Varley, you e-mailed these out to all the RAB members earlier 13 14 today and they're also in hard copy now. So, let me 15 just see if we can go ahead and -- can we move 16 forward with a vote by show of hands? Yes, please qo ahead. 17 18 MS. WUSTERBARTH: Yeah. I'd just like 19 to request that the co-chairs maybe just touch on 20 some of the things that were changed from the prior. 21 MR. HENRY: I -- I haven't seen an 22 e-mail today. 23 MS. WUSTERBARTH: Well, I don't mean 24 necessarily the final version, but from the first 25 version to this version, what -- you know, just to

1 give some idea of what was updated. 2 DR. VARLEY: So, the big things -- big 3 rocks for me, at least, were the communications have 4 been added in. So the e-mails, the updates, the 5 moving forward as a team together, is all in there 6 now. 7 Also -- let's see. We also updated 8 all of the links so that what goes up on the AR is 9 incorporated, and what goes onto the website is incorporated on that, and provides those links as to 10 what they are today. 11 Mark, anything else 12 MR. SUELTENFUSS: 13 come to your mind, major changes --14 The original operating MR. HENRY: 15 procedures that the RAB was utilizing had the whole notion of -- of primary and back up numbers. 16 And that has been removed from this version. All of the 17 18 RAB membership will, in essence, be primary members 19 now. Yes. 20 The original operating procedures were crafted around the situation at Wurtsmith. 21 These 22 operating procedures were originally crafted for 23 Pease Air Force Base, and they were modified to work 24 here at Wurtsmith. And in comparing the two 25 documents, this current document seems to cover all

of the bases that the original one did, and fixed 1 2 that primary membership thing. There were a few 3 things that were left out, but I don't see them as 4 being consequential. 5 MR. SUELTENFUSS: Cathy, does Great. 6 that address the question? 7 MS. WUSTERBARTH: Yeah, thanks. 8 MR. SUELTENFUSS: Any other questions 9 from the RAB members on this? So, I just learned this 10 MR. LERICHE: 11 today that there was confirmation from Catharine 12 that the copying or using Pease RAB operating 13 procedures that was approved in 2017 is now a 14 template, and it was mentioned three years ago that 15 the Air Force wanted to have a more standardized review of operating procedures, but it never moved 16 17 past that. 18 So, I hope that if that is what's 19 happening across the nine RABs in the BRAC and maybe 20 even the active, that the communication will happen 21 and you'll bring some of that information to us, how 22 that's being implemented across all of the -- the 23 Air Force at least, contamination sites where there 24 are RABs so that we don't fall behind and that we're 25 being recognized and treated in the same fashion.

So, I trust that that's going to happen. So, I'm 1 2 going to vote yes. 3 MR. SUELTENFUSS: Well, good. Arnie, 4 you kind of beat me to it. Let me just ask --5 first, we'll do it with the RAB members who are 6 present in person here. I'll ask by show of actual 7 physical real life hands, do you agree to adopt 8 these RAB operating procedures. 9 So RAB members, do you agree to adopt these RAB meeting procedures? Let's see. 10 Please 11 keep those up. Yeah, actually there's not a 12 restriction in the current RAB operating procedures. 13 Yes. 14 One, two, three, four, five, Okay. 15 six, seven, eight, nine, ten. Okay. And so, I have 10 of the 11 of us who are here in person voting for 16 that. 17 Let me just confirm then. 18 Puneet, do you vote to adopt the RAB operating procedures? 19 20 MR. VIJ: Yes. 21 MR. SUELTENFUSS: And I'm sorry, can 22 you state that one more time, Puneet? 23 MR. VIJ: Yes. 24 MR. SUELTENFUSS: Okay. Great. So, 25 that's 11. Thank you.

1 And to Denise Bryan? 2 MS. BRYAN: Yes. 3 MR. SUELTENFUSS: Okay. That's 12. 4 Then USDA Forest Service, Jessie Stuntebeck? And, 5 Jessie, are you able to respond? Are you -- do you 6 support adopting the new operating procedures, 7 Jessie? 8 MS. STUNTEBECK: Yes, I do. 9 MR. SUELTENFUSS: Great. Okay. So, we received 13 affirmative votes. We needed eight, 10 11 which was over 51 percent of the RAB members. So, 12 these new operating procedures are adopted. 13 Co-chairs, would you like to go ahead and sign these 14 now? 15 DR. VARLEY: Mark, you want to sign? 16 A copy for you and a copy for me. 17 MR. HENRY: Sure. 18 MR. SUELTENFUSS: Thank you all very 19 much. Bear with us for those on the phone while the 20 actual signing occurs. 21 Congratulations. I feel like I should 22 keep the commemorative pen. It was yours to start 23 with, so -- okay. 24 Well, so now that we have new 25 operating procedures established, we can proceed to QRS Court Reporting, LLC

800.308.0068

appoint, Rex Vaughn, Greg Schulz and Scott Lingo as 1 2 community RAB members. Co-chairs, anything to say 3 on that front? Welcome aboard. 4 MR. HENRY: 5 DR. VARLEY: I am working on the 6 paperwork. So, thank you, guys. 7 MR. SUELTENFUSS: Congratulations. Let's move to action items real 8 Okay. Let's see. 9 Action times. So, the co-chairs met quick. following the last RAB meeting and reviewed action 10 11 There are currently 13 open action items, items. 12 and I believe the standard process is for the 13 co-chairs to meet again following this RAB meeting 14 and review action items as well as the future agenda 15 items and so on. Any -- any discussion the co-chairs would like to have about action items? 16 17 MR. HENRY: Nothing comes to mind. 18 DR. VARLEY: Working through them. 19 MR. SUELTENFUSS: Okay. So before we 20 move off of the RAB business update, any other RAB 21 business that we should discuss before we move on to 22 our presentations? 23 Okay. Well, good. That was a lot. 24 Thank you all for your patience with that, especially in this hybrid format. Let's move to 25

that next slide then, if we could. And we will move 1 2 into the Air Force technical presentation, and Paula 3 Bond with Aerostar will present. And Paula, you 4 can --5 MS. BOND: (Inaudible) new organization and trying to get everybody situated, 6 7 so --8 MR. SUELTENFUSS: Also, just a note to 9 all of the support staff, if there's any adjustment you need us to be making, feel free to just jump up. 10 11 MS. BOND: I think I'll stand over 12 here. Can you guys hear me? Is this thing on? 13 Check? Okay. Hopefully everybody that -- don't look 14 15 at me, look at the slides, but -- I'd like to thank everybody for coming out tonight. It's kind of a 16 cold and miserable night here in Oscoda, but thanks 17 18 everybody for joining us online to celebrate some -- you know, we've got some great news and 19 20 successes to talk about tonight as far as progress on site. So, I'll just kind of give everybody an 21 update on where we are on the RI fieldwork, the IRAs 22 23 that we're working on, and then the soil removal 24 action that we just completed. So, if you guys could move to the next slide for me. 25

So, under the RI process -- so, I'll 1 2 just give you a quick update here on the slide. And 3 you can see that the RI scoping work is complete. 4 The UFP-QAPP is still ongoing. We're still working 5 with EGLE on finalizing that document. The risk 6 assessment work plan is still ongoing, we're still 7 working on that with EGLE as well. The field data 8 collection is ongoing, and I'm going to talk a 9 little bit more about that as we go along. And just 10 to kind of let everybody know, I think most of you 11 that came in, we have some posters set up in the 12 back of the room. Some of the data that we've 13 collected so far during the RI fieldwork is 14 displayed on the posters, so we'll be happy to talk 15 with anybody about that data or information that 16 we've presented on the posters after the RAB as well. 17 And then the last thing on this slide 18 19 is the RI report. Obviously, we haven't finished 20 the fieldwork, so we're not to the RI report yet. 21 And as we move through these different tasks, the 22 colors on the bubbles will change to designate 23 ongoing complete activities and -- as we move 24 forward. Next slide, please. 25 So, we'll talk a little bit about the

QRS Court Reporting, LLC 800.308.0068

IRA for FT002 at Clark's Marsh. The folks that were out yesterday that did the site walk with us were able to see some of the progress that we've made out there.

1

2

3

4

5 We have started prepping the site for the addition for the building expansion for the 6 7 pre-treatment system that's going to be installed 8 out there, so we've got that kicked off. Obviously, 9 everyone knows it's wintertime, not the best time to 10 start a construction project, but we're moving forward and trying to get that expeditiously moving 11 12 forward as we can, and get as much done before the 13 weather turns really cold on us. But, we're excited 14 about that, so that, you can see.

15 I've got some photos of that coming up 16 here too, but -- so the scoping is complete, the 17 proposed plan is complete. We've been through this 18 The ROD is complete. The remedial design process. 19 The work plan is complete. So, all is complete. 20 that's left now is to implement that action so all of our circles are -- all of our bubbles are blue on 21 22 this slide. Next slide, please.

23 So Van Etten Lake, it's a little bit 24 different story. That one is running a little bit 25 further behind than the Clark's Marsh. Still on

1 schedule, but the IRA scoping is complete, the 2 proposed plan is complete, and we've got a couple of 3 other following tasks; interim record of decision, 4 the remedial design, and the IRA work plan, those 5 are all undergoing Air Force review currently. So, 6 we hope to get those over to EGLE very soon, and 7 this -- the schedule for Van Etten Lake is to start 8 that work later in the spring once all of these 9 documents are signed and -- and we get approval, 10 those will move forward. Next slide, please. 11 So, just a little more detail on the 12 fieldwork update for the RI. Like I said, we have 13 posters in the back that kind of demonstrate some of 14 the -- or illustrate some of the data that we've 15 collected so far. Step one in our fieldwork process 16 was to sample existing groundwater wells at the site that had not previously been sampled for PFAS. 17 We 18 started that back in July, we finished a few weeks 19 ago in October, and we sampled 96 existing wells out 20 there that hadn't been sampled for PFAS before. 21 So, we fed that data into the next 22 step, number two -- or sorry, next step number --23 sorry, I'm out of whack -- step number three, but

been soil sampling out there since August. We've

24

25

QRS Court Reporting, LLC 800.308.0068

step number two was the soil sampling. So, we have

collected over a thousand samples from 231 1 2 We're very close to being finished with locations. 3 the soil sampling and we have to finish that up in But, the data that we 4 the next week or so. 5 collected from the groundwater well sampling is 6 feeding into step three, our vertical aquifer 7 sampling locations. And to decide finalized 8 locations for those, where we may want to go, we 9 completed that back in September with SPP meetings 10 with EGLE, and we have began the bass sampling in 11 September, and so far, we've sampled 16 12 locations and we've collected in the neighborhood of 13 100 samples so far. All of our RI fieldwork is still 14 15 ongoing. The bass sampling, we're continuing. 16 Right now, our plan is to work probably up through 17 Christmas. If we get weather that's good enough, 18 we'll keep going, but we'll just kind of have to 19 wait and see on that, but right now, the plan is to 20 continue bass sampling through December. We won't 21 be finished with the fieldwork at that point if we 22 stop for winter weather. We will still have work to 23 be done next spring when the weather clears up for 24 us. So next slide, please.

