DISCLAIMER

The information presented in this briefing is for execution planning purposes only and is subject to change. AF personnel will not answer execution questions directly, but will direct all inquiries regarding FY20 ORC solicitations to the United States Army Corps of Engineers (USACE) Point of Contact (POC) identified for each ORC. The USACE POC is the single designated contact for all inquiries concerning ORC execution planning.

The screenshot shows the homepage of the U.S. Air Force Civil Engineer Center's Business Opportunities page. The header includes the AFCEC logo, navigation links (HOME, NEWS, ABOUT US, WHAT WE DO, BUSINESS), and a search bar. The main content area is titled "DOING BUSINESS WITH AFCEC" and features a large image of hands working on a metal component. Below the image is a paragraph describing the center's mission and a link to the Air Force Installation Contracting Agency website. A red box highlights the "OPTIMIZED REMEDIATION CONTRACTS (ORCS)" section, which describes the program's goals and provides a link to the FY20 ORC Execution Strategy. The right sidebar contains "MORE INFO" links for FedBizOpps.gov, U.S. Air Force Small Business, BAA (More Sustainable Environmental Solutions), and EUL, as well as a "PRESENTATIONS" section listing various industry events and slide presentations.

HOME NEWS ABOUT US WHAT WE DO BUSINESS

DOING BUSINESS WITH AFCEC

Headquartered at Joint Base San Antonio-Lackland, Texas, the Air Force Civil Engineer Center is responsible for providing responsive, flexible full-spectrum installation engineering services across the Air Force enterprise. Successful business partnerships are critical to AFCEC meeting its execution mission requirements.

All AFCEC solicitations are listed on the Federal Business Opportunities (FedBizOpps) website, the single government point-of-entry for U.S. federal government procurement opportunities over \$25,000.

For general Air Force contracting information, visit the Air Force Installation Contracting Agency website at <http://www.wpafb.af.mil/afica>.

OPTIMIZED REMEDIATION CONTRACTS (ORCS)

ORCs will effectively and efficiently manage the AF Environmental Restoration Program in a performance-based, results-oriented, and cost conscious framework. One significant component will be the incorporation of lessons learned during Performance Based Remediations in the development of ORC performance objectives. ORCs will be firm fixed price contracts and generally cover all known sites at an installation.

Contractors will be incentivized to achieve performance objectives in keeping with the end state of choice as determined by a business case analysis of total life cycle costs with the objective of minimizing future AF liability and cost to the greatest degree feasible. While that end state of choice is generally Response Complete, the milestone signifying that the DoD Component has met the remedial action objectives for a site, documented the determination, and sought regulatory agreement, ORCs will utilize existing site data to inform realistic performance objective selection.

ENTERPRISE PROCUREMENT CLEARINGHOUSE REPORTS

The Clearinghouse Report is a list of projects that have been reviewed and cleared for execution by AFCEC based on mission, matching requirements with the best appropriate contract venue for execution. The most current Clearinghouse Report, as well as report archives, are available [here](#). Do not contact the installations listed as these projects will be managed by AFCEC.