So, I'll focus a little bit on FT002

QRS Court Reporting, LLC 800.308.0068

25

at Clark's Marsh. Like I said, we did the site walk 1 2 yesterday, and I've got a couple of figures here 3 that kind of show the -- where the site is today for 4 those of you that weren't able to come out, but site 5 work began on October the 14th, and then we started 6 grading and just preparing the site for the concrete 7 slab for the addition. We got the underground 8 utilities installed out there, we got mechanical and 9 electrical, and in one of the photographs here, you can see some of the plumbing that's sticking up. 10 11 Those are the pipings from the extraction wells that 12 we're going to put in. That's where they're going to come into under the slab. And we installed a few 13 of the performance monitoring wells for the 14 15 treatment system that we knew the locations where 16 those were going to go, so we're trying get as much 17 work as we can done this year. So, that's kind of where we are with FT002 at Clark's Marsh. 18 Next slide. 19

20 So, the next thing in the fieldwork 21 that we're looking at -- this is really exciting, I 22 think -- is the soil removal action at FT002. So, 23 we just completed this last week. We started out 24 there on October the 13th. We have removed 24,000 25 -- I think I have this on the next slide, but --

QRS Court Reporting, LLC 800.308.0068

over 24,000 tons of soil. We've got some pictures 1 2 here on this slide, and you can kind of see where 3 the fire training area was, and there was a concrete 4 pad that was at the fire training area, and that was 5 removed back in the spring. 6 So, when that pad was removed, it kind 7 of provided an opportunity for some -- that exposed 8 soil to increase leeching from -- from the surface 9 down to the groundwater. So, that was the rationale 10 for implementing this -- this soil removal action. Next slide, please. 11 So like I said, over 24,000 tons of 12 soil we removed from FT002. 13 The soil was 14 transported to the U.S. Ecology Hazardous Waste 15 Landfill down in Belleville, Michigan. But I do want to make the important distinction that even 16 17 though we are transporting this soil to a hazardous 18 waste landfill, this waste is not a hazardous waste, but we are storing it or disposing of it in a 19 20 hazardous waste landfill. And we're doing that just 21 as a conservative approach at this point, because 22 that landfill is made for higher toxicity chemicals 23 so that they don't leech into the groundwater, so 24 that's kind of why we chose that method. Next 25 slide, please. Just a little bit too far. I was

QRS Court Reporting, LLC 800.308.0068

almost finished.

1

25

2 DR. VARLEY: While we're waiting for 3 our reset -- so the big reason why we -- so the cap 4 came off, the pad came off, which allowed us to 5 actually do sampling. The sampling showed us high 6 concentrations and the probability of leeching. The 7 probability of leeching in the proximity to Clark's 8 Marsh was the reason we're doing the time-critical 9 removal action this year before we have snow and 10 everything else going right through all of that. 11 So, we pulled off -- in, what, 30 days, we removed a 12 concentration equal to or greater than what we've 13 removed from the FT002 treatment system that's been operational since 2015. So -- and that's rough 14 15 calculations at this point. 16 MS. BOND: Yeah. So the excavation --17 we finished excavating, like I said, last week. We are ready to backfill, and we'll start doing that 18 19 either later this week or early next week. As most 20 of you know, this is hunting season and there's not 21 a lot of work getting done up here right now. So, 22 we'll start backfilling the hole and we hope to have 23 that done in just a couple weeks. So, that action 24 will be done. Just here's some photos of the

QRS Court Reporting, LLC 800.308.0068

excavation, some of you got to see that yesterday.

But it is -- it's an impressive excavation, and we 1 2 did a lot of work in a very short period of time, 3 and that's thanks to a great team of people working 4 on that. So, I think that's a great success for the 5 Air Force, and we're happy to be a part of it. And I think that is all I have. Next slide, maybe this 6 7 is the schedule. 8 So, this is just the updated fieldwork 9 timeline that I present at all of the RAB meetings. This one is a little difficult to read on the slide 10 11 there, because it's a little faded, but everything -- we've added the removal action on here. Clark's 12 Marsh -- FT002 at Clark's Marsh IRA has been 13 started, like I said, so that is on the schedule. 14 15 Van Etten Lake at Ken Ratliff Memorial 16 Park, that IRA, as we have moved that, pushed that to start in the spring after those documents that I 17 18 mentioned get signed. So, we'll start that off in 19 the spring, but everything will be done by the end 20 of next year, by the fall of next year, for the IRAs and the RI fieldwork. And that is all I have. 21 22 MR. SUELTENFUSS: All right. So, any 23 questions from the RAB members? 24 MR. WINN: I've got a whole list. Can I start? 25

1	MS. BOND: You get five minutes.
2	MR. WINN: Thanks, Paula. First
3	question, you said the FT002 is not scheduled, it's
4	all new equipment has all been purchased and
5	everything is
6	MS. BOND: Yeah, we've got everything.
7	The building is already there (inaudible) is
8	there
9	MR. WINN: Do you foresee any time
10	issues or
11	MS. BOND: No. Everything has been
12	ordered. So, we're like I said, you know, doing
13	this in the winter was not our original plan. We
14	would much rather have started it, you know, back in
15	the summer, but everything has been ordered, it's on
16	its way, so we're going to be working through the
17	winter to get that everything in there, get it
18	finished.
19	MR. WINN: Air Force IRA schedule.
20	The initial schedule that you guys had back in
21	September showed a start date of 9/1 with a
22	completion date of August 22nd. This new schedule
23	now shows $11/17$ with a finished date of $10/22$.
24	Before, it was nine months. Now, it's seven months.
25	MS. BOND: Is that you're looking
	ORS Court Reporting, LLC

at Clark's Marsh? 1 2 MR. WINN: No. That's the Air 3 Force beach. 4 MS. BOND: Oh, Van Etten Lake, yeah. 5 MR. WINN: Yeah. 6 MS. BOND: Yeah, so --7 MR. WINN: Is that -- I mean, it looks 8 like it slipped out, because obviously you guys had 9 some --Everything took a little 10 DR. VARLEY: 11 So, I was going for best case scenario. bit longer. 12 This is me. I push everybody as hard as I can, and 13 I apologize to Paula all the time, because I push 14 until the fact that we just can't do it. 15 MR. WINN: Okay. DR. VARLEY: So I pushed, and pushed, 16 17 and pushed, and that's one project that we just 18 couldn't get done by winter, so --19 MR. WINN: Okay. That's fine. DR. VARLEY: It will start next field 20 21 season. 22 MR. WINN: My question is, you 23 initially had it laid out for nine months. 24 MS. BOND: Right. So --25 The new schedule now shows MR. WINN:

1 seven months. 2 MS. BOND: Right. So now --3 MR. WINN: Is that because you 4 purchased equipment? 5 MS. BOND: Yeah. Yeah. Things are 6 ready to go, we're lining everything up. And 7 because we're starting --8 MR. WINN: Okay. I just --9 MS. BOND: -- starting earlier in the 10 spring -- so before we had it laid out on the 11 schedule, a lot of that work was being done in the 12 winter, which just slows things down, so now it will all be done in better weather so we can compress 13 14 that schedule, and our materials --15 MR. WINN: So now you -- you should feel comfortable with this current schedule you 16 have. 17 18 MS. BOND: Yeah, I do. DR. VARLEY: Yeah. 19 20 MR. WINN: Okay. Clark's Marsh ROD. 21 You stated in here the ROD is complete. 22 MS. BOND: It is, yes. 23 MR. WINN: But there are still a lot 24 of unresolved issues, you know, between EGLE and Air 25 Force. When do those issues get resolved?

DR. VARLEY: Yeah, of course. 1 First 2 of all, Air Force is the lead agency. 3 MR. WINN: Yep. 4 DR. VARLEY: We went through and we 5 resolved as much as we possibly could, and we got it 6 signed so that we can move forward and start work. 7 MR. WINN: Okay. 8 DR. VARLEY: So, that's where we are 9 with it. We will continue to answer EGLE's questions and do what we need to do to make sure 10 11 that we're trying to build that relationship and 12 gain some more consensus as we continue our projects 13 together. 14 Okay. MR. WINN: But --15 DR. VARLEY: But the ROD is finished, our ROD. 16 17 MR. WINN: So, those unresolved issues could remain unresolved? 18 19 I'm expecting still a DR. VARLEY: 20 letter from EGLE providing their concurrence and 21 whatever else -- because we did come to an 22 agreement, right, Beth? 23 MS. PLACE: Yeah. So, we had a 24 meeting on Friday to discuss one of the main issues 25 still outstanding from the ROD, so you do have a

1 signed ROD there. EGLE hasn't provided our 2 concurrence letter yet, and we do have that meeting 3 on Friday to discuss the threatening state --4 threatened and endangered species with the Clark's 5 And so I'm hoping from that meeting that Marsh IRA. 6 that issue can be resolved, and that's really one of 7 the -- the main issues.

The other kind of outstanding comment 8 9 was on performance monitoring. In the performance 10 monitoring comments that we made, we also made one 11 that FT002 system was installed. And so Air Force 12 did, you know, make changes based on EGLE's comments, but there are still some that were not 13 14 incorporated, and I figured those are just going to 15 be documented then, they weren't incorporated. But the state threatened and endangered species I 16 imagine will be resolved. 17

18 MR. WINN: Okay. So, both of you are 19 kind of in agreement with what needs to be done?

20 DR. VARLEY: Yeah. We both want to 21 move this project forward.

22 MR. WINN: Okay. All right. ARARs. 23 Are ARARs going to be included as part of --24 DR. VARLEY: They were in the IROD and

they were sent out to everybody in that document.

25

QRS Court Reporting, LLC 800.308.0068

1	MR. WINN: Okay. Okay.
2	DR. VARLEY: So, that's discussed and
3	determined by our lawyers, it does not happen at our
4	level. They can get consensus, and EGLE provided us
5	a letter, or your AG provided us a letter, and
6	that's what finalized so we can move forward and
7	start work. On the 11th, we started mobilization
8	with the signature.
9	MR. WINN: Okay.
10	MR. LERICHE: Excuse is that letter
11	because you referenced that in an e-mail you sent
12	us about a month and a half ago. Is that letter
13	from the AG to the Air Force been shared publicly?
14	DR. VARLEY: I can share it. I was
15	waiting for Beth's letter from EGLE's letter as
16	well to be able to put them together, but
17	MR. LERICHE: And in a minute or less,
18	would it allow you to do, what did they say?
19	DR. VARLEY: It's allowed us to it
20	was more or less agreement on the ARARs, that's what
21	it was.
22	MR. LERICHE: Well, that's pretty
23	generic
24	DR. VARLEY: That's it.
25	MR. LERICHE: Agreement on the list of
	ORS Court Reporting. LLC

the ARARs that they submitted to you, you have now 1 2 accepted that same list? 3 DR. VARLEY: That are a part of the 4 IROD, yes. 5 Including the five new MR. LERICHE: 6 PFASes? 7 DR. VARLEY: No. That is not in the 8 ARARs. 9 MR. LERICHE: But it does for the 10 PFOA/PFAS, you agreed to that? 11 DR. VARLEY: It's all there in the 12 IROD. You can read it. I sent out --MR. LERICHE: And we haven't received 13 14 that yet --15 DR. VARLEY: Yeah, you have gotten the IROD. 16 17 MR. WINN: You've agreed? DR. VARLEY: 18 Yes. MR. WINN: Okay. All right. 19 I want 20 to -- the FT002 soil removal, I want to -- I want to 21 make a comment. I looked at what you got over 22 To me, first off, I want to thank and your there. 23 entire crew for motivating or initiating that 24 removal. When I look at that chart over there and I 25 see the high levels of PFAS, and everybody in this

room has always talked about get rid of the source, 1 2 get rid of the source, that, to me, is -- in 30 days, you guys have done a heck of a job getting 3 rid of what I would consider a source. 4 And I want 5 to know when is the next hole going be dug? I'd like to know that 6 DR. VARLEY: 7 too, sir. 8 MR. WINN: Who do we have to talk to 9 to get the next hole dug? 10 DR. VARLEY: So, what we need to do is we need to keep working on our program and planning, 11 12 and we'll do that, and I'm glad that you support it, 13 so --14 Whatever this group -- I MR. WINN: 15 mean, as far as I'm concerned, whatever we need to 16 do as a community to help push this along to get rid of all these sources, amen, I'm ready for that. 17 And if we got to get ahold of President Biden, we'll do 18 19 Hey, I'm that serious. I mean, this is great that. 20 stuff. This is stuff that should have been done years ago, but I'm really, really appreciative of 21 22 the fact that you guys have took the initiative in 23 order to do it and, like I said, I mean I can see by 24 the -- the grass there out there, there are other 25 holes that need to be dug, so -- kudos.

1	DR. VARLEY: Thank you.
2	MR. WINN: My last one is the latest
3	well the latest residential well sampling that
4	Puneet just talked about. There were approximately
5	120 114 wells that showed detection, of which 19
6	were over at mcLs. And, Paula, I would hope that
7	EGLE or MDHHS would share that data and those
8	locations with you so that you guys can understand
9	where those detections were, because I'm going to
10	say this again, my guess is they're on the southeast
11	part of the lake. So, it would be nice for
12	Puneet, if you're listening, I would sure hope that
13	you would share that data as well as a map or
14	something to the Air Force that shows that
15	information.
16	MS. BOND: Yeah, EGLE has been really
17	good about providing that data.
18	MR. WINN: Okay. My last question:
19	BCT meeting minutes. I have no July, no August, no
20	September, and no October. I'm finding out that
21	and we can sit in these RAB meetings, and I can find
22	out more information from the RAB meeting than I can
23	from the BCT minutes, because they're so outdated.
24	Where does this
25	MS. PLACE: So July, we have the
	QRS Court Reporting, LLC

800.308.0068

August meeting in September, and then we have the 1 October meeting at the end of October --2 3 MR. WINN: Okay. 4 MS. PLACE: -- and those are all still 5 It was difficult getting access to the with me. 6 recordings again --7 Okay. So, when would you MR. WINN: 8 have them to where they can be seen? 9 MS. PLACE: I can follow up with an 10 e-mail to the RAB. Again, we don't have any issue of no releasing the draft minutes, that's not EGLE's 11 issue, we're not holding the draft ones, that's --12 13 MR. WINN: Okay. I'm just -- and that 14 information is -- is what the community gets to see 15 what's going on. Well, I understand, and 16 MS. PLACE: it's not as -- you know, it's not just as simple as 17 oh, well leave it on (inaudible) --18 I understand that. 19 MR. WINN: 20 MS. PLACE: -- and we have to make 21 sure those decisions are --22 MR. WINN: The board is just making 23 sure everything is correct, I understand. But 24 again, when it comes to the meeting minutes, I find 25 that this information is -- I mean, every time I --

QRS Court Reporting, LLC 800.308.0068

I mean, I faithfully read those every month. When I find that information, I've already heard about it in a RAB meeting or some other type of meeting. And I would really like to -- just me, speaking myself, I would really like to see that information as quickly as possible.

7 MS. PLACE: Yeah, I have a few things 8 to say that -- that, and so I -- you know, I can 9 understand and I can get back to the RAB with a date on when those particular ones will have our reviews 10 11 In the past, Catharine proposed potentially done. having, you know, transcripts done from the BCTs, 12 13 EGLE is not opposed to that. I think it'll make it 14 easier and there will be less of a tone and 15 potential slant to some of those minutes if they're going to be relied on for decisions. So that's --16 It's very important -- and 17 MR. WINN: 18 just -- I'd like to -- I think the group would like to know when can we see that's -- if you tell me a 19

20 couple weeks, three weeks, that would be great.
21 Just --

MS. PLACE: Yeah. And I guess the other thing I wanted to say to that -- sorry -- was that we -- sorry -- you guys are receiving a lot of information at the same time that we are now, so

QRS Court Reporting, LLC 800.308.0068

it's not necessarily that some of the information 1 2 has been shared with us already. In some cases, 3 that is true, but a lot of the information 4 you -- you guys -- like, it's an e-mail to me, a 5 minute later, it's an e-mail to you. So, there's 6 not really a lot --7 MR. WINN: But that doesn't help the 8 community. That's all I'm saying. The 9 community -- those BCT minutes are available to the community to see what's going on in Oscoda and in 10 11 surrounding areas. Yeah, I get the e-mail, this 12 team gets e-mail, but the community doesn't know. And that's what we're here to do, we're here to 13 support the community. 14 15 MS. PLACE: Okay. 16 MR. SUELTENFUSS: Okay. And just a note there, so Beth, I've kept an action e-mail RAB 17 members to advise when the BCT meeting minutes will 18 be released. Does that work for you, that action? 19 20 MS. PLACE: It's when I provide our comments back to Air Force. I don't -- EGLE does 21 22 not release them to the public, that's Air Force. 23 We do post them on our website once the Air Force 24 has finalized. 25 Could you also capture an action item QRS Court Reporting, LLC

800.308.0068

if the BCT minutes can be transcribed? 1 Because then 2 that will really alleviate this whole issue, and they can be provided to the community in real-time. 3 Will do. 4 MR. SUELTENFUSS: And then 5 also I did -- just to go back a bit, I had an action send RAB members the Michigan Attorney General's 6 7 letter concerning applicable, relevant and 8 appropriate requirements. Is that something you can 9 provide as well? 10 MS. PLACE: Yeah. MR. SUELTENFUSS: Thank you. 11 Okay. 12 Well -- so we're still in the phase of questions 13 related to the briefing here. Let me just check in, because I know it's challenging to participate on 14 15 this virtually. So, let me make sure and reach out 16 to Denise Bryan, Puneet Vij, and Jessie Stuntebeck 17 to see if you all have questions on presentations so 18 Any questions -- any questions or hands raised far. 19 electronically? 20 So, continuing on then with the RAB 21 members here present in person, any questions on the 22 presentation so far? Yes? 23 MS. WUSTERBARTH: I want to give a big 24 picture of the timing. The soil removal project is 25 awesome, you know, we are very, very excited about

From my understanding, this -- this was 1 that. 2 recommended more than a decade ago, and it's always 3 been my concern that it's taken so long to get this 4 done, and I'm wondering, Catharine, if you have any 5 insight for us on why when you came, this suddenly 6 got done, and your predecessor did not? 7 DR. VARLEY: I have experience with 8 the projects forward, so I do need the community 9 support, and it's a team effort. We all need to be 10 in lockstep and working together. 11 So, the reason why we were able to do the time-critical is everything just fell right into 12 13 step. It was good timing, it was a good community 14 effort, you guys were asking the right questions at 15 the right time, and we were able to start the 16 sampling and get the ball rolling, and hopefully we can continue to get the ball rolling as we move 17 forward through the CERCLA process, as well as move 18 19 forward in IRAs, right? So, just got to keep going. 20 MS. VRIESENGA: Hey, Tim, this is 21 Sharon Vriesenga. 22 MR. SUELTENFUSS: Yes, go ahead, 23 Sharon. 24 MS. VRIESENGA: I'm sorry, Catharine. 25 I didn't mean to cut you off. When you're done,

I'll -- no, I think Catharine is still speaking. 1 2 I'll let her finish. 3 MR. SUELTENFUSS: Okay. 4 DR. VARLEY: Go ahead, Sharon. 5 MS. VRIESENGA: What I was going --6 sorry about that, Catharine. What I wanted to say 7 was the reason this soil removal was done is there 8 are rules and regulations about when you can do a 9 removal action, which is what was done for this soil The only reason the Air Force was 10 removal at FT002. 11 able to do that was because the concrete cap or 12 cover was taken off as a part of the other work that 13 was going on FT002. When that was done and the soil 14 was sampled, we realized we had a scenario, as the 15 time-critical removal action memo talks about, that there was an increased risk of contamination now 16 17 getting into the groundwater because the cap had 18 That was the driver for this removal been removed. action. 19 20 It's not as if we can just go around 21 and start digging up a lot of contamination all over wherever on the base, there has to be a driver to 22 23 take action this fast. This one had it. Maybe 24 we'll have that somewhere else in the base, maybe we 25 won't.

QRS Court Reporting, LLC 800.308.0068

DR. VARLEY: But as we move forward 1 2 through the CERCLA process, we will get to the FS, 3 and that will be something that we need to consider, 4 is do we do more soil removal, or do we implement 5 another technology and we will get there. So, 6 capture and -- that's what we're using for the IRAs, 7 source for capture, and then clean up. 8 MS. WUSTERBARTH: Can I ask Sharon 9 what's her role in --DR. VARLEY: Go ahead. 10 Sharon, you want to explain your role? 11 12 MS. VRIESENGA: Sorry, I had to 13 un-mute. Yeah, I should have identified myself and 14 I apologize. I'm an attorney and I advise the Air 15 Force on restoration matters at Wurtsmith Air Force 16 Base. I just -- I wanted 17 MS. WUSTERBARTH: 18 to add, and maybe I wasn't clear, is I think the 19 recommendation in the past has been to remove that 20 cap specifically. So, you know, again I'm just not sure why that part wasn't done also. 21 22 DR. VARLEY: So, the cap was removed 23 for fields. It was a 27 work plan. When I was 24 coming on board, it was already in motion and going. 25 So, once the cap was removed, we needed to know what

1 was under it. So, we were able to sample and get 2 everything removed. And I'm extremely thankful that 3 we had such a great contracting team, because we 4 were able to pull it off in a couple weeks as far as 5 getting the contract in place and everything else, 6 and that also leads to, you know, Aerostar. 7 Aerostar was able to turn around the RFP really 8 fast, and U.S. Ecology was able to step in and get 9 the work done. So, I mean it's a team effort. 10 MS. WUSTERBARTH: I have one more 11 question, actually, regarding the soil removal 12 project. I think I'm going to ask for clarification 13 on the half of the site that it was being 14 transported to, and the coordination between areas 15 in the hazardous waste, you know, dump areas and if they were above certain levels in terms of the PFAS 16 17 contamination. Was it separated at some point, or 18 did it all get to go into the one location, or --19 can you expand on that? 20 MS. VRIESENGA: Yes. Yeah, so when we 21 did our initial assessment of the soil out there, we 22 did kind of a vertical profile to see. And, you 23 know, we knew that the higher concentration material 24 was in the top, you know, five feet, so based on all 25 the data we collected, we selected the top five

QRS Court Reporting, LLC 800.308.0068

feet, which was everything over a thousand, and that 1 2 was a higher concentration that went into a 3 different sale of the landfill. Everything less 4 than that, and lower depth, lower concentration, that went into a different area of the landfill. 5 It's the same landfill, just a separate area. 6 7 And, Mark, where are you? If you can 8 -- Mark is -- I'm going to put him on the spot. 9 He's with U.S. Ecology. So, if you want, anything 10 else you want to add to that? 11 MR. HENRY: We have a (inaudible) to 12 provide more, wants to know a little bit more about the landfill (inaudible). 13 14 MS. WUSTERBARTH: Okay. Thank you. 15 MR. SUELTENFUSS: Does that address the questions? 16 That's it. 17 MS. WUSTERBARTH: Thanks. MR. SUELTENFUSS: 18 Any comments -- did 19 you have another question? 20 All right. I see we have a -- let me go to a question from Rex Vaughn real quick and then 21 22 I'll turn to you, sir. 23 So Rex Vaughn, in the process along 24 with others becoming RAB members, has a question --25 have any simulations been performed that estimate

the impact that the soil removal will have in the 1 2 shrinking of the plume flowing into Clark's Marsh? 3 That is a really good MS. BOND: 4 question. And we haven't really done simulations of 5 what the impact is going to be for removing that 6 soil, we haven't done any modeling of that yet, but 7 obviously, now that the soil is gone, we're going to 8 start really closely looking at the extraction well 9 data from FT002. Of course, it's going to take some 10 time for any action that's taken that far up 11 gradient to show an impact down where the extraction 12 wells are, or the other monitoring wells are that 13 are now closer to the treatment system itself. But, yes, when those wells are sampled, we're definitely 14 15 going to be looking to see what impact this has had on -- we haven't done modeling, though, to look at 16 that. 17 18 Yeah, Mark? 19 MR. HENRY: There are a bunch of 20 monitoring wells immediately down-gradient of the excavation. Do you have any plans of monitoring 21 22 those periodically to see the short-term impacts? 23 MS. BOND: We don't have a plan to do 24 that. I know that under other sampling programs 25 that are going on out there, there are some annual

sampling that takes place out there at FT002. 1 Like 2 I said, we don't have a specific plan just for the 3 dig and haul, but as data is collected for all of these other activities, including the RI, all of 4 5 that data will be looked at just to see what the 6 impact is. But we're not focusing on that -- the 7 impact of that immediately right away by developing 8 a plan for monitoring and looking at that. 9 DR. VARLEY: Yeah. The key thing is that the time-critical action was a time-critical 10 11 action, it was literally to remove the area directly 12 under the pad and a small area right adjacent, 13 because we were seeing signs of leeching. So, we 14 removed it as quickly as possible. 15 Now, we're back to the RI. We got to 16 look at how this will impact the RI, and moving this site into a feasibility study, because it is time to 17 18 start looking at that. 19 MR. SUELTENFUSS: Mr. Maxwell, do you 20 have a question? 21 Something I don't MR. MAXWELL: 22 understand, and that's in this statement that says 23 PFAS-impacted soils are not a hazardous waste. 24 Somehow or other, that doesn't make any sense. 25 MS. BOND: Yeah. So, there

1	is it's it gets very complicated very quickly,
2	but in short, there's a difference between
3	contaminated, where you have chemicals that are in a
4	soil or groundwater above a certain concentration,
5	or any concentration, you can call that
6	contaminated. Hazardous waste has a very specific
7	meaning, a regulatory meaning. And the definition
8	of a hazardous waste is determined through various
9	processes, testing and different things.
10	So, PFAS currently is not regulated as
11	a hazardous material by the EPA, so when we talk
12	about hazardous waste in a landfill, those are
13	hazardous wastes that have been designated that.
14	And I don't it has a very specific legal meaning,
15	hazardous waste, and PFAS are not designated as
16	that.
17	I'm fumbling all over myself with
18	that, but we can and maybe, Beth, I don't know,
19	from a state regulatory perspective, maybe you can
20	explain it.
21	MS. PLACE: I mean, I think you did a
22	fine job of explaining it. I think it really comes
23	down to how the EPA defines them
24	MS. BOND: Yeah.
25	MS. PLACE: and from our

I

1 perspective. 2 MS. BOND: Yeah, so you can -- so you 3 can have contamination without being hazardous, I 4 guess is the whole -- yeah. 5 DR. VARLEY: They're trying to alert you so you're not right in front of that camera. 6 7 They have two cameras going. Yeah. 8 MS. BOND: Oh, sorry. Yes, view the 9 back of my head. MR. SUELTENFUSS: And let's move to 10 Arnie Leriche for questions. 11 12 MR. LERICHE: Well, it's just a great comment and some information that we learned 13 yesterday on our tour that the public may want to 14 15 know, and it was about the 46 pounds and the six 16 million, and comparison of the removal that you just did to the six years of FT002. 17 MS. BOND: Yeah, the masks -- we did 18 19 just a quick calculation to -- based on the data 20 that we have, the mass of PFAS that was removed from 21 -- or I think we just did PFAS and PFOA, right? The 22 mass of PFAS and PFOA that we removed from the soil 23 in the excavation versus the mass of PFAS and PFOA 24 that have been removed with the treatment system 25 that's been pumping for six years. And the volumes

came out to be very similar, so just looking at 1 2 total mass of material that has been addressed at 3 the site. 4 MR. LERICHE: 46 pounds? 5 MS. BOND: Yeah, 46 pounds roughly at 6 both above the treatment system and the excavation. 7 DR. VARLEY: So -- all right. That's 8 not including any of the precursors that could turn 9 into PFOA/PFAS --10 MR. LERICHE: No. No. 11 DR. VARLEY: That's not including any 12 of the other compounds, or the fuels, or anything 13 else that was at that site. So, I mean --14 MR. LERICHE: It was more significant 15 than that. DR. VARLEY: It was more significant, 16 yeah. 17 18 MS. BOND: Right. Yeah. We just calculated PFAS and PFOA. And like we said, you 19 20 know, at the site, when you think 46 pounds, well, 21 maybe that doesn't sound very impressive, but when 22 you're counting it, you know, one nanogram at a 23 time, that is a lot, so -- you know, so --24 MR. LERICHE: That would fill up a lot of Olympic-size swimming pools. 25

1	MS. BOND: Yes, it would.
2	MR. SUELTENFUSS: Other questions from
3	the RAB members?
4	MR. CUMMINGS: As somebody who's been
5	sitting here watching this over the last five years
6	or so, I was attending the BRAC meetings before the
7	Township was asked to stop attending, and the one
8	of the comments and observations that I had at the
9	time watching these BRAC meetings take place back
10	five years ago, was that the CERCLA process
11	proceeded at a pace that it was much slower than
12	mother nature. And at that point, I commented and
13	laid down a point that I think is kind of funny, and
14	I'm not too fond of it, because it turned out
15	(inaudible.) And I said by the time you guys figure
16	out where the perimeter lies, the problem, it will
17	have already exceeded this. And at that point, just
18	a few months later, all of a sudden we heard about
19	Van Etten Lake, and we heard about private wells
20	being contaminated.
21	So, to point you know, Dave Winn
22	has got a great point, and I was very happy to hear
23	about the removal of the soil, and it is wonderful
24	that we've made this progress, and it's Cathy,
25	it's concerning that we did talk about this ten

L

QRS Court Reporting, LLC 800.308.0068

1 years ago. But the big concern here is for us to 2 continue the accolades, this has to maintain a speed 3 And when we hear about other folks who of progress. 4 are not on the call here, who is not present, name 5 I've forgotten, you know, where we talk about other 6 places that may or may not actually require soil 7 removal, because it hasn't been deemed necessary 8 yet, it lays down the concern that I've had now that 9 overshadows this solution. We better not be waiting 10 for another five or ten years to figure it all out. 11 DR. VARLEY: Yeah, so the time-critical reaction was time-critical. 12 It would 13 have gone above our system. I'm just being 14 straightforward honest as a scientist, it would go 15 above our system, we had to react. We have two IRAs 16 in place right now. We need to make sure we have 17 full capture, that's why we're doing the RI right 18 We're trying to get as much data as we now. 19 possibly can before winter, and then we will 20 continue as soon as we have good season again to 21 continue. That data is going to drive decisions to 22 make sure that we have capture, to make sure we have 23 containment. As long as we have containment, we 24 will continue through that CERCLA process to the FS, 25 to the proposed plan, to the ROD, to where we can

QRS Court Reporting, LLC 800.308.0068

1 make decisions and have that remedial design where 2 we can do either excavation or something even 3 better. Right now, SERDP has -- SERDP-ESTCP has 4 several different technologies that should be viable 5 for this cleanup effort, and might be even better 6 for us than just digging and hauling, or pumping and 7 treating. Pumping and treating is going to take a 8 long time. 9 MR. CUMMINGS: Yes, it will. Now that we've removed a 10 DR. VARLEY: 11 big source, I expect it to take a lot less, because 12 we don't have the continuous movement continuously 13 through that area. But, we will continue. I mean, 14 you've got the best team that -- I mean, I've got 15 the best team with me, so --16 MR. CUMMINGS: Well, and quite frankly, as Cathy said, we've been through a few 17 18 folks who have been in your position. You've done 19 more in the short time you've been here than anybody 20 we've seen prior. I'm at least encouraged by what 21 you have been able to produce. So, I thank you 22 personally and on behalf of Oscoda Township. 23 DR. VARLEY: Thank you, sir. 24 MR. SUELTENFUSS: Okay. Mr. Leriche? 25 MR. LERICHE: Beth raised a suggested

action item regarding the BCT transcription of it 1 2 and so forth, correct? 3 MR. SUELTENFUSS: Yes, I captured 4 that. 5 MR. LERICHE: Right. 6 MR. SUELTENFUSS: I don't know whether 7 BCT meetings can be transcribed. 8 MR. LERICHE: Right. But in the event 9 that transcriptions are not approved, can I modify that action item to include that Air Force and EGLE 10 11 will come up with another process so that we get timely release of the BCTs? 12 13 DR. VARLEY: Yeah. So, transcription 14 is going to require contract mod most likely, so I 15 do need to figure that out, if we can do it and what that will take. 16 17 MR. LERICHE: Right. 18 DR. VARLEY: As far as developing a 19 better process, Beth, I think we're open to it, 20 right? 21 MS. PLACE: Yeah. MR. LERICHE: Just add it into one AI 22 23 so we don't have discuss this again, you'll come 24 back to us a status, right? Thanks. 25 MR. SUELTENFUSS: So, determine

whether BCT meetings can be transcribed, consider 1 2 the best process by which to release BCT meeting minutes in a timely fashion. 3 4 Okav. Other questions from the RAB 5 members? 6 MR. HENRY: Can I add a comment 7 related to the same issue? One of the more valuable 8 things that I find with BCT minutes are 9 presentations that are attached to that. If the 10 presentations themselves are non-contentious, could 11 those be distributed early? 12 DR. VARLEY: So, that's just something 13 that we've been working with. And part of what I'm 14 hoping Steve will be able to help with is that there 15 haven't been a lot of presentations. It's been a lot of document review since I've been on board, and 16 17 we really haven't been making any real decisions. 18 So, what we've been talking about is 19 to come up with something that we're trying to work 20 towards. Making an agenda for that, making a slide deck for that, then putting that out to EGLE for 21 22 them to review for a couple of weeks, and then us 23 getting together and talking it through during a BCT 24 so that you guys have time to review and we have 25 time to actually make decision to move the program

QRS Court Reporting, LLC 800.308.0068

So, I do think that that's something that 1 forward. 2 We're still working through the we can do. 3 logistics. 4 MR. HENRY: Okay. 5 MR. LERICHE: Can I ask Sharon to 6 clarify? I could not hear half of -- my hearing is 7 not great either, but when -- Sharon, are you still there? 8 9 Yes, I'm still here. MS. VRIESENGA: 10 MR. LERICHE: Okay. When you talked 11 about the -- the critical action for the soil removal and the pad, you talked about why -- how 12 13 that was done. And you mentioned FT002. I'm hoping 14 that you're not referring to the discussion we had 15 at the last meeting about the FT002 original GAC 16 unit and ROD that was, I believe, done. You weren't 17 tying those two together, were you? Did that make sense? 18 I think you're asking 19 MS. VRIESENGA: 20 a technical question about what drove the removal of the cap? 21 22 MR. LERICHE: The question I asked 23 last time, last meeting, was, was the original GAC 24 unit, FT002 -- should it be part of the fourth, 25 fifth, five-year review, and there was a big

discussion about that, and it was kind of confusing. 1 2 I reread it twice, the 11 pages in the transcript on 3 that dialogue back and forth, and I just want to 4 clarify that your discussion of the time-critical 5 for this soil removal has nothing to do with -- just clarify that -- has nothing to do with the GAC unit 6 7 FT002 --8 DR. VARLEY: It has nothing to do with 9 this. 10 MR. LERICHE: Good. Good. It's just 11 I could not hear her clearly on some of that. 12 Right. Thank you. DR. VARLEY: It's not critical removal 13 action, it was a time-critical removal action in and 14 15 of itself. It had nothing to do with any of the 16 other projects, versus the lead agency, we did our 17 job. We knew that the system was going to get We took action. 18 overwhelmed. 19 MR. LERICHE: Right. Right. 20 MR. SUELTENFUSS: I have a request just to remind everyone who's joined us online to 21 22 please mute yourselves. So again, to mute 23 yourselves is star six, correct, if you're dialing 24 by phone, and then you can use the mute function if 25 you're connected by computer.

1	Other questions on this presentation
2	from the RAB members?
3	All right. We are as Tim and I
4	both look at our watches, we are one second off of
5	the designated break time. So, let me suggest we
6	move into a break. Let's see. So, our break will
7	be for ten minutes. So 6:20 now, and we'll come
8	back at 6:30 and start up again. Thank you.
9	(Break occurred at 6:20 p.m.)
10	(Meeting reconvened at 6:31 p.m.)
11	MR. SUELTENFUSS: So, this will be
12	just for any questions the RAB members may have, not
13	necessarily specific to the presentation that was
14	just given, but any other questions from the RAB
15	members? Yes, Cathy Wusterbarth?
16	MS. WUSTERBARTH: And I don't know if
17	we talked about this in the past, but I'm really
18	interested in a bunch about this project, this site,
19	seeing the numbers and, you know, where this is
20	spent and how much is getting and all of that. Is
21	there a place I can look for that?
22	DR. VARLEY: You'll be seeing the
23	action memorandum soon, so we're just finishing
24	comments on that. So, hopefully in the next week or
25	so, we'll have that ready to go public. But right
	ORS Court Reporting. LLC

1 now, we're looking at 6 million dollars, roughly, 2 for this whole project for the time-critical removal 3 action. MS. WUSTERBARTH: No -- well, we moved 4 5 past the time for --6 DR. VARLEY: Oh. 7 MR. SUELTENFUSS: Well, it can 8 certainly be about that presentation, but it also 9 can --MS. WUSTERBARTH: No, this is just 10 about harm to, you know, our site. 11 12 DR. VARLEY: For this year? Ι 13 think --14 MS. WUSTERBARTH: No. For, you know, 15 historically and for the future, I mean I feel like --16 17 DR. VARLEY: Oh. That's a very good 18 question. (Multiple speakers.) 19 20 MS. WUSTERBARTH: -- (inaudible), right? Like, we're (inaudible) numbers and we're 21 22 being asked to ask for money, and so --23 DR. VARLEY: That's what I need to 24 move forward. So, the contracting officer 25 representative, so when Jordan joined me on the QRS Court Reporting, LLC

800.308.0068

trip, he's the one that handles the money for us, 1 2 right? Right now, we are waiting on a presidential 3 budget to lock in what we have for this year, but as 4 soon as we have everything, we will be moving 5 forward. I don't know what we have for next year, 6 but we will have money. 7 MS. WUSTERBARTH: How about 8 historically, where could I find --9 DR. VARLEY: Historically? 10 MS. WUSTERBARTH: (Inaudible). 11 MR. LERICHE: The fact sheets, you've 12 already --13 DR. VARLEY: Oh, the fact sheets would 14 have it, because that's --15 MR. LERICHE: Right. DR. VARLEY: -- (inaudible) they have 16 17 access. 18 MS. WUSTERBARTH: Okay. DR. VARLEY: So, yeah, let me see if I 19 20 can get you an updated fact sheet, okay? 21 (Multiple speakers.) 22 MS. WUSTERBARTH: (Inaudible). 23 DR. VARLEY: If it's not updated, I'll 24 see if I can get it updated. 25 MR. LERICHE: Well -- yeah, that's

what I was just going to mention is that we used to 1 2 get -- at the beginning of a RAB, we used to get a 3 colorful two-page fact sheet, and a big part of it 4 was how much money has been spent, and how much 5 money will it take to complete, okay? And we haven't been getting those the last three RABs. 6 But 7 then, unbeknownst to any of us, all of a sudden what 8 showed up on the MPEG (ph) site was a different type 9 of fact sheet that is a FAQ of facts, do you understand? And it's brand new, I don't know if you 10 11 ever even knew about it. I haven't seen it. 12 DR. VARLEY: MR. LERICHE: I didn't know about it 13 14 either, but one of the contractors must have come up 15 with it. 16 DR. VARLEY: It wasn't any of mine, so 17 it was probably EPA. Yeah, I can show it to 18 MR. LERICHE: 19 But I think to answer the question, I think it you. 20 would be very, very helpful to communicate those 21 numbers of the historical, what's going to happen in 22 the next year, two years, at least to cover the 23 schedule we've been talking about, which is the RI 24 to finish, and that budget so that we know with 25 confidence that your management is getting you the

money to meet those schedules that you're committing 1 2 And if you can get your management to support to. 3 that being shared with us each RAB, or it wouldn't 4 change, then say nope, that last one is still 5 accurate, would be okay. 6 DR. VARLEY: I'll see what I can do. 7 And I know that Perell (ph) put some numbers in his 8 talks last year, and we'll see what we can do, 9 because I'm sure that there is a fact sheet out there that we can share. 10 11 MS. WUSTERBARTH: Thank you. 12 MR. SUELTENFUSS: Yes. Let's go to 13 Mr. Cummings first and then Mr. Maxwell. 14 MR. CUMMINGS: Thank you. This is a 15 quick question directed to Dr. Varley. Are you 16 prepared to summarize what you see are the next steps for this site --17 DR. VARLEY: Yeah. 18 MR. CUMMINGS: -- down the road? 19 20 DR. VARLEY: So, what we're doing 21 right now is we've collected a lot of RI data. So, 22 we're analyzing that RI data to make sure that we 23 have full capture. So, if we don't have capture, 24 then we need to step in and we need to do something 25 to expand and make sure that we are not

contaminating -- I mean, Au Sable or the river at 1 2 the Clark's Marsh, the Van Etten Lake, you know, so 3 we're going for capture as well as pursuing the 4 CERCLA process. So, remedial investigation and the 5 feasibility study, and I'd like to start those 6 feasibility studies as soon as we have enough data 7 to support it. Daniel Stock? 8 MR. SUELTENFUSS: 9 MR. STOCK: Yeah, my question to you 10 is with the Health Department as to well sampling. 11 When might we expect the results of this latest 12 round with domestic well sampling? Will that be 13 available online with the maps showing locations the 14 way the earlier --15 MR. SUELTENFUSS: So, maybe a question 16 for Puneet Vij with the Department of Health and Human Services. 17 18 Puneet, were you able to hear that 19 question? 20 Let me just check in again with Puneet Vij? 21 22 Okay. Do we still have Puneet listed 23 on the meeting? Yes? Okay. 24 Puneet, we are not able to hear you 25 right now, so just for the meeting support folks,

1 can you please make sure Puneet is un-muted, and 2 then Puneet, you might need to confirm that you are So, Puneet, are you with us? 3 as well. 4 Okav. Well, technology gremlins of --5 MS. PLACE: I can provide some and 6 then we can follow up with Puneet. Well, Puneet 7 provides the numbers, so I know it was hard to hear 8 him, but -- so he provides the numbers and the total 9 wells tested, and then which ones are above the 10 values, which may or may not be helpful. 11 We are in the process of putting together -- we've talked about putting together some 12 13 maps they might -- likely be in EGLE -- an EGLE 14 output based on that residential well sampling, but 15 we're still in the process of verifying some of the residential well coordinate locations, and so that's 16 been a problem kind of moving forward. 17 18 We will probably just give a general type map, because it is, you know -- there are 19 20 privacy issues with, you know, actually putting out a table with those results, but yeah, we -- that's 21 22 on our radar. I can't really give you a timeframe 23 right now on when that will be done, but we have 24 been working kind of the pieces to put that 25 together, more or less. And we can get back to you

on a timeframe. I just don't want to provide 1 2 something that's completely made up at this point. 3 (Multiple speakers.) 4 MR. STOCK: Hopefully (inaudible). 5 MS. PLACE: Yes. Yes. Yep. 6 MR. SUELTENFUSS: Thank you for the 7 question, sir. Any other --8 MR. VIJ: Hi, this is Puneet, can you 9 hear me? 10 MR. SUELTENFUSS: Yes, we can hear 11 you. Go ahead. 12 MR. VIJ: Okay. Somehow the un-mute 13 button was not there, so I was not unable to un-mute 14 myself. 15 So, the two rounds of sampling we 16 have, the data, and then we provided the data to 17 EGLE and I agreed with what, you know, Beth mentioned. And if you like, I have those figures, I 18 19 can show it, and maybe in the next meeting, this is 20 how the first round -- no, the second round is looking. 21 So, it sounds like 22 MR. SUELTENFUSS: 23 Puneet is available to share figures at the next 24 meeting. I think that was your suggestion, Puneet; 25 is that right?

1 MR. VIJ: Yes. I can use those 2 figures in my presentation. 3 DR. VARLEY: For the next community 4 town hall. 5 MR. VIJ: I'm talking about the next 6 town hall. 7 MR. STOCK: You say 19 wells have been 8 tested. Are they all kind of clustered in one 9 place, or are they spread out into locations? You have no idea. 10 11 MR. VIJ: They are spread out in 12 different locations. But, yes, definitely I agree 13 with you. I get your point. So, I can put together 14 a figure and I can show it in the next town hall. 15 MR. SUELTENFUSS: So, that would be 16 the next town hall, the EGLE town hall. MS. PLACE: Our town hall, right. 17 And then that will be available online afterwards too if 18 19 you --20 MR. VIJ: Yeah. 21 MR. SUELTENFUSS: And, Puneet, thank 22 you for hanging in there with the technology. We 23 appreciate your patience. 24 MR. VIJ: No problem. Thank you. 25 MR. SUELTENFUSS: And while we're

QRS Court Reporting, LLC 800.308.0068

77

talking to folks on the line, let me just check in 1 2 with Denise Bryan, Jessie Stuntebeck. Do you all 3 have any questions that you'd like to pose? 4 MS. BRYAN: Thank you very much. I do 5 not have any questions. 6 MR. SUELTENFUSS: Okay. Thanks. All 7 Well, let's see if there are other right. 8 questions, other discussions with RAB members. Go 9 ahead, Arnie. Regarding the RI work 10 MR. LERICHE: 11 plan, some of us over the last few years have been 12 raising a concern that Off Base has been used too 13 extensively by the Air Force, and we're really happy 14 that you've extended that somewhat. But, the area 15 of Clark's Marsh and the State forest, I forget the 16 name of the marsh there, and the plumes that leave the base all the way from the wastewater treatment 17 18 plant to FT002, to OT16, moving to the east, those 19 plumes, all of the way to the Au Sable River, where 20 is that being discussed in writing as part of some 21 investigation all the way to Au Sable River? 22 And second part of that is, the 23 concept in CERCLA of a secondary or a supplemental 24 source of PFAS created by the original, but now it's 25 in a place where it is disconnected from the

original, and that it is a source of -- unto itself 1 2 that will last a lot longer than the plume going 3 into FT002. 4 DR. VARLEY: So, we're doing the We're collecting 5 remedial investigation right now. a lot of data. We're tracing out where the plumes 6 7 are and we're using that to make data-driven 8 decisions. That's what we're doing, Arnie. 9 MR. LERICHE: So, you feel you do not 10 have enough information about the plumes, including 11 the data that the State sent to you over a year ago, 12 to make -- question the -- or at least identify that 13 there is a possibility that there is -- the marsh is going to be contaminating and polluting the Au Sable 14 15 River longer than you could ever clean up by FT002? 16 DR. VARLEY: We are -- so, what you're 17 asking, if I am being correct --18 MR. LERICHE: Okay. DR. VARLEY: -- is you're asking if 19 20 what's already done on Forest Service land is continuing to go forward, and if there is -- we're 21 We're working with SERDP-ESTCP 22 trying to do stuff. 23 to try and put something on three pipes, to make 24 sure that we're getting passive treatment that works 25 and maybe we can use that somewhere else as well.

QRS Court Reporting, LLC 800.308.0068

79

1	MR. LERICHE: Okay.
2	DR. VARLEY: We're working with I
3	mean, we're looking at all of our resources and
4	MR. LERICHE: That's great, but
5	there's nothing on a map that shows that you're
6	doing that, that shows that there's an operational
7	unit or a COQ whatever you re-numbered the
8	contamination sites last time, last year. And
9	creating an identification, here is an area where
10	the data from the State shows that that is a
11	secondary source, and therefore, give it a
12	designation, and then you can start taking that
13	apart
14	DR. VARLEY: We're still delineating
15	the plumes, but that doesn't mean that we're you
16	know, we're not we're looking at all the data we
17	have as we have it.
18	We've got the data from the State,
19	we've got a lot of data that we've collected
20	recently, and I'm pushing these guys every day to
21	collect more, and get more geoprobes up here to
22	punch more holes in the ground, get more soil and
23	more water and everything else.
24	We are going I mean, as we get the
25	data, that's how we scope the projects. As we scope

I

the projects, that's how I communicate to you guys 1 2 this is what I'm thinking, what do you guys think --3 MR. LERICHE: So, am I accurate in 4 saying that if you've got the data, you're analyzing 5 the data, it sounds like you have not analyzed the 6 State data that they've been taking --7 DR. VARLEY: We have. 8 MR. LERICHE: -- the last six years. 9 DR. VARLEY: We have. So, do you have any data 10 MR. LERICHE: 11 to indicate that the GSI 12-part per trillion or 12 greater is going to Au Sable River? Are you 13 confident that that is happening or not happening? 14 So, the off-site data DR. VARLEY: 15 right now is insufficient to define contamination. MR. LERICHE: Insufficient? 16 DR. VARLEY: Insufficient. We don't 17 18 have enough data at this point in time to define it. 19 Sorry, I'm getting phone a friend, they're giving me 20 the answers, I'm relaying them to you. I have an 21 amazing team. All I can tell you is we have 22 (inaudible) on this. So, yes, we do not currently 23 have the information to answer that question. 24 MR. LERICHE: So, is it a data gap 25 identified in the RI?

1 DR. VARLEY: It's a data gap that's 2 being filled in the RI -- by the RI. 3 MS. BOND: The answer is yes. 4 MR. LERICHE: But you have to start by 5 identifying and listing a gap. 6 MS. BOND: It is discussed in the RI 7 work plan, yes. 8 MR. LERICHE: As a gap? 9 MS. BOND: Yes. 10 MR. LERICHE: Have you seen that? 11 MS. PLACE: I don't remember off the 12 top of my head if that's labeled a data gap, but I 13 know that there is -- they are planning monitoring 14 wells south of, I believe, it's --15 MR. LERICHE: The VAS is the vast 16 monitoring wells that were just published in a map that was shared with us last month, have them just 17 below the boundary into Clark's Marsh. It's only 18 19 about halfway --DR. VARLEY: 20 Those are --21 MR. SUELTENFUSS: Let me just jump in 22 real quick and turn to Dr. Varley for a response. 23 DR. VARLEY: Yes. Those are initial 24 points. Those are not our step-outs. That's where 25 we start, and then if we find contamination, we step

We're following the same approach that we did 1 out. 2 for soil, the same approach. It's a tried approach. 3 You know EPA guidance. 4 MR. LERICHE: Okay. Can I ask for an 5 action item that the data gap highlight where that 6 is in the RI work plan right now so that we're all 7 talking about the same animal of where we are in the 8 process? Can that be done? Regarding Clark's 9 Marsh, the other marshes, the wastewater treatment 10 plant plumes, and the Au Sable River just in that --11 DR. VARLEY: I don't guite understand 12 what you're asking for. MR. LERICHE: I have not seen it, you 13 14 say you think it's there, you've seen some 15 discussion, and Paula is saying it's in there. And so we've got three interpretations of what it is and 16 where it is. 17 18 MR. SUELTENFUSS: So, Beth, I think 19 you were about to make a comment. 20 MS. PLACE: Yeah, I don't necessarily 21 know if it was clearly identified as a data gap, 22 what exactly you're talking about, but my 23 recollection the last iteration of the remedial 24 investigation work plan did have monitoring wells 25 south of Clark's Marsh. I can't remember if I'm

remembering the most recent plan or not. 1 But -- so 2 that data would help fill exactly what you're asking 3 for. So, it's filling that data gap, but I can't 4 say that that -- that data gap is clearly defined. 5 MR. LERICHE: But it's more than just 6 what's in Clark's Marsh, it's what's then further 7 going into the Au Sable River that is a data gap in 8 the way you're talking about. 9 DR. VARLEY: We go where the data 10 takes us, and that's -- I mean, that's the 11 monitoring wells that you're talking about down by the Au Sable River, so yeah --12 13 MS. PLACE: Yeah, they're between 14 Clark's Marsh and the Au Sable, based on my 15 recollection. 16 DR. VARLEY: We go where the data 17 takes us, and right now, we have planned wells for 18 down by the Au Sable. MR. LERICHE: 19 You do? 20 DR. VARLEY: We do. 21 MR. LERICHE: And that's shown on a 22 map in the work plan? 23 DR. VARLEY: It is. 24 MS. PLACE: In the work plan, yes. 25 Not -- not in the initial VAS locations that you

quys have seen, but in the work plan that we're --1 2 DR. VARLEY: We haven't gotten to the 3 step of putting in monitoring wells yet. 4 MR. LERICHE: Can the three of you 5 highlight page numbers where that is so that the 6 rest of us can --7 DR. VARLEY: The work plan is not out 8 yet, Arnie, that's the problem. We're in draft. 9 So, Beth is going to try and get me comments by the end of the month, first week of December at the 10 11 latest, right? We're going to, as an Air Force 12 team, take those into consideration. We're going to 13 go through all of them, do what we can within policy 14 and guidance. We'll go back to EGLE or we'll meet 15 together and we'll decide a path forward together. That's what we can do. We can't share a draft 16 17 document, that's not how things are done. MR. LERICHE: I don't need the draft 18 document. 19 I want just a statement that that topic, 20 all the way to Au Sable River, is in the RI plan, 21 it's not an addendum to the RI. 22 DR. VARLEY: It's not an addendum. Ιt 23 is there. 24 MR. LERICHE: Okay. 25 DR. VARLEY: It is there presently. QRS Court Reporting, LLC

800.308.0068

85

We have wells along there, and we're working with 1 2 Forest Service to get the access to be able to do that work, so --3 4 MR. LERICHE: Because there is only 5 two years left in the RI. 6 MR. SUELTENFUSS: So, let me just 7 check to see if there are other questions the RAB 8 members have. Yes, go ahead. 9 MR. HENRY: It's related to this same 10 thing. When is the RI work plan going to be 11 released to the public? 12 MR. LERICHE: Right. As soon as possible. 13 DR. VARLEY: The 14 goal is before March when we start the next field 15 So we -- what was it -- 198 comments is season. what we got. And 200 roughly --16 MS. PLACE: Yeah, I don't think there 17 were that many, but okay. 18 DR. VARLEY: 19 There were a lot of 20 comments, so --21 MS. PLACE: There were. DR. VARLEY: -- we decided to address 22 23 it by media so that we could move into field season. 24 Otherwise, we would have lost this entire field 25 season. We would have made no progress whatsoever.

So, groundwater, we could agree on, right? 1 We move 2 forward on groundwater. Soil, we had about 3 90 percent agreement, we moved forward on soil. 4 Bass, we're probably closer to 70 percent agreement, we move forward on bass. 5 6 Now, we're getting to the point that 7 we need to actually look at what we have. We're not 8 going to finish the bass sampling this season, even 9 though, Paula, you didn't hear me say that, we're 10 going to be pushing to try to get it done, right? 11 Sorry. 12 But, yeah. No, these guys have to 13 deal with me going more always, and I push them 14 hard, and I appreciate the fact that they stick it 15 out and they continue. Paula is extremely appreciated as well as the rest of the Aerostar 16 team, and all of the subcontractors that stepped in 17 18 to pick up the slack. So, they're doing a great job 19 and great work. 20 So, we are continuing to move forward 21 step by step by step. We will have some time to get 22 that work plan finalized between Beth's team and our 23 team, Air Force team. And then hopefully, we'll be

sharing that and everybody can tell us, you know, if we missed something. Let us know if we missed

24

25

QRS Court Reporting, LLC 800.308.0068

87

something, because we're -- it's still a fluid 1 2 process. We're not done. So -- and we've got a 3 whole other field season ahead of us. 4 MR. LERICHE: By the next RAB, do you think? 5 6 DR. VARLEY: Not by the next RAB, I 7 said by March. MR. LERICHE: I didn't hear that. 8 You 9 turned to him and you -- by March for the work plan? DR. VARLEY: For the work plan, that's 10 11 the goal, is March. Because March/April, we should 12 be back in the field again, if the field season 13 cooperates, which we've had really --14 MR. LERICHE: That gives you less than 15 a year to do the sampling to fill those gaps 16 and -- okay. DR. VARLEY: We're continuing forward. 17 18 I mean, we've already taken a thousand-plus 19 samples -- well, over a thousand samples in just 20 soil alone. Hundred-something in bass. 21 90-something in -- 96 in groundwater, so --22 MR. SUELTENFUSS: So, Mark, does that 23 address the question? 24 MR. HENRY: Yes, of course. Thank 25 you.

1 MS. PLACE: I have a guick comment on 2 that. 3 MR. SUELTENFUSS: Go ahead. 4 MS. PLACE: So, the only other issue 5 that would come up with that would be -- I know my 6 understanding is Forest Service is also reviewing 7 the plan, and so I'm not sure how that will play 8 into these plans. 9 DR. VARLEY: Yeah. So, as Jessie has 10 questions and comments, she reaches out as well and 11 we talk. And same with Beth. So, all of us are 12 talking, and they've actually helped a lot with the 13 development of the risk assessment work plan as well 14 as the RI work plan. So, I'm grateful for that 15 collaboration. MR. SUELTENFUSS: And Jessie 16 17 Stuntebeck, anything you'd like to add on that? 18 Other questions from the RAB members? 19 Yes, sir? 20 MR. CUMMINGS: It's requested, and I 21 was wondering what is the status of the conflict 22 negotiations (inaudible) between the Air Force and 23 the Forestry Service regarding (inaudible)? 24 DR. VARLEY: It's much bigger than 25 that. We're talking about what is actually

happening at a DoD and USDA level for solution. 1 And 2 RSCS is at the Forest Service as well as with the 3 Air Force are involved in trying to move our 4 projects forward. 5 So, we have good support on our team 6 to try and come up with something that we can work 7 with and move everything forward. And we had some 8 ideas today. We met this morning, and I think we're 9 going to make some progress. So I'm optimistic. We have a great relationship with the local crew. 10 11 MR. CUMMINGS: All right. Anv timeframe? 12 DR. VARLEY: Before next field season. 13 14 That is the goal for everything right now. We are -- this field season is about over. 15 I don't 16 want to say that too loud, my contractors might hear But, yeah. So, before next field season. 17 me. I'm 18 sorry. And just for the 19 MR. SUELTENFUSS: 20 meeting support staff, Jessie Stuntebeck is not able to mute or un-mute herself, so if you could see if 21 22 you could assist her with that. Other questions from the RAB members? 23 24 MR. LERICHE: Can I throw out one 25 regarding the ARARs and the five new groundwater

criteria? 1 2 For both Beth and Catharine, is there a critical path that that has to -- that has to be 3 4 settled so that does not slow down your RI? 5 DR. VARLEY: For the four sets (ph), is that what you're talking about? 6 7 No, no --MR. LERICHE: 8 MR. GAINES: I think he's talking 9 about the ARARs as they relate to going forward and when you're finally going to comply with --10 11 MR. LERICHE: Because what we learned 12 last meeting was that the new five PFASes has not 13 been -- according to the Air Force, has not been 14 promulgated so that you will accept them as an ARAR. 15 Is that still true, or is that --16 DR. VARLEY: So, we are not to that 17 point yet, Arnie. That's -- so -- sorry I'm 18 confusing multiple things going on at once. 19 So right now, we are only at the RI 20 stage. We have an interim remedial action. The key word is "interim". It is only for that pump and 21 22 treat system that is in place, that localized 23 effort. It is interim. That's what those ARARs are 24 for. Now, those give us a good starting point for 25 when we actually finish the FS and the PT ROD, those

will be ran into that ROD for the full site. 1 2 If I get my way, hopefully we can push 3 to do FT002 sooner, because we have a lot of data 4 We know what we're doing out there. So, if we now. 5 could actually start moving that site a little bit 6 further and faster, we might have a ROD in place at 7 some point in time in the next couple years. We'll 8 This may take a lot of work on mine and Beth's see. 9 part as well as everybody else's, but it's doable. 10 MR. SUELTENFUSS: Arnie and Bill, does 11 that address the question? MR. GAINES: It did for me. 12 13 MR. SUELTENFUSS: All right. Any 14 other questions from the RAB members right now? 15 Okay. We're a few minutes ahead of 16 schedule, but just want to check in once again with those who are on the phone, the RAB members Denise 17 18 Bryan, Puneet Vij, Jessie Stuntebeck, anything you'd like to add? 19 20 MS. BRYAN: This is Denise. I do not 21 have any additional updates or comments. 22 MR. SUELTENFUSS: Thanks, Denise. 23 MS. STUNTEBECK: This is Jessie. Ι 24 don't have anything either. 25 MR. SUELTENFUSS: Thank you, and I

1 appreciate your patience with the technology, 2 Jessie. 3 MR. VIJ: I don't have anything This is Puneet. 4 either. 5 MR. SUELTENFUSS: Thanks, Puneet. 6 Well, let's advance the slide, Okay. 7 if we could, and we'll move into the public comment 8 portion of the meeting. 9 So, the RAB members had the 10 opportunity to engage in some discussion about the 11 presentation and general matters, so now we're 12 opening the floor to members of the public who would like to address the RAB. Let's see. We'll start 13 14 with those who are -- I'll actually start with a 15 question that was posed online from Jennifer Hill, 16 and then I'll turn to those who are in person. 17 And when we do in person public 18 comments, I'll ask that you come up to this 19 microphone right here, let me point it up, and make 20 your comments there. Get real close to that 21 microphone so we can hear you. 22 Before turning to Jennifer Hill, do we 23 have a --24 UNKNOWN SPEAKER: (Inaudible). 25 MR. SUELTENFUSS: Got it. Okay.

1	Great. Thank you.
2	Okay. So then, let me start off with
3	public comments from those who are here in person.
4	So, is there anyone here who would like to make a
5	three-minute comment to the RAB?
6	Yes, sir. Please come on up. If you
7	would like to, please share your name and just go
8	ahead and make a comment.
9	MR. PALMER: Yeah. My name is Bill
10	Palmer, I'm an Oscoda Township trustee, and several
11	years ago, the Air Force approached me to put a test
12	well on my property. And they said at the time they
13	wanted to put about three or four more. I live on
14	Van Etten Lake along the west shore. And I know
15	they put one at Ratliff Park and my property, so I'm
16	assuming they put two more somewhere near me.
17	I got a call from a resident here in
18	Oscoda who lives down at the south end of the lake
19	by the dam, and he got a letter from the Air Force
20	wanting to know if they could have permission to put
21	a test well there.
22	So, I'm just curious what the plan is
23	for the Air Force to put more of these test wells
24	along the west shore of Van Etten Lake or other
25	areas so they can let this person resident know what

I

the purpose of that is.

1

2 DR. VARLEY: Thanks, Bill. That's Yes, I meant to mention that earlier. 3 great. So, 4 we have a lot of rights of entry out there right now 5 so that we can actually delineate the plumes. And 6 that allows us to move forward. And right now, 7 we're moving forward in vertical aquifer sampling, 8 which is a well that -- well, we punch a hole in the 9 ground, we take samples on our way down, we collect 10 water at the water table all the way down to the confining clay layer. And then, we go ahead and we 11 12 pull out all the tooling and we seal that well up so 13 it's no longer there, and see -- do whatever we need We also have some permanent wells that will 14 to do. 15 come in the future that we will be asking for access 16 for, and that access is extremely important to 17 understanding where we have contamination and where we need to take action. 18 19 So, I think those that actually have 20 already signed access agreements with us and helped the Air Force, and I ask that, you know, you please 21 22 at least consider it, because it will make 23 remediation so much better if we all do it together. 24 As far as -- I know that you have the 25 well that's been sitting there, and we do need to

look into whether or not we need that well, and if we don't need it anymore, we do need to abandon it. So, that is something that I know we've talked about. Okay.

1

25

MS. PALMER: And I guess my question was only one resident had contacted me. I'm just wondering how many others you were anticipating putting along in along the lake, and if they were all on the west side or going to be some on the east side as well.

11 DR. VARLEY: So, they're on the west 12 side, because we're stepping out from where we 13 currently are, right, and we're trying to understand 14 the plume -- that -- plumes, there's several of 15 And I'm trying to remember how many letters them. 16 we've actually sent out. We've sent out quite a We've had four come back that are -- we have 17 few. 18 four rights of entry in place right now, and then 19 we've had three people tell us that there's no way 20 that they're going to allow us access to their land, 21 and then we've had some ask well, if you -- if we 22 give you access, can you abandon these other ones 23 that were from previous work. So, we're working on 24 that and working our way through.

Paula, do you have a rough estimate of

QRS Court Reporting, LLC 800.308.0068

96

how many we have out there or the total number? 1 2 MS. BOND: Yeah, I don't have the 3 exact number off the top of my head, but it's around -- we sent out about 20 so far. And then 4 5 depending on if we get a positive response or a 6 negative response, then other letters will go out in 7 adjacent areas. So, like Catharine said, we're doing 8 9 bass locations. We've got monitoring wells that we're going to install. So, we're trying to get all 10 11 of our access agreements, again, working through the winter when we kind of have some downtime from the 12 13 fieldwork to get all of the access agreements in 14 place. So, the end number will vary, how many 15 actually went out depending on how many people give us permission or deny permission. 16 Some of the different things that 17 18 we're trying to do -- initially, we wanted to try to 19 keep everything in the right-of-ways as we could, 20 because we do have an agreement with the county to 21 do some work in the right-of-way, but there could be 22 instances where we may need access to someone's 23 property. While we're installing something, we just 24 want to make sure it's okay if -- you know, if 25 there's a truck or something parked in your driveway

QRS Court Reporting, LLC 800.308.0068

97

or something for a little while, while we're doing 1 2 that. 3 So, that number will be fluid and 4 we'll be happy to provide that number, because we'll 5 have more information definitely by the next RAB 6 meeting on who has given us permission and who 7 hasn't, and the total number that have gone out. 8 Okay. 9 MR. SUELTENFUSS: Thank you. Are there other public comments from those who are here 10 11 with us in person? 12 MS. KULAN: Hello, I'm Chris Kulan 13 (ph), I live in Oscoda -- actually, Au Sable 14 Township, and I want to make you aware of the foam 15 on Lake Huron that we're seeing. This picture I took about three miles south of the river. 16 This just shows -- I call it a foam map, because it's 17 not, like, level, it's fluffed up floating on the 18 lake, and it's all throughout this area, but this is 19 20 the largest concentration. It's bright white foam. 21 I think it's pretty safe to say it's not natural. 22 But we would like to have it tested. 23 So, this was on October 6th. And then 24 we had another event that was at the mouth of the 25 river that was quite large, and that was on

October 28th. We have asked the State to do testing 1 2 of the foam, and they say they will not do that, 3 because what are we going to do if we find out that 4 it is something? It's basically why do we want to 5 know if we can't do anything about it? 6 Well, I don't buy that argument. Ι 7 don't buy that argument with monitoring -- with health monitoring in our blood, and we're hearing 8 9 this same thing again about the foam. So, one way 10 or another, we're going to get this tested. This is about a mile from the municipal water intake on 11 12 shore. 13 Yesterday, there was foam on Tawas The State says, oh, that's probably from 14 Bay. another source. Well, I'm doubtful. No other place 15 around here has this stuff. So, do you -- we need 16 to test these events. And we're going to keep on 17 18 bringing it up until we get it tested. And we're 19 working on doing that independently, however, we 20 would appreciate it if the State --21 MR. SUELTENFUSS: Let me pause the 22 conversation -- see, if I could, Bill, if we could 23 pause real quick. Ms. Kulan, go ahead. 24 MS. KULAN: We would appreciate if the 25 State would cooperate and do at least some testing

1 of these events. This happens on our public beach 2 in the downtown area, this happens at 3 Mile, which 3 is north of town. And both of those are actually north of the river. 4 5 So, we don't know what's going on, but 6 these things are happening, and people are seeing 7 this, children are playing in this, birds are 8 migrating through this, and pets are playing in 9 It's just -- we have to do something about this. this. 10 11 This has been happening since -- I think the first time I saw was in 2000 -- what was 12 it, '17? 13 '16 or '17? And this year has been a 14 particularly bad year. I see it nearly every day. 15 Not to this degree, but I see some foam that you can 16 definitely tell the characteristics are there, the 17 way it clumps, the way it gathers, how it's spread out, the wind conditions, all of that. 18 We have 19 records. The state asked that we report it, and 20 we've reported, we reported. We're going to keep 21 reporting it, I guess, but they're not doing 22 anything about it. We want to know what's going on. 23 And it's got to be coming from the 24 base, and it's coming from the river out into the 25 lake, and we know that. And we -- I quess you have

to get all of your data to say yes, that's true, but 1 2 And I just want everybody to know and be it's true. 3 aware of this situation that we're seeing here in This is what it looks like. 4 Oscoda. 5 MR. SUELTENFUSS: Thank you. 6 I appreciate you bringing DR. VARLEY: 7 So, there are more sources than just AFFF, it up. 8 and hopefully everybody knows that. We do have 9 septic systems out there --10 MS. KULAN: But that's my argument to 11 test. DR. VARLEY: And that's the reason to 12 13 -- if we do test, to make sure we're testing for other tracers like caffeine and pesticides --14 15 MS. KULAN: Whatever. 16 DR. VARLEY: -- and other things that could be a source. 17 18 MS. KULAN: As long as you test it for 19 PFAS, we're happy. 20 MR. SUELTENFUSS: Thank you very much 21 for your comment. 22 MS. KULAN: Thank you. 23 DR. VARLEY: Thank you. 24 MR. SUELTENFUSS: Okay. And are there 25 other public comments from those who are with us

here in person? 1 2 Okay. Let me just check with meeting 3 staff to see if we have anyone who is wishing to 4 make a comment who has joined us online. If you 5 would like make a comment and you've joined us 6 online, please raise your hand. And again, if 7 you've dialed in via phone, you can hit star nine. 8 So, let's see. Do we have anybody 9 listed? Not currently. Okay. All right. We'll 10 give that a few minutes for that time lag that is 11 required sometimes to come off mute, raise hands, star nine and so on. 12 13 Let me just check in again. Do we 14 have others here in person who would like to make a 15 comment? 16 MR. LERICHE: I had a quick one to Chris's to augment what Chris has said. 17 I've qot a question for Catharine and the Air Force. 18 Do you have any plans, or have you 19 20 already done but not published, any PFAS -- the 21 whole spectrum signature of your samples that you've 22 taken of groundwater or surface water, 23 characterization of the PFAS breakdowns and 24 different types? You know, 80 percent is PFAS, ten 25 percent is PFOA, that kind of split? Because other

bases have been doing that in the last two years, 1 and there's SERDP studies to show how that can be 2 3 done. So, is this team doing something like that? 4 DR. VARLEY: That is something that we 5 have been working on. That is correct, yes. So --6 MR. LERICHE: "Working on" means? 7 DR. VARLEY: I've got Dr. Hunter 8 Anderson looking at that. I've been calling, I've 9 been looking at all of the data as it's collected, 10 both sides of the lake, what EGLE has provided, what 11 we have. We've been looking at the data and looking 12 at what the signatures are for the Air Force 13 compounds based off of solutions that we know 14 existed. 15 MR. LERICHE: Looking at data from 16 your samples, is what you're saying? DR. VARLEY: As well as the EGLE 17 18 samples, correct. 19 MR. LERICHE: And do you have a 20 potential release or discussion of some of that with 21 us? 22 DR. VARLEY: No. So, as soon as 23 Hunter -- Dr. Anderson -- finishes his analysis, he 24 will share it with the group. We will bring it to 25 town.

1 MR. LERICHE: And part B is, is he or 2 someone helping to pull together what other sites 3 are doing in that topic so that we can learn from 4 them, because identifying the sources, we want to 5 know more than just well, the septic systems out 6 We want as much science that can be put to there. 7 this issue, because we're standing out like a sore thumb on this foam issue. 8 9 DR. VARLEY: We are working with 10 SERDP, we are working with the ESTCP, we are working 11 to make sure we're collecting the data that we need 12 to advance the projects and the programs, and 13 hopefully -- I mean, the small studies that we do 14 are based on larger studies that have already been 15 So, we are -- we're going to get there. done. 16 We're not there yet, but we're going to get there. MR. LERICHE: Can he share at least 17 the studies that he's identified so that we can talk 18 19 to our colleagues at other RAB sites or other DOT 20 sites? Can you do that much? 21 DR. VARLEY: When we get there. We're 22 not there yet. 23 MR. LERICHE: Just what studies he's compiled that he's looking at, you can't share that? 24 25 DR. VARLEY: I can ask.

1	MR. LERICHE: Okay. Thank you.
2	MR. SUELTENFUSS: Thank you. Any
3	other public comments at the moment?
4	Okay. Well, so if we could, let's go
5	ahead and advance the slide, I think, to next
6	one. Let's go to the next one, if we could.
7	So, let me just before moving into
8	concluding remarks, just check in to see how you all
9	would like to use the remaining time that we have
10	set aside. It's 7:10 right now. We've made it
11	through the agenda with the exception of just
12	concluding remarks. How would you like to proceed?
13	Wrap up, or is there any further discussion? I
14	heard a yes
15	MR. HENRY: I'm not opposed to more
16	discussion. If people have questions, then we have
17	people here to answer those questions and discuss.
18	I would certainly open it up for as long as the
19	questions remain.
20	MR. SUELTENFUSS: Okay. Well, what
21	questions do come to mind?
22	DR. VARLEY: Are there any questions?
23	If there aren't any questions, then we
24	could go back to posters or, you know, just continue
25	the conversation, and in the online part.
	OPS Court Poporting IIC

1 MR. SUELTENFUSS: Yeah. So, just 2 confirming no -- no hands raised from anyone online, 3 correct? No. Okay. All right. 4 So, I think the suggestion was perhaps 5 after we address any questions there are, we could 6 kind of continue that poster discussion just in 7 small groups and so on. Any questions before we do that? Yes. 8 9 MR. LERICHE: The posters, they're 10 great, and they were last time too. Can the Air 11 Force give us a high quality photo of each of them 12 so that we can put it in the IR and we can all have 13 our own copy of it? 14 DR. VARLEY: They will be posted on 15 the RAB website just like the last time. They're all up there from the last time. 16 17 MR. LERICHE: But not as a PDF. PDF 18 is not going to do it for us, it's too much detail. 19 It's got to be a JPEG. 20 DR. VARLEY: Those were printed -those were printed from PDF. 21 22 MR. LERICHE: But they're blown up, 23 but --24 DR. VARLEY: No. 25 MR. LERICHE: Okay. QRS Court Reporting, LLC

800.308.0068

106

They're the same. 1 DR. VARLEY: We put 2 up the exact same thing we printed them from. So, we're going to do the same thing again unless, for 3 4 some reason, that doesn't work. I mean, you could 5 take a picture, but --6 If we can read the fine MR. LERICHE: 7 print or --8 DR. VARLEY: Yeah, I --9 (Multiple speakers.) 10 MS. BOND: Yeah, I think -- Arnie, at least print those posters. They are designed to be 11 12 those large posters, so when we make a PDF and you 13 try to print it, it doesn't, because it --14 MR. LERICHE: Yes, exactly. 15 MS. BOND: So, yeah, I know exactly 16 what you're saying. So, just from there -- they 17 don't have a printer that can print them to the size 18 that they were meant to be. DR. VARLEY: But they could, if we 19 20 take the same files that we put up here --21 MS. BOND: We can -- yeah, we can --22 DR. VARLEY: -- put those directly on 23 there --24 MS. BOND: We can reduce those. But 25 there is -- you know, and one of the reasons we make

them big is because there is a lot of data on them. 1 2 MR. LERICHE: Right. 3 MS. BOND: So, it's a challenge to get 4 them to a size that is printable that those people 5 have 11 by 17 (inaudible) --I'd be willing to bet if 6 MR. LERICHE: 7 you took the PDF, because I used to print those, and 8 converted it to a JPEG, save it as a JPEG, and check 9 the quality of it. It's going to be a 10 high-definition JPEG now. 11 MS. BOND: Right. But when you print 12 it off on an 8 and a half by 11, there's so much 13 information on there, you're still not going to be 14 able to read it. But I'll give you a JPEG. That's fine. 15 MR. LERICHE: MR. SUELTENFUSS: We are fortunate to 16 17 have -- at the back, we've got, like, six big minds related to audio/visual stuff. 18 So, I suggest that 19 the two of you connect on that topic with some of 20 the folks who have been supporting this meeting as 21 well. 22 Any other questions before we break 23 and move to poster session discussions? I did 24 capture a number of action items. 25 One, send the Michigan Attorney QRS Court Reporting, LLC

800.308.0068

General's letter about -- or relevant appropriate departments so the RAB members with Beth Place to advise RAB members when Michigan EGLE will provide comments to the Air Force concerning the BCT meeting minutes with Beth as well.

6 Number three, determine whether BCT 7 meetings can be transcribed, consider the best 8 process by which to release BCT meeting minutes and 9 relay the information in a timely fashion and 10 provide updated Wurtsmith fact sheets to RAB 11 members, include information about budget if 12 possible.

13 Okay. Well, there will be followup 14 Let me just pause the discussions that discussion. 15 we do have ongoing in the audience real quick to make sure we do not pick those up on the mics. 16 There will be discussions between the co-chairs as 17 18 we typically do after meetings. Just turn to you 19 all for any closing comments.

20 MR. HENRY: Well, before I give a 21 closing comment, Beth sent an e-mail around that had 22 the AG's letter in it, is that it? So, that action 23 item is already taken care of.

24MR. SUELTENFUSS: Really? Man.25DR. VARLEY: Good Lord, you're fast.

1	MR. SUELTENFUSS: In record time.
2	MS. PLACE: That was fast.
3	DR. VARLEY: That's impressive.
4	MR. SUELTENFUSS: Well, thank you. I
5	appreciate it. Very good. Well, Mark, would you
6	like to start us off?
7	MR. HENRY: I'd like to thank
8	everybody for coming. I think we've have learned a
9	fair amount about what's going on. I know in my
10	mind, I have more questions based on what we've seen
11	tonight. And I will be following that up between
12	now and the next RAB meeting, and also at the next
13	RAB. So, look forward to any discussions.
14	MR. SUELTENFUSS: Dr. Varley?
15	DR. VARLEY: I'd just like to thank
16	absolutely everybody for being here, for being
17	present, for helping with communication, for working
18	on the project together. As I provide data, I
19	appreciate the feedback that some of you have
20	provided back, and I want to keep the lines of
21	communication open. So as you have questions,
22	please reach out. Let's keep it going.
23	MR. SUELTENFUSS: Well, thank you very
24	much, and thank you to those who have attended in
25	whatever form that you attended. And we are
	ORS Court Reporting, LLC

adjourned for the evening. Have a good night. Thank you. (At 7:17 p.m., the RAB meeting concluded.) Minutes certified by: /s/ Rochelle Snowden, CSR-5519 Quentina QRS Court Reporting, LLC 800.308.0068, 810.691.4226 Dated: December 8, 2021 QRS Court Reporting, LLC
